- (1) are of wear-resisting material;
- (2) are installed in a manner that provides resiliency upon contact with the road;
- (3) have projections that do not exceed three thirty-seconds (3/32) of an inch beyond the tread of the traction surface of the tire; and
- (4) are constructed to prevent any appreciable damage to the road surface.

(e) Notwithstanding subsection (d), a vehicle may be equipped year-round with tires that have retractable tire studs if the tire studs remain retracted from May 2 to September 30 of each year.
