§ 6801. Findings and declaration of policy**(a) Findings**

Congress finds that—

(1) fresh cut flowers and fresh cut greens are an integral part of life in the United States, are enjoyed by millions of persons every year for a multitude of special purposes (especially important personal events), and contribute a natural and beautiful element to the human environment;

(2)(A) cut flowers and cut greens are produced by many individual producers throughout the United States as well as in other countries, and are handled and marketed by thousands of small-sized and medium-sized businesses; and

(B) the production, handling, and marketing of cut flowers and cut greens constitute a key segment of the United States horticultural industry and thus a significant part of the overall agricultural economy of the United States;

(3) handlers play a vital role in the marketing of cut flowers and cut greens in that handlers—

(A) purchase most of the cut flowers and cut greens marketed by producers;

(B) prepare the cut flowers and cut greens for retail consumption;

(C) serve as an intermediary between the source of the product and the retailer;

(D) otherwise facilitate the entry of cut flowers and cut greens into the current of domestic commerce; and

(E) add efficiencies to the market process that ensure the availability of a much greater variety of the product to retailers and consumers;

(4) it is widely recognized that it is in the public interest and important to the agricultural economy of the United States to provide an adequate, steady supply of cut flowers and cut greens at reasonable prices to the consumers of the United States;

(5)(A) cut flowers and cut greens move in interstate and foreign commerce; and

(B) cut flowers and cut greens that do not move in interstate or foreign channels of commerce but only in intrastate commerce directly affect interstate commerce in cut flowers and cut greens;

(6) the maintenance and expansion of markets in existence on December 14, 1993, and the development of new or improved markets or uses for cut flowers and cut greens, are needed to preserve and strengthen the economic viability of the domestic cut flowers and cut greens industry for the benefit of producers, handlers, retailers, and the entire floral industry;

(7) generic programs of promotion and consumer information can be effective in maintaining and developing markets for cut flowers and cut greens, and have the advantage of equally enhancing the market position for all cut flowers and cut greens;

(8) because cut flowers and cut greens producers are primarily agriculture-oriented rather than promotion-oriented, and because the floral marketing industry within the United States is comprised mainly of small-sized and medium-sized businesses, the development and implementation of an adequate and coordinated national program of generic promotion and consumer information nec-
