§ 14513. Dual tonnage measurement

(a) On application by the owner and approval by the Secretary, the tonnage of spaces prescribed by the Secretary may be excluded in measuring under this section the gross tonnage of a vessel measured under section 14512 of this title. The spaces prescribed by the Secretary shall be comparable to the spaces that could have been excluded under section 2 of the Act of September 29, 1965 (Public Law 89-219, 79 Stat. 891), as section 2 existed immediately before the enactment of this section.

(b) The Secretary shall prescribe the design, location, and dimensions of the tonnage mark to be placed on a vessel measured under this section.

(c)(1) If a vessel is assigned two sets of gross and net tonnages under this section, each certificate stating the vessel's tonnages shall state the gross and net tonnages when the vessel's tonnage mark is submerged and when it is not submerged.

(2) Except as provided in paragraph (1) of this subsection, a certificate stating a vessel's tonnages may state only one set of gross and net tonnages as assigned under this section.

HISTORICAL AND REVISION NOTES

Revised section 14513

Source: Section (U.S. Code) 46 App. U.S.C. 83 to 83g. Section 14513 gives discretionary authority to the Secretary to exclude certain spaces in measuring the regulatory tonnage of a vessel, and requires the Secretary to prescribe the design, location and dimensions of the tonnage mark to be placed on the vessel. Section 14513 further provides that if spaces are excluded by the Secretary, they shall be comparable to those the Secretary could have excluded in existing law (46 App. U.S.C. 83a). Section 14513(c) provides that if a vessel's tonnage mark is below the uppermost part of the load line mark, each certificate that states the vessel's tonnages must state the gross and net tonnages when the mark is submerged and when it is not submerged.

§ 14514. Reciprocity for foreign vessels

For a foreign vessel not measured under chapter 143, if the Secretary finds that the laws and regulations of a foreign country related to measurement of vessels are substantially similar to those of this chapter and the regulations pre-

scribed under this chapter, the Secretary may accept the measurement and certificate of a vessel of that foreign country as complying with this chapter and the regulations prescribed under this chapter.

SUBCHAPTER III—SIMPLIFIED SYSTEM

HISTORICAL AND REVISION NOTES

This subchapter provides for a simplified regulatory measurement of vessels that are either non-self-propelled, under 79' in length, or operated only for pleasure.

§ 14521. Application

This subchapter applies to a vessel described in section 14501 of this title that is not measured under subchapter II of this chapter.

(Pub. L. 99-509, title V, §5101(3), Oct. 21, 1986, 100 Stat. 1925.)

Revised section 14521

Source: Section (U.S. Code) 46 App. U.S.C. 71.

Section 14521 provides that vessels that are to be measured under the regulatory measurement system in this chapter, but are not measured under the standard regulatory measurement system in subchapter II, shall be measured under the simplified measurement system.

§ 14522. Measurement

(a) In this section, “length” means the horizontal distance of the hull between the foremost part of the stem and the aftermost part of the stern, excluding fittings and attachments.

(b)(1) The Secretary shall assign gross and net tonnages to a vessel based on its length, breadth, depth, other dimensions, and appropriate coefficients.

(2) The Secretary shall prescribe the way dimensions (except length) are measured and which coefficients are appropriate.

(c) The resulting gross tonnages, taken as a group, reasonably shall reflect the relative internal volumes of the vessels measured under this subchapter. The resulting net tonnages shall be in approximately the same ratios to corresponding gross tonnages as are the net and gross tonnages of comparable vessels measured under subchapter II of this chapter.

(d) Under regulations prescribed by the Secretary, the Secretary may determine the gross and net tonnages of a vessel representative of a designated class, model, or type, and then assign those gross and net tonnages to other vessels of the same class, model, or type.

Section 14522(c) provides that the gross tonnages as measured under this section shall reflect the relative internal volumes of vessels. It provides further that the net tonnages measured under this section shall be in approximately the same ratio to corresponding gross tonnages as are the net and gross tonnages of comparable vessels measured under the standard regulatory measurement system.
