§ 1492. Energy resources of Caribbean and Pacific insular areas

(a) Congressional findings

The Congress finds that—

(1) the Caribbean and Pacific insular areas of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Federated States of Micronesia, the Marshall Islands, and Palau are virtually completely dependent on imported sources of energy;

(2) the dependence of such areas on imported sources of energy coupled with the increasing cost and the uncertain availability and supply of such sources of energy will continue to frustrate the political, social, and economic development of such areas by placing increasingly severe fiscal burdens on the local governments of these areas;

(3) these insular areas are endowed with a variety of renewable sources of energy which, if developed, would alleviate their dependence on imported sources of energy, relieve the fiscal burden on local governments imposed by the costs of imported fuel, and strengthen the base for political, social, and economic development;

(4) appropriate technologies are presently available to develop the renewable energy resources of these insular areas but that comprehensive energy plans have not been adequately developed to meet the energy demands of these areas from renewable energy resources;

(5) electric power transmission and distribution lines in insular areas are inadequate to withstand damage caused by the hurricanes and typhoons which frequently occur in insular areas and such damage often costs millions of dollars to repair; and

(6) the refinement of renewable energy technologies since the publication of the 1982 Territorial Energy Assessment prepared pursuant to subsection (c) of this section reveals the need to reassess the state of energy production, consumption, infrastructure, reliance on imported energy, opportunities for energy conservation and increased energy efficiency, and indigenous sources in regard to the insular areas.

(b) Congressional declaration of policy

The Congress declares that it is the policy of the Federal Government to—

(1) develop the renewable energy resources of the Caribbean and Pacific insular areas of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Federated States of Micronesia, the Marshall Islands, and Palau; and
