§ 716. Final system plan

(a) Goals

The final system plan shall be formulated in such a way as to effectuate the following goals:

(1) the creation, through a process of reorganization, of a financially self-sustaining rail and express service system in the region;

(2) the establishment and maintenance of a rail service system adequate to meet the rail transportation needs and service requirements of the region;

(3) the establishment of improved high-speed rail passenger service, consonant with the recommendations of the Secretary in his report of September 1971, entitled "Recommendations for Northeast Corridor Transportation";

(4) the preservation, to the extent consistent with other goals, of existing patterns of service by railroads (including short-line and terminal railroads), and of existing railroad trackage in areas in which fossil fuel natural resources are located, and the utilization of those modes of transportation in the region which require the smallest amount of scarce energy resources and which can most efficiently transport energy resources;

(5) the retention and promotion of competition in the provision of rail and other transportation services in the region;

(6) the attainment and maintenance of any environmental standards, particularly the applicable national ambient air quality standards and plans established under the Clean Air Act Amendments of 1970, taking into consideration the environmental impact of alternative choices of action;

(7) the movement of passengers and freight in rail transportation in the region in the most efficient manner consistent with safe operation, including the requirements of commuter and intercity rail passenger service; the extent to which there should be coordination with the National Railroad Passenger Corporation and similar entities; and the identification of all short-to-medium distance corridors in densely populated areas in which the major upgrading of rail lines for high-speed passenger operation would return substantial public benefits; and

(8) the minimization of job losses and associated increases in unemployment and community benefit costs in areas in the region presently served by rail service.

(b) Factors

The final system plan shall be based upon due consideration of all factors relevant to the realization of the goals set forth in subsection (a) of this section. Such factors include the need for and the cost of rehabilitation and modernization of track, equipment, and other facilities; methods of achieving economies in the cost of rail operations in the region; means of achieving rationalization of rail services and the rail service system in the region; marketing studies; the impact on railroad employees; consumer needs; traffic analyses; financial studies; and any other factors identified by the Association under section 712(b)¹ of this title or in the report of the Secretary required under section 714(a) of this title.

(c) Designations

The final system plan shall designate—

(1) which rail properties of railroads in reorganization in the region or of railroads leased, operated, or controlled by any railroad in reorganization in the region—

(A) shall be transferred to the Corporation: *Provided*, That the Corporation shall, within 95 days after the effective date of the final system plan, give notice to the Association of which such rail properties, if any, are to be transferred to a subsidiary of the Corporation in the event that the Board of Directors of the Association finds that such transfer would be consistent with the final system plan;

(B) shall be offered for sale to a profitable railroad operating in the region and, if such offer is accepted, operated by such railroad; the plan shall designate what additions shall be made to the designation under subparagraph (A) of this paragraph and what alternative designations shall be made under this paragraph in the event such profitable railroad fails to accept such offer;

(C) shall be purchased, leased, or otherwise acquired from the Corporation by the National Railroad Passenger Corporation in accordance with the exercise of its option under section 791(d) of this title for improvement to achieve the goal set forth in subsection (a)(3) of this section;

(D) may be purchased or leased from the Corporation by (i) a State or a local or regional transportation authority to meet the needs of commuter and intercity rail passenger service, or (ii) the National Railroad Passenger Corporation to meet the needs of improved rail passenger service over intercity routes, other than properties designated pursuant to subparagraph (C) of this paragraph; and

(E) if not otherwise required to be operated by the Corporation, a government entity, or a responsible person, are suitable for use for other public purposes, including highways, other forms of transportation, conservation, energy transmission, education or health care facilities, or recreation. In carrying out this subparagraph, the Association shall solicit the views and rec-
