

if the Administrator determines that a substantial population may be exposed to such substance.

(July 1, 1944, ch. 373, title XIV, §1457, as added Pub. L. 104-182, title I, §136, Aug. 6, 1996, 110 Stat. 1680.)

§ 300j-18. Drinking water studies

(a) Subpopulations at greater risk

(1) In general

The Administrator shall conduct a continuing program of studies to identify groups within the general population that may be at greater risk than the general population of adverse health effects from exposure to contaminants in drinking water. The study shall examine whether and to what degree infants, children, pregnant women, the elderly, individuals with a history of serious illness, or other subpopulations that can be identified and characterized are likely to experience elevated health risks, including risks of cancer, from contaminants in drinking water.

(2) Report

Not later than 4 years after August 6, 1996, and periodically thereafter as new and significant information becomes available, the Administrator shall report to the Congress on the results of the studies.

(b) Biological mechanisms

The Administrator shall conduct biomedical studies to—

(1) understand the mechanisms by which chemical contaminants are absorbed, distributed, metabolized, and eliminated from the human body, so as to develop more accurate physiologically based models of the phenomena;

(2) understand the effects of contaminants and the mechanisms by which the contaminants cause adverse effects (especially noncancer and infectious effects) and the variations in the effects among humans, especially subpopulations at greater risk of adverse effects, and between test animals and humans; and

(3) develop new approaches to the study of complex mixtures, such as mixtures found in drinking water, especially to determine the prospects for synergistic or antagonistic interactions that may affect the shape of the dose-response relationship of the individual chemicals and microbes, and to examine noncancer endpoints and infectious diseases, and susceptible individuals and subpopulations.

(c) Studies on harmful substances in drinking water

(1) Development of studies

The Administrator shall, not later than 180 days after August 6, 1996, and after consultation with the Secretary of Health and Human Services, the Secretary of Agriculture, and, as appropriate, the heads of other Federal agencies, conduct the studies described in paragraph (2) to support the development and implementation of the most current version of each of the following:

(A) Enhanced Surface Water Treatment Rule (59 Fed. Reg. 38832 (July 29, 1994)).

(B) Disinfectant and Disinfection Byproducts Rule (59 Fed. Reg. 38668 (July 29, 1994)).

(C) Ground Water Disinfection Rule (availability of draft summary announced at (57 Fed. Reg. 33960; July 31, 1992)).

(2) Contents of studies

The studies required by paragraph (1) shall include, at a minimum, each of the following:

(A) Toxicological studies and, if warranted, epidemiological studies to determine what levels of exposure from disinfectants and disinfection byproducts, if any, may be associated with developmental and birth defects and other potential toxic end points.

(B) Toxicological studies and, if warranted, epidemiological studies to quantify the carcinogenic potential from exposure to disinfection byproducts resulting from different disinfectants.

(C) The development of dose-response curves for pathogens, including cryptosporidium and the Norwalk virus.

(3) Authorization of appropriations

There are authorized to be appropriated to carry out this subsection \$12,500,000 for each of fiscal years 1997 through 2003.

(d) Waterborne disease occurrence study

(1) System

The Director of the Centers for Disease Control and Prevention, and the Administrator shall jointly—

(A) within 2 years after August 6, 1996, conduct pilot waterborne disease occurrence studies for at least 5 major United States communities or public water systems; and

(B) within 5 years after August 6, 1996, prepare a report on the findings of the pilot studies, and a national estimate of waterborne disease occurrence.

(2) Training and education

The Director and Administrator shall jointly establish a national health care provider training and public education campaign to inform both the professional health care provider community and the general public about waterborne disease and the symptoms that may be caused by infectious agents, including microbial contaminants. In developing such a campaign, they shall seek comment from interested groups and individuals, including scientists, physicians, State and local governments, environmental groups, public water systems, and vulnerable populations.

(3) Funding

There are authorized to be appropriated for each of the fiscal years 1997 through 2001, \$3,000,000 to carry out this subsection. To the extent funds under this subsection are not fully appropriated, the Administrator may use not more than \$2,000,000 of the funds from amounts reserved under section 300j-12(n) of this title for health effects studies for purposes of this subsection. The Administrator may transfer a portion of such funds to the Centers for Disease Control and Prevention for such purposes.

(July 1, 1944, ch. 373, title XIV, §1458, as added Pub. L. 104-182, title I, §137, Aug. 6, 1996, 110 Stat. 1680.)

PUBLIC HEALTH ASSESSMENT OF EXPOSURE TO
PERCHLORATE

Pub. L. 108-136, div. A, title III, § 323, Nov. 24, 2003, 117 Stat. 1440, provided that:

“(a) **EPIDEMIOLOGICAL STUDY OF EXPOSURE TO PERCHLORATE.**—The Secretary of Defense shall provide for an independent epidemiological study of exposure to perchlorate in drinking water. The entity conducting the study shall—

“(1) assess the incidence of thyroid disease and measurable effects of thyroid function in relation to exposure to perchlorate;

“(2) ensure that the study is of sufficient scope and scale to permit the making of meaningful conclusions of the measurable public health threat associated with exposure to perchlorate, especially the threat to sensitive subpopulations; and

“(3) examine thyroid function, including measurements of urinary iodine and thyroid hormone levels, in a sufficient number of pregnant women, neonates, and infants exposed to perchlorate in drinking water and match measurements of perchlorate levels in the drinking water of each study participant in order to permit the development of meaningful conclusions on the public health threat to individuals exposed to perchlorate.

“(b) **REVIEW OF EFFECTS OF PERCHLORATE ON ENDOCRINE SYSTEM.**—The Secretary shall provide for an independent review of the effects of perchlorate on the human endocrine system. The entity conducting the review shall assess—

“(1) available data on human exposure to perchlorate, including clinical data and data on exposure of sensitive subpopulations, and the levels at which health effects were observed; and

“(2) available data on other substances that have endocrine effects similar to perchlorate to which the public is frequently exposed.

“(c) **PERFORMANCE OF STUDY AND REVIEW.**—(1) The Secretary shall provide for the performance of the study under subsection (a) through the Centers for Disease Control and Prevention, the National Institutes of Health, or another Federal entity with experience in environmental toxicology selected by the Secretary.

“(2) The Secretary shall provide for the performance of the review under subsection (b) through the Centers for Disease Control and Prevention, the National Institutes of Health, or another appropriate Federal research entity with experience in human endocrinology selected by the Secretary. The Secretary shall ensure that the panel conducting the review is composed of individuals with expertise in human endocrinology.

“(d) **REPORTING REQUIREMENTS.**—Not later than June 1, 2005, the Federal entities conducting the study and review under this section shall submit to the Secretary reports containing the results of the study and review.”

PART F—ADDITIONAL REQUIREMENTS TO
REGULATE SAFETY OF DRINKING WATER

§ 300j-21. Definitions

As used in this part—

(1) **Drinking water cooler**

The term “drinking water cooler” means any mechanical device affixed to drinking water supply plumbing which actively cools water for human consumption.

(2) **Lead free**

The term “lead free” means, with respect to a drinking water cooler, that each part or component of the cooler which may come in contact with drinking water contains not more than 8 percent lead, except that no drinking water cooler which contains any solder, flux, or storage tank interior surface

which may come in contact with drinking water shall be considered lead free if the solder, flux, or storage tank interior surface contains more than 0.2 percent lead. The Administrator may establish more stringent requirements for treating any part or component of a drinking water cooler as lead free for purposes of this part whenever he determines that any such part may constitute an important source of lead in drinking water.

(3) **Local educational agency**

The term “local educational agency” means—

(A) any local educational agency as defined in section 7801 of title 20,

(B) the owner of any private, nonprofit elementary or secondary school building, and

(C) the governing authority of any school operating under the defense dependent’s education system provided for under the Defense Dependent’s Education Act of 1978 (20 U.S.C. 921 and following).

(4) **Repair**

The term “repair” means, with respect to a drinking water cooler, to take such corrective action as is necessary to ensure that water cooler is lead free.

(5) **Replacement**

The term “replacement”, when used with respect to a drinking water cooler, means the permanent removal of the water cooler and the installation of a lead free water cooler.

(6) **School**

The term “school” means any elementary school or secondary school as defined in section 7801 of title 20 and any kindergarten or day care facility.

(7) **Lead-lined tank**

The term “lead-lined tank” means a water reservoir container in a drinking water cooler which container is constructed of lead or which has an interior surface which is not lead free.

(July 1, 1944, ch. 373, title XIV, § 1461, as added Pub. L. 100-572, § 2(a), Oct. 31, 1988, 102 Stat. 2884; amended Pub. L. 103-382, title III, § 391(p), Oct. 20, 1994, 108 Stat. 4024; Pub. L. 104-182, title V, § 501(f)(7), Aug. 6, 1996, 110 Stat. 1692; Pub. L. 107-110, title X, § 1076(x), Jan. 8, 2002, 115 Stat. 2093.)

REFERENCES IN TEXT

The Defense Dependent’s Education Act of 1978, referred to in par. (3)(C), probably means the Defense Dependents’ Education Act of 1978, title XIV of Pub. L. 95-561, Nov. 1, 1978, 92 Stat. 2365, as amended, which is classified principally to chapter 25A (§ 921 et seq.) of Title 20, Education. For complete classification of this Act to the Code, see Short Title note set out under section 921 of Title 20 and Tables.

AMENDMENTS

2002—Pars. (3)(A), (6). Pub. L. 107-110 substituted “section 7801 of title 20” for “section 8801 of title 20”.

1996—Pub. L. 104-182 made technical amendment to section catchline and first word of text.

1994—Par. (3)(A). Pub. L. 103-382, § 391(p)(1), substituted “section 8801 of title 20” for “section 198 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 3381)”.
