

“(6) The Congress, with the passage of Public Law 100-691, the Federal Cave Resources Protection Act of 1988 [16 U.S.C. 4301 et seq.], recognized the significance of cave resources on Federal lands and established the policy that Federal lands be managed in a manner which protects and maintains, to the extent practicable, significant cave resources.”

CAVE RESEARCH INSTITUTE STUDY

Pub. L. 101-578, title II, §203, Nov. 15, 1990, 104 Stat. 2860, directed Secretary of the Interior, not later than one year after Nov. 15, 1990, to prepare and transmit to Congress a study on the feasibility of establishing a Cave Research Institute.

AUTHORIZATION OF APPROPRIATIONS

Pub. L. 101-578, title II, §204, Nov. 15, 1990, 104 Stat. 2860, provided that: “There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this title [enacting this section and provisions set out as notes above].”

CHAPTER 64—NORTH AMERICAN WETLANDS CONSERVATION

Sec.	
4401.	Findings and statement of purpose.
4402.	Definitions.
4403.	Establishment of North American Wetlands Conservation Council.
4404.	Approval of wetlands conservation projects.
4405.	Conditions relating to wetlands conservation projects.
4406.	Amounts available to carry out this chapter.
4407.	Allocation of amounts available to carry out this chapter.
4408.	Restoration, management, and protection of wetlands and habitat for migratory birds on Federal lands.
4409.	Report to Congress.
4410.	Revisions to Plan.
4411.	Relationship to other authorities.
4412.	Limitation on assessments against Migratory Bird Conservation Fund.
4413.	Other agreements.
4414.	Assessment of progress in wetlands conservation.

§ 4401. Findings and statement of purpose

(a) Findings

The Congress finds and declares that—

(1) the maintenance of healthy populations of migratory birds in North America is dependent on the protection, restoration, and management of wetland ecosystems and associated habitats in Canada, as well as in the United States and Mexico;

(2) wetland ecosystems provide essential and significant habitat for fish, shellfish, and other wildlife of commercial, recreational, scientific, and aesthetic values;

(3) almost 35 per centum of all rare, threatened, and endangered species of animals are dependent on wetland ecosystems;

(4) wetland ecosystems provide substantial flood and storm control values and can obviate the need for expensive manmade control measures;

(5) wetland ecosystems make a significant contribution to water availability and quality, recharging ground water, filtering surface runoff, and providing waste treatment;

(6) wetland ecosystems provide aquatic areas important for recreational and aesthetic purposes;

(7) more than 50 per centum of the original wetlands in the United States alone have been lost;

(8) wetlands destruction, loss of nesting cover, and degradation of migration and wintering habitat have contributed to long-term downward trends in populations of migratory bird species such as pintails, American bitterns, and black ducks;

(9) the migratory bird treaty obligations of the United States with Canada, Mexico, and other countries require protection of wetlands that are used by migratory birds for breeding, wintering, or migration and are needed to achieve and to maintain optimum population levels, distributions, and patterns of migration;

(10) the 1988 amendments to the Fish and Wildlife Conservation Act of 1980 require the Secretary of the Interior to identify conservation measures to assure that nongame migratory bird species do not reach the point at which measures of the Endangered Species Act of 1973 [16 U.S.C. 1531 et seq.] are necessary;

(11) protection of migratory birds and their habitats requires long-term planning and the close cooperation and coordination of management activities by Canada, Mexico, and the United States within the framework of the 1916 and 1936 Migratory Bird Conventions and the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere;

(12) the North American Waterfowl Management Plan, signed in 1986 by the Minister of Environment for Canada and the Secretary of the Interior for the United States and in 1994 by the Secretary of Sedesol for Mexico, provides a framework for maintaining and restoring an adequate habitat base to ensure perpetuation of populations of North American waterfowl and other migratory bird species;

(13) a tripartite agreement signed in March 1988, by the Director General for Ecological Conservation of Natural Resources of Mexico, the Director of the Canadian Wildlife Service, and the Director of the United States Fish and Wildlife Service, provides for expanded cooperative efforts in Mexico to conserve wetlands for migratory birds that spend the winter there;

(14) the long-term conservation of migratory birds and habitat for these species will require the coordinated action of governments, private organizations, landowners, and other citizens; and

(15) the treaty obligations of the United States under the Convention on Wetlands of International Importance especially as waterfowl habitat requires promotion of conservation and wise use of wetlands.

(b) Purpose

The purposes of this chapter are to encourage partnership among public agencies and other interests—

(1) to protect, enhance, restore, and manage an appropriate distribution and diversity of wetland ecosystems and habitats associated with wetland ecosystems and other fish and wildlife in North America;
