

years 1987 and 1988 for provisions authorizing appropriations of \$113,273,000 for each of the fiscal years 1985 and 1986.

§ 4053. Barter arrangements

(a) Report on status of Federal barter programs

The Secretary of Agriculture and the Secretary of Energy shall, not later than 90 days after July 12, 1985, submit to the Congress a report on the status of Federal programs relating to the barter or exchange of commodities owned by the Commodity Credit Corporation for materials and products produced in foreign countries. Such report shall include details of any changes necessary in existing law to allow the Department of Agriculture and, in the case of petroleum resources, the Department of Energy, to implement fully any barter program.

(b) Authorities of President

The President is authorized—

(1) to barter stocks of agricultural commodities acquired by the Government for petroleum and petroleum products, and for other materials vital to the national interest, which are produced abroad, in situations in which sales would otherwise not occur; and

(2) to purchase petroleum and petroleum products, and other materials vital to the national interest, which are produced abroad and acquired by persons in the United States through barter for agricultural commodities produced in and exported from the United States through normal commercial trade channels.

(c) Other provisions of law not affected

In the case of any petroleum, petroleum products, or other materials vital to the national interest, which are acquired under subsection (b), nothing in this section shall be construed to render inapplicable the provisions of any law then in effect which apply to the storage, distribution, or use of such petroleum, petroleum products, or other materials vital to the national interest.

(d) Conventional markets not to be displaced by barters

The President shall take steps to ensure that, in making any barter described in subsection (a) or (b)(1) or any purchase authorized by subsection (b)(2), existing export markets for agricultural commodities operating on conventional business terms are safeguarded from displacement by the barter described in subsection (a), (b)(1), or (b)(2), as the case may be. In addition, the President shall ensure that any such barter is consistent with the international obligations of the United States, including the General Agreement on Tariffs and Trade.

(e) Report to Congress

The Secretary of Energy shall report to the Congress on the effect on energy security and on domestic energy supplies of any action taken under this section which results in the acquisition by the Government of petroleum or petroleum products. Such report shall be submitted to the Congress not later than 90 days after such acquisition.

(Pub. L. 99-64, title II, § 203, July 12, 1985, 99 Stat. 158.)

CODIFICATION

Section was enacted as part of the Export Administration Amendments Act of 1985, and not as part of Pub. L. 97-290 which enacted this chapter.

CHAPTER 67—ARCTIC RESEARCH AND POLICY

Sec.	
4101.	Congressional findings and declaration of purposes.
4102.	Arctic Research Commission.
4103.	Duties of Commission; publication of guidelines; report to Congress.
4104.	Cooperation with Commission.
4105.	Administration.
4106.	Implementation of Arctic research policy.
4107.	Duties of Interagency Committee; report to Congress.
4108.	Arctic research plan.
4109.	Coordination and review of budget requests; Office of Science and Technology Policy; Office of Management and Budget.
4110.	Authorization of appropriations; new spending authority.
4111.	“Arctic” defined.

§ 4101. Congressional findings and declaration of purposes

(a) The Congress finds and declares that—

(1) the Arctic, onshore and offshore, contains vital energy resources that can reduce the Nation's dependence on foreign oil and improve the national balance of payments;

(2) the Arctic is critical to national defense;

(3) the renewable resources of the Arctic, specifically fish and other seafood, represent one of the Nation's greatest commercial assets;

(4) Arctic conditions directly affect global weather patterns and must be understood in order to promote better agricultural management throughout the United States;

(5) industrial pollution not originating in the Arctic region collects in the polar air mass, has the potential to disrupt global weather patterns, and must be controlled through international cooperation and consultation;

(6) the Arctic is a natural laboratory for research into human health and adaptation, physical and psychological, to climates of extreme cold and isolation and may provide information crucial for future defense needs;

(7) atmospheric conditions peculiar to the Arctic make the Arctic a unique testing ground for research into high latitude communications, which is likely to be crucial for future defense needs;

(8) Arctic marine technology is critical to cost-effective recovery and transportation of energy resources and to the national defense;

(9) the United States has important security, economic, and environmental interests in developing and maintaining a fleet of icebreaking vessels capable of operating effectively in the heavy ice regions of the Arctic;

(10) most Arctic-rim countries possess Arctic technologies far more advanced than those currently available in the United States;

(11) Federal Arctic research is fragmented and uncoordinated at the present time, leading to the neglect of certain areas of research
