

§ 2224. Recommendations**(a) Approval**

The Secretary shall submit each plan prepared pursuant to section 2222 of this title to the Congress, together with the Secretary's recommendations, including recommendations for authorizing legislation, if needed.

(b) Pacific Northwest region

A contingency plan under subsection (a) of this section for the State of Washington, Oregon, Idaho, or Montana, may be approved by the Secretary only at the request of the Governor of the affected State in coordination with the other States in the region and the Administrator of the Bonneville Power Administration.

(Pub. L. 102-250, title II, §204, Mar. 5, 1992, 106 Stat. 57.)

§ 2225. Reclamation Drought Response Fund

The Secretary shall undertake a study of the need, if any, to establish a Reclamation Drought Response Fund to be available for defraying those expenses which the Secretary determines necessary to implement plans prepared under section 2222 of this title and to make loans for nonstructural and minor structural activities for the prevention or mitigation of the adverse effects of drought.

(Pub. L. 102-250, title II, §205, Mar. 5, 1992, 106 Stat. 58.)

§ 2226. Technical assistance and transfer of precipitation management technology**(a) Technical assistance**

The Secretary is authorized to provide technical assistance for drought contingency planning in any of the States not identified in section 391 of this title, and the District of Columbia, Puerto Rico, the Republic of the Marshall Islands, the Federated States of Micronesia, the Trust Territory of the Pacific Islands, and upon termination of the Trusteeship, the Republic of Palau, the United States Virgin Islands, American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands.

(b) Technology Transfer Program

The Secretary is authorized to conduct a Precipitation Management Technology Transfer Program to help alleviate problems caused by precipitation variability and droughts in the West, as part of a balanced long-term water resources development and management program. In consultation with State, tribal, and local water, hydropower, water quality and instream flow interests, areas shall be selected for conducting field studies cost-shared on a 50-50 basis to validate and quantify the potential for appropriate precipitation management technology to augment stream flows. Validated technologies shall be transferred to non-Federal interests for operational implementation.

§ 2242. Authority of Secretary

The Secretary is authorized to perform any and all acts and to promulgate such regulations as may be necessary and appropriate for the purpose of implementing this chapter. In carrying out the authorities under this chapter, the Secretary shall give specific consideration to the needs of fish and wildlife, together with other project purposes, and shall consider temporary operational changes which will mitigate, or can be expected to have an effect in mitigating, fish and wildlife losses and damages resulting from drought conditions, consistent with the Secretary's other obligations.

(Pub. L. 102-250, title III, §302, Mar. 5, 1992, 106 Stat. 58.)

§ 2243. Temperature control at Shasta Dam, Central Valley Project

The Secretary is authorized to complete the design and specifications for construction of a device to control the temperature of water releases from Shasta Dam, Central Valley Project, California, and to construct facilities needed to attach such device to the dam. There is authorized to be appropriated to carry out the authority of this section not more than \$12,000,000.

(Pub. L. 102-250, title III, §303, Mar. 5, 1992, 106 Stat. 58.)

§ 2244. Effect of chapter on other laws

(a) Conformity with State and Federal law

All actions taken pursuant to this chapter pertaining to the diversion, storage, use, or transfer of water shall be in conformity with applicable State and applicable Federal law.

(b) Effect on jurisdiction, authority, and water rights

Nothing in this chapter shall be construed as expanding or diminishing State, Federal, or tribal jurisdiction or authority over water resources development, control, or water rights.

(Pub. L. 102-250, title III, §304, Mar. 5, 1992, 106 Stat. 59.)

§ 2245. Excess storage and carrying capacity

The Secretary is authorized to enter into contracts with municipalities, public water districts and agencies, other Federal agencies, State agencies, and private entities, pursuant to the Act of February 21, 1911 (43 U.S.C. 523), for the impounding, storage, and carriage of non-project water for domestic, municipal, fish and wildlife, industrial, and other beneficial purposes using any facilities associated with the Central Valley Project, Cachuma Project, and the Ventura River Project, California, the Truckee Storage Project, and the Washoe Project, California and Nevada. The Secretary is further authorized to enter into contracts for the exchange of water for the aforementioned purposes using facilities associated with the Cachuma Project, California.

CHAPTER 41—FEDERAL LAND TRANSACTION FACILITATION

Sec.	
2301.	Findings.
2302.	Definitions.
2303.	Identification of inholdings.
2304.	Disposal of public land.
2305.	Federal Land Disposal Account.
2306.	Special provisions.

§ 2301. Findings

Congress finds that—

(1) the Bureau of Land Management has authority under the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.) to sell land identified for disposal under its land use planning;

(2) the Bureau of Land Management has authority under that Act to exchange Federal land for non-Federal land if the exchange would be in the public interest;

(3) through land use planning under that Act, the Bureau of Land Management has identified certain tracts of public land for disposal;

(4) the Federal land management agencies of the Departments of the Interior and Agriculture have authority under existing law to acquire land consistent with the mission of each agency;

(5) the sale or exchange of land identified for disposal and the acquisition of certain non-Federal land from willing landowners would—

(A) allow for the reconfiguration of land ownership patterns to better facilitate resource management;

(B) contribute to administrative efficiency within Federal land management units; and

(C) allow for increased effectiveness of the allocation of fiscal and human resources within the Federal land management agencies;

(6) a more expeditious process for disposal and acquisition of land, established to facilitate a more effective configuration of land ownership patterns, would benefit the public interest;

(7) many private individuals own land within the boundaries of Federal land management units and desire to sell the land to the Federal Government;

(8) such land lies within national parks, national monuments, national wildlife refuges, national forests, and other areas designated for special management;

(9) Federal land management agencies are facing increased workloads from rapidly growing public demand for the use of public land, making it difficult for Federal managers to address problems created by the existence of inholdings in many areas;

(10) in many cases, inholders and the Federal Government would mutually benefit from Federal acquisition of the land on a priority basis;

(11) proceeds generated from the disposal of public land may be properly dedicated to the acquisition of inholdings and other land that will improve the resource management ability of the Federal land management agencies and adjoining landowners;

(12) using proceeds generated from the disposal of public land to purchase inholdings and other such land from willing sellers would enhance the ability of the Federal land management agencies to—

(A) work cooperatively with private landowners and State and local governments; and

(B) promote consolidation of the ownership of public and private land in a manner that would allow for better overall resource management;

(13) in certain locations, the sale of public land that has been identified for disposal is
