

(Pub. L. 109-241, title VIII, § 804, July 11, 2006, 120 Stat. 563.)

CODIFICATION

Section was enacted as part of the Coast Guard and Maritime Transportation Act of 2006, and not as part of the Magnuson-Stevens Fishery Conservation and Management Act which comprises this chapter.

COMBINATION OF FISHERIES ENFORCEMENT PLANS AND FOREIGN FISHING INCURSION REPORTS

Pub. L. 111-207, §4(b), July 27, 2010, 124 Stat. 2251, as amended by Pub. L. 113-281, title II, § 221(a)(5), Dec. 18, 2014, 128 Stat. 3037, provided that: “The Secretary of the department in which the Coast Guard is operating shall combine the reports required under section 224 of the Coast Guard and Maritime Transportation Act of 2004 (16 U.S.C. 1861b) and section 804 of the Coast Guard and Maritime Transportation Act of 2006 (16 U.S.C. 1828) into a single annual report for fiscal years beginning after fiscal year 2010. No report shall be required under this subsection, including that no report shall be required under section 224 of the Coast Guard and Maritime Transportation Act of 2004 or section 804 of the Coast Guard and Maritime Transportation Act of 2006, for fiscal years beginning after fiscal year 2014.”

**§ 1829. International monitoring and compliance**

**(a) In general**

The Secretary may undertake activities to promote improved monitoring and compliance for high seas fisheries, or fisheries governed by international fishery management agreements, and to implement the requirements of this subchapter.

**(b) Specific authorities**

In carrying out subsection (a), the Secretary may—

(1) share information on harvesting and processing capacity and illegal, unreported and unregulated fishing on the high seas, in areas covered by international fishery management agreements, and by vessels of other nations within the United States exclusive economic zone, with relevant law enforcement organizations of foreign nations and relevant international organizations;

(2) further develop real time information sharing capabilities, particularly on harvesting and processing capacity and illegal, unreported and unregulated fishing;

(3) participate in global and regional efforts to build an international network for monitoring, control, and surveillance of high seas fishing and fishing under regional or global agreements;

(4) support efforts to create an international registry or database of fishing vessels, including by building on or enhancing registries developed by international fishery management organizations;

(5) enhance enforcement capabilities through the application of commercial or governmental remote sensing technology to locate or identify vessels engaged in illegal, unreported, or unregulated fishing on the high seas, including encroachments into the exclusive economic zone by fishing vessels of other nations;

(6) provide technical or other assistance to developing countries to improve their monitoring, control, and surveillance capabilities; and

(7) support coordinated international efforts to ensure that all large-scale fishing vessels operating on the high seas are required by their flag State to be fitted with vessel monitoring systems no later than December 31, 2008, or earlier if so decided by the relevant flag State or any relevant international fishery management organization.

(Pub. L. 94-265, title II, §207, as added Pub. L. 109-479, title IV, §401, Jan. 12, 2007, 120 Stat. 3625.)

SUBCHAPTER IV—NATIONAL FISHERY MANAGEMENT PROGRAM

**§ 1851. National standards for fishery conservation and management**

**(a) In general**

Any fishery management plan prepared, and any regulation promulgated to implement any such plan, pursuant to this subchapter shall be consistent with the following national standards for fishery conservation and management:

(1) Conservation and management measures shall prevent overfishing while achieving, on a continuing basis, the optimum yield from each fishery for the United States fishing industry.

(2) Conservation and management measures shall be based upon the best scientific information available.

(3) To the extent practicable, an individual stock of fish shall be managed as a unit throughout its range, and interrelated stocks of fish shall be managed as a unit or in close coordination.

(4) Conservation and management measures shall not discriminate between residents of different States. If it becomes necessary to allocate or assign fishing privileges among various United States fishermen, such allocation shall be (A) fair and equitable to all such fishermen; (B) reasonably calculated to promote conservation; and (C) carried out in such manner that no particular individual, corporation, or other entity acquires an excessive share of such privileges.

(5) Conservation and management measures shall, where practicable, consider efficiency in the utilization of fishery resources; except that no such measure shall have economic allocation as its sole purpose.

(6) Conservation and management measures shall take into account and allow for variations among, and contingencies in, fisheries, fishery resources, and catches.

(7) Conservation and management measures shall, where practicable, minimize costs and avoid unnecessary duplication.

(8) Conservation and management measures shall, consistent with the conservation requirements of this chapter (including the prevention of overfishing and rebuilding of overfished stocks), take into account the importance of fishery resources to fishing communities by utilizing economic and social data that meet the requirements of paragraph (2), in order to (A) provide for the sustained participation of such communities, and (B) to the extent practicable, minimize adverse economic impacts on such communities.
