

234.230 Class A liquid to be purged from tank and piping before use with Class B liquid.

No compartment of a tank vehicle which has contained a Class A liquid on the prior loading shall be loaded with Class B liquid until such compartment and all piping and accessory delivery equipment connected thereto have been drained of all Class A liquid and then flushed with a quantity of Class B liquid sufficient to clear them of any remaining Class A liquid; or cleared of Class A liquid by some equally effective method.

Effective: June 17, 1954

History: Created 1954 Ky. Acts ch. 208, sec. 4, effective June 17, 1954.
