Page 216

stipulation from the opposing party) to serve a larger number. Parties cannot evade this presumptive limitation through the device of joining as "subparts" questions that seek information about discrete separate subjects. However, a question asking about communications of a particular type should be treated as a single interrogatory even though it requests that the time, place, persons present, and contents be stated separately for each such communication.

As with the number of depositions authorized by Rule 30, leave to serve additional interrogatories is to be allowed when consistent with Rule 26(b)(2). The aim is not to prevent needed discovery, but to provide judicial scrutiny before parties make potentially excessive use of this discovery device. In many cases it will be appropriate for the court to permit a larger number of interrogatories in the scheduling order entered under Rule 16(b).

Unless leave of court is obtained, interrogatories may not be served prior to the meeting of the parties under Rule 26(f).

When a case with outstanding interrogatories exceeding the number permitted by this rule is removed to federal court, the interrogating party must seek leave allowing the additional interrogatories, specify which twenty-five are to be answered, or resubmit interrogatories that comply with the rule. Moreover, under Rule 26(d), the time for response would be measured from the date of the parties' meeting under Rule 26(f). See Rule 81(c), providing that these rules govern procedures after removal.

Subdivision (b). A separate subdivision is made of the former second paragraph of subdivision (a). Language is added to paragraph (1) of this subdivision to emphasize the duty of the responding party to provide full answers to the extent not objectionable. If, for example, an interrogatory seeking information about numerous facilities or products is deemed objectionable, but an interrogatory seeking information about a lesser number of facilities or products would not have been objectionable, the interrogatory should be answered with respect to the latter even though an objection is raised as to the balance of the facilities or products. Similarly, the fact that additional time may be needed to respond to some questions (or to some aspects of questions) should not justify a delay in responding to those questions (or other aspects of questions) that can be answered within the prescribed time.

Paragraph (4) is added to make clear that objections must be specifically justified, and that unstated or untimely grounds for objection ordinarily are waived. Note also the provisions of revised Rule 26(b)(5), which require a responding party to indicate when it is withholding information under a claim of privilege or as trial preparation materials.

These provisions should be read in light of Rule 26(g), authorizing the court to impose sanctions on a party and attorney making an unfounded objection to an interrogatory.

Subdivisions (c) and (d). The provisions of former subdivisions (b) and (c) are renumbered.

### COMMITTEE NOTES ON RULES-2006 AMENDMENT

Rule 33(d) is amended to parallel Rule 34(a) by recognizing the importance of electronically stored information. The term "electronically stored information" has the same broad meaning in Rule 33(d) as in Rule 34(a). Much business information is stored only in electronic form; the Rule 33(d) option should be available with respect to such records as well.

Special difficulties may arise in using electronically stored information, either due to its form or because it is dependent on a particular computer system. Rule 33(d) allows a responding party to substitute access to documents or electronically stored information for an answer only if the burden of deriving the answer will be substantially the same for either party. Rule 33(d) states that a party electing to respond to an interrogatory by providing electronically stored information must ensure that the interrogating party can locate and identify it "as readily as can the party served," and that the responding party must give the interrogating party a "reasonable opportunity to examine, audit, or inspect" the information. Depending on the circumstances, satisfying these provisions with regard to electronically stored information may require the responding party to provide some combination of technical support, information on application software, or other assistance. The key question is whether such support enables the interrogating party to derive or ascertain the answer from the electronically stored information as readily as the responding party. A party that wishes to invoke Rule 33(d) by specifying electronically stored information may be required to provide direct access to its electronic information system, but only if that is necessary to afford the requesting party an adequate opportunity to derive or ascertain the answer to the interrogatory. In that situation, the responding party's need to protect sensitive interests of confidentiality or privacy may mean that it must derive or ascertain and provide the answer itself rather than invoke Rule 33(d).

Changes Made after Publication and Comment. No changes are made to the rule text. The Committee Note is changed to reflect the sensitivities that limit direct access by a requesting party to a responding party's information system. If direct access to the responding party is system is the only way to enable a requesting party to locate and identify the records from which the answer may be ascertained, the responding party may choose to derive or ascertain the answer itself.

#### Committee Notes on Rules—2007 Amendment

The language of Rule 33 has been amended as part of the general restyling of the Civil Rules to make them more easily understood and to make style and terminology consistent throughout the rules. These changes are intended to be stylistic only.

The final sentence of former Rule 33(a) was a redundant cross-reference to the discovery moratorium provisions of Rule 26(d). Rule 26(d) is now familiar, obviating any need to carry forward the redundant cross-reference.

Former Rule 33(b)(5) was a redundant reminder of Rule 37(a) procedure and is omitted as no longer useful.

Former Rule 33(c) stated that an interrogatory "is not necessarily objectionable merely because an answer \* \* involves an opinion or contention \* \* ." "[I]s not necessarily" seemed to imply that the interrogatory might be objectionable merely for this reason. This implication has been ignored in practice. Opinion and contention interrogatories are used routinely. Amended Rule 33(a)(2) embodies the current meaning of Rule 33 by omitting "necessarily."

*Changes Made After Publication and Comment.* See Note to Rule 1, supra.

#### References in Text

The Federal Rules of Evidence, referred to in subd. (c), are set out in this Appendix.

## Rule 34. Producing Documents, Electronically Stored Information, and Tangible Things, or Entering onto Land, for Inspection and Other Purposes

(a) IN GENERAL. A party may serve on any other party a request within the scope of Rule 26(b):

(1) to produce and permit the requesting party or its representative to inspect, copy, test, or sample the following items in the responding party's possession, custody, or control:

(A) any designated documents or electronically stored information—including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations—stored in any medium from which information can be obtained either directly or, if necessary, after translation by the responding party into a reasonably usable form; or

(B) any designated tangible things; or

(2) to permit entry onto designated land or other property possessed or controlled by the responding party, so that the requesting party may inspect, measure, survey, photograph, test, or sample the property or any designated object or operation on it.

### (b) PROCEDURE.

(1) Contents of the Request. The request:

(A) must describe with reasonable particularity each item or category of items to be inspected;

(B) must specify a reasonable time, place, and manner for the inspection and for performing the related acts; and

(C) may specify the form or forms in which electronically stored information is to be produced.

(2) Responses and Objections.

(A) *Time to Respond.* The party to whom the request is directed must respond in writing within 30 days after being served. A shorter or longer time may be stipulated to under Rule 29 or be ordered by the court.

(B) Responding to Each Item. For each item or category, the response must either state that inspection and related activities will be permitted as requested or state an objection to the request, including the reasons.

(C) *Objections*. An objection to part of a request must specify the part and permit inspection of the rest.

(D) Responding to a Request for Production of Electronically Stored Information. The response may state an objection to a requested form for producing electronically stored information. If the responding party objects to a requested form—or if no form was specified in the request—the party must state the form or forms it intends to use.

(E) Producing the Documents or Electronically Stored Information. Unless otherwise stipulated or ordered by the court, these procedures apply to producing documents or electronically stored information:

(i) A party must produce documents as they are kept in the usual course of business or must organize and label them to correspond to the categories in the request;

(ii) If a request does not specify a form for producing electronically stored information, a party must produce it in a form or forms in which it is ordinarily maintained or in a reasonably usable form or forms; and

(iii) A party need not produce the same electronically stored information in more than one form.

(c) NONPARTIES. As provided in Rule 45, a nonparty may be compelled to produce documents and tangible things or to permit an inspection.

(As amended Dec. 27, 1946, eff. Mar. 19, 1948; Mar. 30, 1970, eff. July 1, 1970; Apr. 29, 1980, eff. Aug.

1, 1980; Mar. 2, 1987, eff. Aug. 1, 1987; Apr. 30, 1991, eff. Dec. 1, 1991; Apr. 22, 1993, eff. Dec. 1, 1993; Apr. 12, 2006, eff. Dec. 1, 2006; Apr. 30, 2007, eff. Dec. 1, 2007.)

# NOTES OF ADVISORY COMMITTEE ON RULES-1937

In England orders are made for the inspection of documents, English Rules Under the Judicature Act (The Annual Practice, 1937) O. 31, r.r. 14, et seq., or for the inspection of tangible property or for entry upon land, O. 50, r.3. Michigan provides for inspection of damaged property when such damage is the ground of the action. Mich.Court Rules Ann. (Searl, 1933) Rule 41, §2.

Practically all states have statutes authorizing the court to order parties in possession or control of documents to permit other parties to inspect and copy them before trial. See Ragland, *Discovery Before Trial* (1932), Appendix, p. 267, setting out the statutes.

Compare [former] Equity Rule 58 (Discovery—Interrogatories—Inspection and Production of Documents— Admission of Execution or Genuineness) (fifth paragraph).

#### Notes of Advisory Committee on Rules—1946 Amendment

The changes in clauses (1) and (2) correlate the scope of inquiry permitted under Rule 34 with that provided in Rule 26(b), and thus remove any ambiguity created by the former differences in language. As stated in Olson Transportation Co. v. Socony-Vacuum Oil Co. (E.D.Wis. 1944) 8 Fed.Rules Serv. 34.41, Case 2, "... Rule 34 is a direct and simple method of discovery." At the same time the addition of the words following the term "parties" makes certain that the person in whose custody, possession, or control the evidence reposes may have the benefit of the applicable protective orders stated in Rule 30(b). This change should be considered in the light of the proposed expansion of Rule 30(b).

An objection has been made that the word "designated" in Rule 34 has been construed with undue strictness in some district court cases so as to require great and impracticable specificity in the description of documents, papers, books, etc., sought to be in-spected. The Committee, however, believes that no amendment is needed, and that the proper meaning of "designated" as requiring specificity has already been delineated by the Supreme Court. See Brown v. United States (1928) 276 U.S. 134, 143 ("The subpoena . . . specifies . . . with reasonable particularity the subjects to  $% \mathcal{A} = \mathcal{A} = \mathcal{A}$ which the documents called for related."); Consolidated Rendering Co. v. Vermont (1908) 207 U.S. 541, 543-544 ("We see no reason why all such books, papers and correspondence which related to the subject of inquiry, and were described with reasonable detail, should not be called for and the company directed to produce them. Otherwise, the State would be compelled to designate each particular paper which it desired, which presupposes an accurate knowledge of such papers, which the tribunal desiring the papers would probably rarely, if ever, have.").

### Notes of Advisory Committee on Rules—1970 Amendment

Rule 34 is revised to accomplish the following major changes in the existing rule: (1) to eliminate the requirement of good cause; (2) to have the rule operate extrajudicially; (3) to include testing and sampling as well as inspecting or photographing tangible things; and (4) to make clear that the rule does not preclude an independent action for analogous discovery against persons not parties.

Subdivision (a). Good cause is eliminated because it has furnished an uncertain and erratic protection to the parties from whom production is sought and is now rendered unnecessary by virtue of the more specific provisions added to Rule 26(b) relating to materials assembled in preparation for trial and to experts retained or consulted by parties.

The good cause requirement was originally inserted in Rule 34 as a general protective provision in the absence of experience with the specific problems that would arise thereunder. As the note to Rule 26(b)(3) on trial preparation materials makes clear, good cause has been applied differently to varying classes of documents, though not without confusion. It has often been said in court opinions that good cause requires a consideration of need for the materials and of alternative means of obtaining them, *i.e.*, something more than relevance and lack of privilege. But the overwhelming proportion of the cases in which the formula of good cause has been applied to require a special showing are those involving trial preparation. In practice, the courts have not treated documents as having a special immunity to discovery simply because of their being documents. Protection may be afforded to claims of privacy or secrecy or of undue burden or expense under what is now Rule 26(c) (previously Rule 30(b)). To be sure, an appraisal of "undue" burden inevitably entails consideration of the needs of the party seeking discovery. With special provisions added to govern trial preparation materials and experts, there is no longer any occasion to retain the requirement of good cause. The revision of Rule 34 to have it operate extra-

The revision of Rule 34 to have it operate extrajudicially, rather than by court order, is to a large extent a reflection of existing law office practice. The Columbia Survey shows that of the litigants seeking inspection of documents or things, only about 25 percent filed motions for court orders. This minor fraction nevertheless accounted for a significant number of motions. About half of these motions were uncontested and in almost all instances the party seeking production ultimately prevailed. Although an extrajudicial procedure will not drastically alter existing practice under Rule 34—it will conform to it in most cases—it has the potential of saving court time in a substantial though proportionately small number of cases tried annually.

The inclusion of testing and sampling of tangible things and objects or operations on land reflects a need frequently encountered by parties in preparation for trial. If the operation of a particular machine is the basis of a claim for negligent injury, it will often be necessary to test its operating parts or to sample and test the products it is producing. Cf. Mich.Gen.Ct.R. 310.1(1) (1963) (testing authorized).

The inclusive description of "documents" is revised to accord with changing technology. It makes clear that Rule 34 applies to electronic data compilations from which information can be obtained only with the use of detection devices, and that when the data can as a practical matter be made usable by the discovering party only through respondent's devices, respondent may be required to use his devices to translate the data into usable form. In many instances, this means that respondent will have to supply a print-out of computer data. The burden thus placed on respondent will vary from case to case, and the courts have ample power under Rule  $26(\ensuremath{\text{c}})$  to protect respondent against undue burden of expense, either by restricting discovery or requiring that the discovering party pay costs. Similarly, if the discovering party needs to check the electronic source itself, the court may protect respondent with respect to preservation of his records, confidentially of nondiscoverable matters, and costs.

Subdivision (b). The procedure provided in Rule 34 is essentially the same as that in Rule 33, as amended, and the discussion in the note appended to that rule is relevant to Rule 34 as well. Problems peculiar to Rule 34 relate to the specific arrangements that must be worked out for inspection and related acts of copying, photographing, testing, or sampling. The rule provides that a request for inspection shall set forth the items to be inspected either by item or category, describing each with reasonable particularity, and shall specify a reasonable time, place, and manner of making the inspection.

*Subdivision (c).* Rule 34 as revised continues to apply only to parties. Comments from the bar make clear

that in the preparation of cases for trial it is occasionally necessary to enter land or inspect large tangible things in the possession of a person not a party, and that some courts have dismissed independent actions in the nature of bills in equity for such discovery on the ground that Rule 34 is preemptive. While an ideal solution to this problem is to provide for discovery against persons not parties in Rule 34, both the jurisdictional and procedural problems are very complex. For the present, this subdivision makes clear that Rule 34 does not preclude independent actions for discovery against persons not parties.

### Notes of Advisory Committee on Rules—1980 Amendment

Subdivision (b). The Committee is advised that, "It is apparently not rare for parties deliberately to mix critical documents with others in the hope of obscuring significance." Report of the Special Committee for the Study of Discovery Abuse, Section of Litigation of the American Bar Association (1977) 22. The sentence added by this subdivision follows the recommendation of the Report.

#### NOTES OF ADVISORY COMMITTEE ON RULES—1987 AMENDMENT

The amendment is technical. No substantive change is intended.

#### NOTES OF ADVISORY COMMITTEE ON RULES—1991 Amendment

This amendment reflects the change effected by revision of Rule 45 to provide for subpoenas to compel nonparties to produce documents and things and to submit to inspections of premises. The deletion of the text of the former paragraph is not intended to preclude an independent action for production of documents or things or for permission to enter upon land, but such actions may no longer be necessary in light of this revision.

#### NOTES OF ADVISORY COMMITTEE ON RULES—1993 Amendment

The rule is revised to reflect the change made by Rule 26(d), preventing a party from seeking formal discovery prior to the meeting of the parties required by Rule 26(f). Also, like a change made in Rule 33, the rule is modified to make clear that, if a request for production is objectionable only in part, production should be afforded with respect to the unobjectionable portions.

When a case with outstanding requests for production is removed to federal court, the time for response would be measured from the date of the parties' meeting. See Rule 81(c), providing that these rules govern procedures after removal.

### COMMITTEE NOTES ON RULES-2006 AMENDMENT

Subdivision (a). As originally adopted, Rule 34 focused on discovery of "documents" and "things." In 1970, Rule 34(a) was amended to include discovery of data compilations, anticipating that the use of computerized information would increase. Since then, the growth in electronically stored information and in the variety of systems for creating and storing such information has been dramatic. Lawyers and judges interpreted the term "documents" to include electronically stored information because it was obviously improper to allow a party to evade discovery obligations on the basis that the label had not kept pace with changes in information technology. But it has become increasingly difficult to say that all forms of electronically stored information, many dynamic in nature, fit within the traditional concept of a "document." Electroni-cally stored information may exist in dynamic databases and other forms far different from fixed expression on paper. Rule 34(a) is amended to confirm that discovery of electronically stored information stands on equal footing with discovery of paper documents. The change clarifies that Rule 34 applies to information that is fixed in a tangible form and to information that is stored in a medium from which it can be retrieved and examined. At the same time, a Rule 34 request for production of "documents" should be understood to encompass, and the response should include, electronically stored information unless discovery in the action has clearly distinguished between electronically stored information and "documents."

Discoverable information often exists in both paper and electronic form, and the same or similar information might exist in both. The items listed in Rule 34(a) show different ways in which information may be recorded or stored. Images, for example, might be hardcopy documents or electronically stored information. The wide variety of computer systems currently in use, and the rapidity of technological change, counsel against a limiting or precise definition of electronically stored information. Rule 34(a)(1) is expansive and includes any type of information that is stored electronically. A common example often sought in discovery is electronic communications, such as e-mail. The rule covers-either as documents or as electronically stored information—information "stored in any me-dium," to encompass future developments in computer technology. Rule 34(a)(1) is intended to be broad enough to cover all current types of computer-based information, and flexible enough to encompass future changes and developments.

References elsewhere in the rules to "electronically stored information" should be understood to invoke this expansive approach. A companion change is made to Rule 33(d), making it explicit that parties choosing to respond to an interrogatory by permitting access to responsive records may do so by providing access to electronically stored information. More generally, the term used in Rule 34(a)(1) appears in a number of other amendments, such as those to Rules 26(a)(1), 26(b)(2), 26(b)(5)(B), 26(f), 34(b), 37(f), and 45. In each of these rules, electronically stored information has the same broad meaning it has under Rule 34(a)(1). References to 'documents' appear in discovery rules that are not amended, including Rules 30(f), 36(a), and 37(c)(2). These references should be interpreted to include electronically stored information as circumstances warrant.

The term "electronically stored information" is broad, but whether material that falls within this term should be produced, and in what form, are separate questions that must be addressed under Rules 26(b), 26(c), and 34(b).

The Rule 34(a) requirement that, if necessary, a party producing electronically stored information translate it into reasonably usable form does not address the issue of translating from one human language to another. See In re Puerto Rico Elect. Power Auth., 687 F.2d 501, 504-510 (1st Cir. 1989).

Rule 34(a)(1) is also amended to make clear that parties may request an opportunity to test or sample materials sought under the rule in addition to inspecting and copying them. That opportunity may be important for both electronically stored information and hardcopy materials. The current rule is not clear that such testing or sampling is authorized; the amendment expressly permits it. As with any other form of discovery, issues of burden and intrusiveness raised by requests to test or sample can be addressed under Rules 26(b)(2) and 26(c). Inspection or testing of certain types of electronically stored information or of a responding party's electronic information system may raise issues of confidentiality or privacy. The addition of testing and sampling to Rule 34(a) with regard to documents and electronically stored information is not meant to create a routine right of direct access to a party's electronic information system, although such access might be justified in some circumstances. Courts should guard against undue intrusiveness resulting from inspecting or testing such systems.

Rule 34(a)(1) is further amended to make clear that tangible things must—like documents and land sought to be examined—be designated in the request.

Subdivision (b). Rule 34(b) provides that a party must produce documents as they are kept in the usual course of business or must organize and label them to correspond with the categories in the discovery request. The production of electronically stored information should be subject to comparable requirements to protect against deliberate or inadvertent production in ways that raise unnecessary obstacles for the requesting party. Rule 34(b) is amended to ensure similar protection for electronically stored information.

The amendment to Rule 34(b) permits the requesting party to designate the form or forms in which it wants electronically stored information produced. The form of production is more important to the exchange of electronically stored information than of hard-copy materials, although a party might specify hard copy as the requested form. Specification of the desired form or forms may facilitate the orderly, efficient, and cost-effective discovery of electronically stored information. The rule recognizes that different forms of production may be appropriate for different types of electronically stored information. Using current technology, for example, a party might be called upon to produce word processing documents, e-mail messages, electronic spreadsheets, different image or sound files, and material from databases. Requiring that such diverse types of electronically stored information all be produced in the same form could prove impossible, and even if possible could increase the cost and burdens of producing and using the information. The rule therefore provides that the requesting party may ask for different forms of production for different types of electronically stored information.

The rule does not require that the requesting party choose a form or forms of production. The requesting party may not have a preference. In some cases, the requesting party may not know what form the producing party uses to maintain its electronically stored information, although Rule 26(f)(3) is amended to call for discussion of the form of production in the parties' prediscovery conference.

The responding party also is involved in determining the form of production. In the written response to the production request that Rule 34 requires, the responding party must state the form it intends to use for producing electronically stored information if the requesting party does not specify a form or if the responding party objects to a form that the requesting party specifies. Stating the intended form before the production occurs may permit the parties to identify and seek to resolve disputes before the expense and work of the production occurs. A party that responds to a discovery request by simply producing electronically stored information in a form of its choice, without identifying that form in advance of the production in the response required by Rule 34(b), runs a risk that the requesting party can show that the produced form is not reasonably usable and that it is entitled to production of some or all of the information in an additional form. Additional time might be required to permit a responding party to assess the appropriate form or forms of production.

If the requesting party is not satisfied with the form stated by the responding party, or if the responding party has objected to the form specified by the requesting party, the parties must meet and confer under Rule 37(a)(2)(B) in an effort to resolve the matter before the requesting party can file a motion to compel. If they cannot agree and the court resolves the dispute, the court is not limited to the forms initially chosen by the requesting party, stated by the responding party, or specified in this rule for situations in which there is no court order or party agreement.

If the form of production is not specified by party agreement or court order, the responding party must produce electronically stored information either in a form or forms in which it is ordinarily maintained or in a form or forms that are reasonably usable. Rule 34(a) requires that, if necessary, a responding party "translate" information it produces into a "reasonably usable" form. Under some circumstances, the responding party may need to provide some reasonable amount

of technical support, information on application software, or other reasonable assistance to enable the requesting party to use the information. The rule does not require a party to produce electronically stored information in the form it [sic] which it is ordinarily maintained, as long as it is produced in a reasonably usable form. But the option to produce in a reasonably usable form does not mean that a responding party is free to convert electronically stored information from the form in which it is ordinarily maintained to a different form that makes it more difficult or burdensome for the requesting party to use the information effi-ciently in the litigation. If the responding party ordinarily maintains the information it is producing in a way that makes it searchable by electronic means. the information should not be produced in a form that removes or significantly degrades this feature.

Some electronically stored information may be ordinarily maintained in a form that is not reasonably usable by any party. One example is "legacy" data that can be used only by superseded systems. The questions whether a producing party should be required to convert such information to a more usable form, or should be required to produce it at all, should be addressed under Rule 26(b)(2)(B).

Whether or not the requesting party specified the form of production, Rule 34(b) provides that the same electronically stored information ordinarily be produced in only one form.

Changes Made after Publication and Comment. The proposed amendment recommended for approval has been modified from the published version. The sequence of "documents or electronically stored information" is changed to emphasize that the parenthetical exemplifications apply equally to illustrate "documents" and "electronically stored information." The reference to "detection devices" is deleted as redundant with "translated" and as archaic.

The references to the form of production are changed in the rule and Committee Note to refer also to "forms." Different forms may be appropriate or necessary for different sources of information.

The published proposal allowed the requesting party to specify a form for production and recognized that the responding party could object to the requested form. This procedure is now amplified by directing that the responding party state the form or forms it intends to use for production if the request does not specify a form or if the responding party objects to the requested form.

The default forms of production to be used when the parties do not agree on a form and there is no court order are changed in part. As in the published proposal, one default form is "a form or forms in which [electronically stored information] is ordinarily mainy stored information] is orunarily ...... The alternative default form, however, is tained." changed from "an electronically searchable form" "a form or forms that are reasonably usable." "[A]n electronically searchable form" proved to have several defects. Some electronically stored information cannot be searched electronically. In addition, there often are many different levels of electronic searchability-the published default would authorize production in a minimally searchable form even though more easily searched forms might be available at equal or less cost to the responding party. The provision that absent court order a party need

The provision that absent court order a party need not produce the same electronically stored information in more than one form was moved to become a separate item for the sake of emphasis.

The Committee Note was changed to reflect these changes in rule text, and also to clarify many aspects of the published Note. In addition, the Note was expanded to add a caveat to the published amendment that establishes the rule that documents—and now electronically stored information—may be tested and sampled as well as inspected and copied. Fears were expressed that testing and sampling might imply routine direct access to a party's information system. The Note states that direct access is not a routine right, "although such access might be justified in some circumstances."

The changes in the rule text since publication are set out below. [Omitted]

# COMMITTEE NOTES ON RULES-2007 AMENDMENT

The language of Rule 34 has been amended as part of the general restyling of the Civil Rules to make them more easily understood and to make style and terminology consistent throughout the rules. These changes are intended to be stylistic only.

The final sentence in the first paragraph of former Rule 34(b) was a redundant cross-reference to the discovery moratorium provisions of Rule 26(d). Rule 26(d) is now familiar, obviating any need to carry forward the redundant cross-reference.

The redundant reminder of Rule 37(a) procedure in the second paragraph of former Rule 34(b) is omitted as no longer useful.

Changes Made After Publication and Comment. See Note to Rule 1, supra.

# **Rule 35. Physical and Mental Examinations**

(a) Order for an Examination.

(1) In General. The court where the action is pending may order a party whose mental or physical condition—including blood group—is in controversy to submit to a physical or mental examination by a suitably licensed or certified examiner. The court has the same authority to order a party to produce for examination a person who is in its custody or under its legal control.

(2) Motion and Notice; Contents of the Order. The order:

(A) may be made only on motion for good cause and on notice to all parties and the person to be examined; and

(B) must specify the time, place, manner, conditions, and scope of the examination, as well as the person or persons who will perform it.

(b) EXAMINER'S REPORT.

(1) Request by the Party or Person Examined. The party who moved for the examination must, on request, deliver to the requester a copy of the examiner's report, together with like reports of all earlier examinations of the same condition. The request may be made by the party against whom the examination order was issued or by the person examined.

(2) *Contents.* The examiner's report must be in writing and must set out in detail the examiner's findings, including diagnoses, conclusions, and the results of any tests.

(3) Request by the Moving Party. After delivering the reports, the party who moved for the examination may request—and is entitled to receive—from the party against whom the examination order was issued like reports of all earlier or later examinations of the same condition. But those reports need not be delivered by the party with custody or control of the person examined if the party shows that it could not obtain them.

(4) Waiver of Privilege. By requesting and obtaining the examiner's report, or by deposing the examiner, the party examined waives any privilege it may have—in that action or any other action involving the same controversy concerning testimony about all examinations of the same condition.
