(1) countries in which such buildings are located may be given visible incentives to develop and use local solar energy or other renewable energy resources to reduce dependence upon petroleum and petroleum products;

(2) markets may be developed for American solar energy systems and components in order to stimulate investment in such systems and components and to reduce the costs of such systems and components to reasonable levels;

Any project selected under this section should be similar to projects which have been demonstrated by the Department of Energy (or any of its predecessor agencies) to be reliable, maintainable, and technically feasible.

(3) Any project selected under this section shall be adaptable to the local resources, climatic conditions, and economic circumstances of the country in which such project is implemented in order that such country will be more likely to implement similar projects.

(4) The Secretary of State shall insure that any project selected under this section is demonstrated to, and available for inspection by, officials and other citizens of the country in which such project is implemented.

(5) In selecting projects under this section, the Secretary of State shall give priority to projects to be implemented in developing countries.

(c) Planning for use of renewable energy systems in construction of new buildings

Whenever any building is constructed under the authority contained in section 292 of this title, the Secretary of State shall insure that the planning for such construction takes into account those renewable energy systems which are available in the country in which the building is to be constructed.

(d) Availability of sums previously authorized to be appropriated

In addition to amounts otherwise available for such purposes, \$4,000,000 of the amount authorized to be appropriated by section 101(a)(1) of this Act shall be available only to carry out the purposes of this section.
