the Counterterrorism Communications Support Office (CCSO).

- (b) The purpose of the CCSO shall be to perform the specific project of supporting agencies in Government-wide public communications activities targeted against violent extremism and terrorist organizations, especially al-Qa'ida and its affiliates and adherents, to audiences abroad by using communication tools designed to counter violent extremism and terrorism that threaten the interests and national security of the United States.
- (c) In carrying out its purpose set forth in subsection (b) of this section, the CCSO shall:
- (i) support agencies in their implementation of whole-of-government public communications activities directed at audiences abroad, including by providing baseline research on characteristics of these audiences, by developing expertise and studies on aspirations, narratives, information strategies and tactics of violent extremists and terrorist organizations overseas, by designing and developing sustained campaigns on specific areas of interest to audiences abroad, and by developing expertise on implementing highly focused social media campaigns; and
- (ii) perform such other functions related to the specific project set forth in subsection (b) of this section as the Secretary may assign.
- (d) The CCSO shall be headed by a Director selected by the Secretary, with the advice of the Steering Committee. Its staff may include, as determined by the Secretary: (1) personnel with relevant expertise detailed on a non-reimbursable basis from other agencies; (2) senior and other technical advisers; and (3) such other personnel as the Secretary may direct to support the CCSO. To accomplish this mission, the heads of agencies participating on the Steering Committee shall provide to the CCSO, on a non-reimbursable basis, assistance, services, and other support including but not limited to logistical and administrative support and details of personnel. Non-reimbursable details shall be based on reasonable requests from the Secretary in light of the need for specific expertise, and after consultation with the relevant agency, to the extent permitted by law.
- the relevant agency, to the extent permitted by law.

 (e) The CCSO shall terminate at the end of the maximum period permitted by section 3161(a)(1) of title 5, United States Code, unless sooner terminated by the Secretary consistent with section 3161(a)(2) of such title.

SEC. 4. General Provisions.

- (a) Nothing in this order shall be construed to impair or otherwise affect:
- (i) authority granted by law to an agency, or the head thereof; or $\,$
- (ii) functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.
- (b) This order shall be implemented consistent with applicable law and subject to the availability of appropriations.
- (c) This order is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

§ 2656a. Congressional declaration of findings of major significance of modern scientific and technological advances in foreign policy

BARACK OBAMA

The Congress finds that—

(1) the consequences of modern scientific and technological advances are of such major significance in United States foreign policy that understanding and appropriate knowledge of modern science and technology by officers and employees of the United States Government are essential in the conduct of modern diplomacy;

- (2) many problems and opportunities for development in modern diplomacy lie in scientific and technological fields;
- (3) in the formulation, implementation, and evaluation of the technological aspects of United States foreign policy, the United States Government should seek out and consult with both public and private industrial, academic, and research institutions concerned with modern technology; and
- (4) the effective use of science and technology in international relations for the mutual benefit of all countries requires the development and use of the skills and methods of long-range planning.

(Pub. L. 95–426, title V, §501, Oct. 7, 1978, 92 Stat. 982.)

§ 2656b. Congressional declaration of policy regarding consequences of science and technology on conduct of foreign policy

In order to maximize the benefits and to minimize the adverse consequences of science and technology in the conduct of foreign policy, the Congress declares the following to be the policy of the United States:

- (1) Technological opportunities, impacts, changes, and threats should be anticipated and assessed, and appropriate measures should be implemented to influence such technological developments in ways beneficial to the United States and other countries.
- (2) The mutually beneficial applications of technology in bilateral and multilateral agreements and activities involving the United States and foreign countries or international organizations should be recognized and supported as an important element of United States foreign policy.
- (3) The United States Government should implement appropriate measures to insure that individuals are trained in the use of science and technology as an instrument in international relations and that officers and employees of the United States Government engaged in formal and informal exchanges of scientific and technical information, personnel, and hardware are knowledgeable in international affairs.
- (4) In recognition of the environmental and technological factors that change relations among countries and in recognition of the growing interdependence between the domestic and foreign policies and programs of the United States, United States foreign policy should be continually reviewed by the executive and legislative branches of the Government to insure appropriate and timely application of science and technology to the conduct of United States foreign policy.
- (5) Federally supported international science and technology agreements should be negotiated to ensure that—
 - (A) intellectual property rights are properly protected; and
- (B) access to research and development opportunities and facilities, and the flow of scientific and technological information, are, to the maximum extent practicable, equitable and reciprocal.
