§ 3124a. Federal-State partnership and coordination**(a) Covered programs; statement of purposes**

A unique partnership arrangement exists in food and agricultural research, extension, and teaching between the Federal Government and the governments of the several States whereby the States have accepted and have supported, through legislation and appropriations—

(1) research programs under—

(A) the Act of March 2, 1887 (7 U.S.C. 361a et seq.), commonly known as the Hatch Act of 1887;

(B) the Act of October 10, 1962 (16 U.S.C. 582a et seq.), commonly known as the McIntire-Stennis Act of 1962;

(C) subchapter V of this chapter; and

(D) subchapter VI of this chapter;

(2) extension programs under subchapter VI of this chapter and the Act of May 8, 1914 (7 U.S.C. 341 et seq.), commonly known as the Smith-Lever Act;

This partnership in publicly supported agricultural research, extension, and teaching involving the programs of Federal agencies and the programs of the States has played a major role in the outstanding successes achieved in meeting the varied, dispersed, and in many cases, site-specific needs of American agriculture. This partnership must be preserved and enhanced.

(b) Establishment, etc., of cooperative centers

In order to promote research and education in food and human nutrition, the Secretary may establish cooperative human nutrition centers to focus resources, facilities, and scientific expertise on particular high priority nutrition problems identified by the Department. Such centers shall be established at State cooperative institutions; and at other colleges and universities, having a demonstrable capacity to carry out human nutrition research and education.

(c) Designation of State cooperative institutions; reports; research grants

(1) To promote research for purposes of developing agricultural policy alternatives, the Secretary is encouraged—

(A) to designate at least one State cooperative institution to conduct research in an interdisciplinary fashion; and

(B) to report on a regular basis with respect to the effect of emerging technological, economic, sociological, and environmental developments on the structure of agriculture.

(2) Support for this effort should include grants to examine the role of various food production, processing, and distribution systems that may primarily benefit small- and medium-sized family farms, such as diversified farm plans, energy, water, and soil conservation technologies, direct and cooperative marketing, production and processing cooperatives, and rural community resource management.

(d) Designation of State agricultural experiment stations and Agricultural Research Service facilities; pilot projects; additional research
