REDUCTION OF POSTHARVEST LOSSES OF FOOD

Pub. L. 96-533, title III, §317, Dec. 16, 1980, 94 Stat. 3149, provided: "It is the sense of the Congress that—

"(1) the President should reaffirm the policy of the United States Government to support the goal established by the United Nations General Assembly of reducing by 50 percent postharvest losses of food in developing countries; and

"(2) the President, acting through the Agency for International Development, should increase substantially the proportion of funds made available under the Foreign Assistance Act of 1961 [see Short Title note set out under section 2151 of this title] for the purpose of assisting, together with other donor countries and with developing countries, in the reduction of postharvest losses of food in developing countries."

§ 2151a-1. Agricultural research

Agricultural research carried out under this chapter shall (1) take account of the special needs of small farmers in the determination of research priorities, (2) include research on the interrelationships among technology, institutions, and economic, social, environmental, and cultural factors affecting small-farm agriculture, and (3) make extensive use of field testing to adapt basic research to local conditions. Special emphasis shall be placed on disseminating research results to the farms on which they can be put to use, and especially on institutional and other arrangements needed to assure that small farmers have effective access to both new and existing improved technology.

(Pub. L. 87-195, pt. I, §103A, as added Pub. L. 94-161, title III, §303, Dec. 20, 1975, 89 Stat. 857; amended Pub. L. 95-424, title I, §103(d), Oct. 6, 1978, 92 Stat. 945.)

REFERENCES IN TEXT

This chapter, referred to in text, was in the original "this Act", meaning Pub. L. 87-195, Sept. 4, 1961, 75 Stat. 424, as amended, known as the Foreign Assistance Act of 1961. For complete classification of this Act to the Code, see Short Title note set out under section 2151 of this title and Tables.

AMENDMENTS

1978—Pub. L. 95-424 inserted "environmental" after "social" in cl. 2.

EFFECTIVE DATE OF 1978 AMENDMENT

Amendment by Pub. L. 95-424 effective Oct. 1, 1978, see section 605 of Pub. L. 95-424, set out as a note under section 2151 of this title.

§ 2151b. Population planning and health programs

(a) Congressional declaration of policy

The Congress recognizes that poor health conditions and uncontrolled population growth can vitiate otherwise successful development efforts.

Large families in developing countries are the result of complex social and economic factors which change relatively slowly among the poor majority least affected by economic progress, as well as the result of a lack of effective birth control. Therefore, effective family planning depends upon economic and social change as well as the delivery of services and is often a matter

of political and religious sensitivity. While every country has the right to determine its own policies with respect to population growth, voluntary population planning programs can make a substantial contribution to economic development, higher living standards, and improved health and nutrition.

Good health conditions are a principal element in improved quality of life and contribute to the individual's capacity to participate in the development process, while poor health and debilitating disease can limit productivity.

(b) Assistance for voluntary population planning

In order to increase the opportunities and motivation for family planning and to reduce the rate of population growth, the President is authorized to furnish assistance, on such terms and conditions as he may determine, for voluntary population planning. In addition to the provision of family planning information and services, including also information and services which relate to and support natural family planning methods, and the conduct of directly relevant demographic research, population planning programs shall emphasize motivation for small families.

(c) Assistance for health programs; special health needs of children and mothers; Child Survival Fund; promotion of immunization and oral rehydration; control of AIDS and tuberculosis

(1) In order to contribute to improvements in the health of the greatest number of poor people in developing countries, the President is authorized to furnish assistance, on such terms and conditions as he may determine, for health programs. Assistance under this subsection shall be used primarily for basic integrated health services, safe water and sanitation, disease prevention and control, and related health planning and research. This assistance shall emphasize self-sustaining community-based health programs by means such as training of health auxiliary and other appropriate personnel, support for the establishment and evaluation of projects that can be replicated on a broader scale, measures to improve management of health programs, and other services and supplies to support health and disease prevention programs.

(2)(A) In carrying out the purposes of this subsection, the President shall promote, encourage, and undertake activities designed to deal directly with the special health needs of children and mothers. Such activities should utilize simple, available technologies which can significantly reduce childhood mortality, such as improved and expanded immunization programs, oral rehydration to combat diarrhoeal diseases, and education programs aimed at improving nutrition and sanitation and at promoting child spacing. In carrying out this paragraph, guidance shall be sought from knowledgeable health professionals from outside the agency primarily responsible for administering subchapter I of this chapter. In addition to government-to-government programs, activities pursuant to this paragraph should include support for appropriate activities of the types described in this paragraph which are carried out by international organizations (which may include
