

stay out of prison. Research suggests that families are an often underutilized resource in the reentry process.

(8) Approximately 100,000 juveniles (ages 17 years and under) leave juvenile correctional facilities, State prison, or Federal prison each year. Juveniles released from secure confinement still have their likely prime crime years ahead of them. Juveniles released from secure confinement have a recidivism rate ranging from 55 to 75 percent. The chances that young people will successfully transition into society improve with effective reentry and aftercare programs.

(9) Studies have shown that between 15 percent and 27 percent of prisoners expect to go to homeless shelters upon release from prison.

(10) Fifty-seven percent of Federal and 70 percent of State inmates used drugs regularly before going to prison, and the Bureau of Justice statistics report titled "Trends in State Parole, 1990–2000" estimates the use of drugs or alcohol around the time of the offense that resulted in the incarceration of the inmate at as high as 84 percent.

(11) Family-based treatment programs have proven results for serving the special populations of female offenders and substance abusers with children. An evaluation by the Substance Abuse and Mental Health Services Administration of family-based treatment for substance-abusing mothers and children found that 6 months after such treatment, 60 percent of the mothers remained alcohol and drug free, and drug-related offenses declined from 28 percent to 7 percent. Additionally, a 2003 evaluation of residential family-based treatment programs revealed that 60 percent of mothers remained clean and sober 6 months after treatment, criminal arrests declined by 43 percent, and 88 percent of the children treated in the program with their mothers remained stabilized.

(12) A Bureau of Justice Statistics analysis indicated that only 33 percent of Federal inmates and 36 percent of State inmates had participated in residential in-patient treatment programs for alcohol and drug abuse 12 months before their release. Further, over one-third of all jail inmates have some physical or mental disability and 25 percent of jail inmates have been treated at some time for a mental or emotional problem.

(13) State Substance Abuse Agency Directors, also known as Single State Authorities, manage the publicly funded substance abuse prevention and treatment system of the Nation. Single State Authorities are responsible for planning and implementing statewide systems of care that provide clinically appropriate substance abuse services. Given the high rate of substance use disorders among offenders reentering our communities, successful reentry programs require close interaction and collaboration with each Single State Authority as the program is planned, implemented, and evaluated.

(14) According to the National Institute of Literacy, 70 percent of all prisoners function at the lowest literacy levels.

(15) Less than 32 percent of State prison inmates have a high school diploma or a higher

level of education, compared to 82 percent of the general population.

(16) Approximately 38 percent of inmates who completed 11 years or less of school were not working before entry into prison.

(17) The percentage of State prisoners participating in educational programs decreased by more than 8 percent between 1991 and 1997, despite growing evidence of how educational programming while incarcerated reduces recidivism.

(18) The National Institute of Justice has found that 1 year after release, up to 60 percent of former inmates are not employed.

(19) Transitional jobs programs have proven to help people with criminal records to successfully return to the workplace and to the community, and therefore can reduce recidivism.
