#### (1) Alcohol-related neurodevelopmental disorders; ARND

The term “alcohol-related neurodevelopmental disorders” or “ARND” means, with a history of maternal alcohol consumption during pregnancy, central nervous system abnormalities, which may range from minor intellectual deficits and developmental

delays to mental retardation. ARND children may have behavioral problems, learning disabilities, problems with executive functioning, and attention disorders. The neurological defects of ARND may be as severe as FAS, but facial anomalies and other physical characteristics are not present in ARND, thus making diagnosis difficult.

**(2) Assessment**

The term “assessment” means the systematic collection, analysis, and dissemination of information on health status, health needs, and health problems.

**(3) Behavioral health aftercare**

The term “behavioral health aftercare” includes those activities and resources used to support recovery following inpatient, residential, intensive substance abuse, or mental health outpatient or outpatient treatment. The purpose is to help prevent or deal with relapse by ensuring that by the time a client or patient is discharged from a level of care, such as outpatient treatment, an aftercare plan has been developed with the client. An aftercare plan may use such resources as a community-based therapeutic group, transitional living facilities, a 12-step sponsor, a local 12-step or other related support group, and other community-based providers.

**(4) Dual diagnosis**

The term “dual diagnosis” means coexisting substance abuse and mental illness conditions or diagnosis. Such clients are sometimes referred to as mentally ill chemical abusers (MICAs).

**(5) Fetal alcohol spectrum disorders**

**(A) In general**

The term “fetal alcohol spectrum disorders” includes a range of effects that can occur in an individual whose mother drank alcohol during pregnancy, including physical, mental, behavioral, and/or learning disabilities with possible lifelong implications.

**(B) Inclusions**

The term “fetal alcohol spectrum disorders” may include—

- (i) fetal alcohol syndrome (FAS);
- (ii) partial fetal alcohol syndrome (partial FAS);
- (iii) alcohol-related birth defects (ARBD); and
- (iv) alcohol-related neurodevelopmental disorders (ARND).

**(6) FAS or fetal alcohol syndrome**

  - (i) Microphthalmia.
  - (ii) Short palpebral fissures.
  - (iii) Poorly developed philtrum.

- (iv) Thin upper lip.
- (v) Flat nasal bridge.
- (vi) Short upturned nose.

- (C) Prenatal or postnatal growth delay.

**(7) Rehabilitation**

The term “rehabilitation” means medical and health care services that—

(A) are recommended by a physician or licensed practitioner of the healing arts within the scope of their practice under applicable law;

(B) are furnished in a facility, home, or other setting in accordance with applicable standards; and

(C) have as their purpose any of the following:

- (i) The maximum attainment of physical, mental, and developmental functioning.
- (ii) Averting deterioration in physical or mental functional status.
- (iii) The maintenance of physical or mental health functional status.

**(8) Substance abuse**
