SUBCHAPTER I—GENERAL PROVISIONS

§ 8201. Findings and statement of purposes

(a) Findings

The Congress finds that—

(1) the United States has survived a period of energy shortage and has made significant progress toward improving energy efficiency in all sectors of the economy;

(2) effective measures must continue to be taken by the Federal Government and other users and suppliers of energy to control the rate of growth of demand for energy and the efficiency of its use;

(3) the continuation of this effort will permit the United States to become increasingly independent of the world oil market, less vulnerable to interruption of foreign oil supplies, and more able to provide energy to meet future needs; and

(4) all sectors of the economy of the United States should continue to reduce significantly the demand for nonrenewable energy resources such as oil and natural gas by implementing and maintaining effective conservation measures for the efficient use of these and other energy sources.

(b) Statement of purposes

The purposes of this chapter are to provide for the regulation of interstate commerce, to reduce the growth in demand for energy in the United States, and to conserve nonrenewable energy resources produced in this Nation and elsewhere, without inhibiting beneficial economic growth.

AMENDMENTS

1986—Subsec. (a). Pub. L. 99-412 amended subsec. (a) generally. Prior to amendment, subsec. (a) read as follows: “The Congress finds that—

“(1) the United States faces an energy shortage arising from increasing demand for energy, particularly for oil and natural gas, and insufficient domestic supplies of oil and natural gas to satisfy that demand;

“(2) unless effective measures are promptly taken by the Federal Government and other users of energy to reduce the rate of growth of demand for energy, the United States will become increasingly dependent on the world oil market, increasingly vulnerable to interruptions of foreign oil supplies, and unable to provide the energy to meet future needs; and

“(3) all sectors of our Nation’s economy must begin immediately to significantly reduce the demand for nonrenewable energy resources such as oil and natu-

ral gas by implementing and maintaining effective conservation measures for the efficient use of these and other energy sources.”

PART B—MISCELLANEOUS

§ 8231. Grants for energy conserving improvements; establishment of standards; authorization of appropriations

(1) The Secretary of Housing and Urban Development is authorized to make grants to finance energy conserving improvements (as defined in subparagraph (2) of the last paragraph of section 1703(a) of title 12) to projects which are financed with loans under section 1701q of title 12, or which are subject to mortgages insured under section 1715(d)(3) or section 1715z-1 of title 12. The Secretary shall make assistance available under this section on a priority basis to those projects which are in financial difficulty as a result of high energy costs. In carrying out the program authorized by this section, the Secretary shall issue regulations requiring that any grant made under this section shall be made only on the condition that the recipient of such
