

352.090 Abandoned parts of mine to be posted -- Sealing.

- (1) All unused workings and abandoned parts of mines shall be protected by safeguards that will prevent the accumulation or overflow of gas, and all avenues leading thereto shall be so arranged and conducted as to give warning to all persons of the danger of entering, and notice shall be posted warning all unauthorized persons not to enter these parts of the mine. If the area cannot be adequately ventilated, and examined, or evaluated it shall be sealed in a timely manner.
- (2) No person, except persons authorized to make examination thereof, shall enter any unused or abandoned part of a mine after the warning has been posted.
- (3) Where the practice is to seal abandoned workings, the sealing shall be done in accordance with a mine seal construction plan approved by MSHA and submitted to the Office of Mine Safety and Licensing. Seal construction shall be done immediately in an effective manner with noncombustible material. In every sealed area, one (1) or more of the seals shall be fitted with a pipe and cap or valve to permit the gases behind the seals to be sampled and also to provide a means of determining any existing hydrostatic pressure. When required by the mine inspector and commissioner, drill holes shall be extended from the surface to the sealed area, or vent pipes shall be extended from the sealed area to a return air course. Sufficient ventilation shall be provided at each seal to prevent dangerous gases from accumulating.
