

monitor patients' viral loads and immune status;

(E) the status of strategies to promote sustainability of HIV/AIDS pharmaceuticals (including antiretrovirals) and the effects of drug resistance on HIV/AIDS patients; and

(F) the status of appropriate law enforcement officials working to ensure that HIV/AIDS pharmaceutical treatment is not diminished through illegal counterfeiting and black market sales of such pharmaceuticals;

(2) information on existing pilot projects, including a discussion of why a given population was selected, the number of people treated, the cost of treatment, the mechanisms established to ensure that treatment is being administered effectively and safely, and plans for scaling up pilot projects (including projected timelines and required resources); and

(3) an explanation of how those activities relate to efforts to prevent the transmission of the HIV infection.

DELEGATION OF FUNCTIONS

For delegation of functions of President under this section, see Ex. Ord. No. 12163, Sept. 29, 1979, 44 F.R. 56673, as amended, set out as a note under section 2381 of this title, and Memorandum of President of Feb. 23, 2004, 69 F.R. 9509, set out as a note under section 7611 of this title.

§ 7636. Study on illegal diversions of prescription drugs

Not later than 180 days after May 27, 2003, the Secretary of Health and Human Services, in coordination with other agencies, shall submit a report to the Congress that includes the following:

(1) A thorough accounting of evidence indicating illegal diversion into the United States of prescription drugs donated or sold for humanitarian efforts, and an estimate of the extent of such diversion.

(2) Recommendations to increase the administrative and enforcement powers of the United States to identify, monitor, and prevent the illegal diversion into the United States of prescription drugs donated or sold for humanitarian efforts.

(3) Recommendations and guidelines to advise and provide technical assistance to developing countries on how to implement a program that minimizes diversion into the United States of prescription drugs donated or sold for humanitarian efforts.

(Pub. L. 108-25, title III, §307, May 27, 2003, 117 Stat. 740.)

PART B—ASSISTANCE FOR WOMEN, CHILDREN, AND FAMILIES

§ 7651. Findings

Congress makes the following findings:

(1) Approximately 2,000 children around the world are infected each day with HIV through mother-to-child transmission. Transmission can occur during pregnancy, labor, and delivery or through breast feeding. Over 90 percent

of these cases are in developing nations with little or no access to public health facilities.

(2) Mother-to-child transmission is largely preventable with the proper application of pharmaceuticals, therapies, and other public health interventions.

(3) Certain antiretroviral drugs reduce mother-to-child transmission by nearly 50 percent. Universal availability of this drug could prevent up to 400,000 infections per year and dramatically reduce the number of AIDS-related deaths.

(4) At the United Nations Special Session on HIV/AIDS in June 2001, the United States committed to the specific goals with respect to the prevention of mother-to-child transmission, including the goals of reducing the proportion of infants infected with HIV by 20 percent by the year 2005 and by 50 percent by the year 2010, as specified in the Declaration of Commitment on HIV/AIDS adopted by the United Nations General Assembly at the Special Session.

(5) Several United States Government agencies including the United States Agency for International Development and the Centers for Disease Control are already supporting programs to prevent mother-to-child transmission in resource-poor nations and have the capacity to expand these programs rapidly by working closely with foreign governments and nongovernmental organizations.

(6) Efforts to prevent mother-to-child transmission can provide the basis for a broader response that includes care and treatment of mothers, fathers, and other family members who are infected with HIV or living with AIDS.

(7) HIV/AIDS has devastated the lives of countless children and families across the globe. Since the epidemic began, an estimated 13,200,000 children under the age of 15 have been orphaned by AIDS, that is they have lost their mother or both parents to the disease. The Joint United Nations Program on HIV/AIDS (UNAIDS) estimates that this number will double by the year 2010.

(8) HIV/AIDS also targets young people between the ages of 15 to 24, particularly young women, many of whom carry the burden of caring for family members living with HIV/AIDS. An estimated 10,300,000 young people are now living with HIV/AIDS. One-half of all new infections are occurring among this age group.

(Pub. L. 108-25, title III, §311, May 27, 2003, 117 Stat. 740.)

§ 7652. Policy and requirements

(a) Policy

The United States Government's response to the global HIV/AIDS pandemic should place high priority on the prevention of mother-to-child transmission, the care and treatment of family members and caregivers, and the care of children orphaned by AIDS. To the maximum extent possible, the United States Government should seek to leverage its funds by seeking matching contributions from the private sector, other national governments, and international organizations.
