§ 2901. Congressional findings and declaration of purpose

(a) Findings

The Congress finds and declares the following:

(1) Fish and wildlife are of ecological, educational, esthetic, cultural, recreational, economic, and scientific value to the Nation.

(2) The improved conservation and management of fish and wildlife, particularly nongame fish and wildlife, will assist in restoring and maintaining fish and wildlife and in assuring a productive and more esthetically pleasing environment for all citizens.

(3) Many citizens, particularly those residing in urban areas, have insufficient opportunity to participate in recreational and other programs designed to foster human interaction with fish and wildlife and thereby are unable to have a greater appreciation and awareness of the environment.

(4) Historically, fish and wildlife conservation programs have been focused on the more recreationally and commercially important species within any particular ecosystem. As a consequence such programs have been largely financed by hunting and fishing license revenues or excise taxes on certain hunting and fishing equipment. These traditional financing mechanisms are neither adequate nor fully appropriate to meet the conservation needs of nongame fish and wildlife.

(5) Each State should be encouraged to develop, revise, and implement, in consultation with appropriate Federal, State, and local and regional agencies, a plan for the conservation of fish and wildlife, particularly those species which are indigenous to the State.

(b) Purpose

It is the purpose of this chapter—

(1) to provide financial and technical assistance to the States for the development, revision, and implementation of conservation plans and programs for nongame fish and wildlife; and

(2) to encourage all Federal departments and agencies to utilize their statutory and administrative authority, to the maximum extent practicable and consistent with each agency's statutory responsibilities, to conserve and to promote conservation of nongame fish and wildlife and their habitats, in furtherance of the provisions of this chapter.

SHORT TITLE

Pub. L. 96-366, §1, Sept. 29, 1980, 94 Stat. 1322, provided: “That this Act [enacting this chapter] may be cited as the ‘Fish and Wildlife Conservation Act of 1980.’”

§ 2902. Definitions

As used in this chapter—

(1) The term “approved conservation plan” means the conservation plan of a State approved by the Secretary pursuant to section 2904(a) of this title.

(2) The term “conservation plan” means a plan developed by a State for the conservation of fish and wildlife which meets the requirements set forth in section 2903 of this title.

(3) The terms “conserve”, “conserving”, and “conservation” mean to use, and the use of, such methods and procedures which are necessary to ensure, to the maximum extent practicable, the well being and enhancement of fish and wildlife and their habitats for the ecological, educational, esthetic, cultural, recreational, and scientific enrichment of the public. Such methods and procedures may include, but are not limited to, any activity associated with scientific resources management, such as research, census, law enforcement, habitat acquisition, maintenance, development, information, education, population manipulation, propagation, technical assistance to private landowners, live trapping, and transplantation.

If any State has placed such authority in more than one agency, such term means each such agency acting with respect to its assigned responsibilities but such agencies, for purposes of this chapter, shall submit a single conservation plan.

(5) The term “fish and wildlife” means wild vertebrate animals that are in an unconfined state, including, but not limited to, nongame fish and wildlife.

(6) The term “nongame fish and wildlife” means wild vertebrate animals that are in an unconfined state and that—

(4) identify the significant problems which may adversely affect the plan species and their significant habitats;

(5) determine those actions which should be taken to conserve the plan species and their significant habitats;

(6) establish priorities for implementing the conservation actions determined under paragraph (5);

(7) provide for the monitoring, on a regular basis, of the plan species and the effectiveness of the conservation actions determined under paragraph (5);
