

they are used to process heroin. Bilateral cooperation between Pakistan and the United States continues to support Pakistan's goal of returning to poppy-free status. United States Government support focuses especially on upgrading the institutional capacity of Pakistan's law enforcement agencies.

A number of indicators qualify the addition of El Salvador and Belize to the Majors List along with the remainder of Central American countries on the isthmus connecting South America to North America.

El Salvador, located between Guatemala and Nicaragua along the Pacific coastline and sharing an eastern border with Honduras, is subject to a number of factors making it vulnerable to the drug trade flowing to the United States from South America. The International Narcotics Control Board describes El Salvador as part of the so-called "northern triangle" with Guatemala and Honduras where "national gangs are forming alliances with international criminal syndicates." According to the most recent U.S. interagency assessment of cocaine flows, the amount of this illicit substance passing through El Salvador destined directly for the United States was estimated at 4 metric tons in 2009.

The most recent U.S. assessment for Belize estimates the flow of drugs destined for the United States through this Central American country on the Caribbean coast at about 10 metric tons. Belize's vulnerability as a south-north avenue for the illegal narcotics trade is also demonstrated by recent drug and weapons seizures in Mexico along the border it shares with Belize. United States officials also report that drug control observers in Belize are increasingly concerned about the presence of drug trafficking organizations, including Los Zetas of Mexico, in the country's border areas and in coastal ports.

Considering the Central American region as a whole, the United States Government estimates that as much as 90 percent of some 700 metric tons of cocaine shipped annually from Colombia and other producing nations intended for the U.S. markets passes through the countries of Central America. This situation is an important element prompting the Central American Citizen Security Partnership, which I announced in March 2011. Through this partnership, the United States is working to refocus the impact of assistance through the Central American Regional Security Initiative (CARSI) and enhance the impact of complementary United States Government non-CARSI citizen safety and rule of law programs. Countries in the region are increasing coordination through the Central American Integration System, a combined effort to promote citizen security and economic prosperity, including programs aimed at thwarting the drug trade.

International documentation shows continued strengthening of illegal drug trafficking ties between South America and West Africa. West Africa is the closest point to South America for transatlantic purposes, and its close proximity to southern Europe provides a natural gateway to European drug markets. Porous borders, inadequate law enforcement, and corruption create a permissive environment for the illegal drug trade. West African linguistic connections among Brazil, Portugal, and Cape Verde may also contribute to narcotics trafficking.

According to the U.S. assessment of cocaine movement, about a third of cocaine destined for Europe passed through West Africa in 2009. The 2011 U.N. World Drug Report also states there are reports that cocaine from Latin America is being stockpiled in some West African countries for future distribution to Europe in smaller quantities.

Despite the range of domestic challenges, including corruption, West African countries have begun to consider narcotics control as a top national security priority. For example, in 2010, Liberian law enforcement successfully uncovered and interdicted a cache of cocaine valued at \$100 million. A number of U.S. projects in West Africa are aimed at improving drug interdiction and investigation capabilities. The assistance pro-

vided by international donors and organizations to West African governments to improve their counter-narcotics capability is increasingly urgent. The United States welcomes fresh impetus in 2010 and 2011 from the international community, especially the United Nations and the European Union, to make Africa a priority for drug-control assistance, to promote and protect the stability and positive growth of countries in Africa.

The stealth with which both marijuana and synthetic drugs such as MDMA (ecstasy) and methamphetamine are produced in Canada and trafficked to the United States makes it difficult to measure the overall impact of this smuggling. However, a special report prepared in May 2011 by the U.S. Drug Enforcement Administration states that "the threat posed by MDMA trafficking from Canada to and within the United States is significant." For example, in April 2011, a seizure of 20 pounds of MDMA from a Canada-based trafficking group was made by U.S. law enforcement in Plattsburg, New York. The United States pledges a more robust engagement and dialogue with Canada to reduce the shared problem of illegal drug trafficking. The results of this bilateral redoubling of drug-control cooperation will be considered in the framework of next year's Presidential Determination.

You are hereby authorized and directed to submit this determination under section 706 of the FRAA, transmit it to the Congress, and publish it in the Federal Register.
