SUBCHAPTER VI—MISCELLANEOUS

**§ 6591. Forest stands inventory and monitoring program to improve detection of and response to environmental threats**

**(a) In general**

The Secretary of Agriculture shall carry out a comprehensive program to inventory, monitor, characterize, assess, and identify forest stands (with emphasis on hardwood forest stands) and potential forest stands—

(1) in units of the National Forest System (other than those units created from the public domain); and

(2) on private forest land, with the consent of the owner of the land.

**(b) Issues to be addressed**

In carrying out the program, the Secretary shall address issues including—

(1) early detection, identification, and assessment of environmental threats (including insect, disease, invasive species, fire, and weather-related risks and other episodic events);

(2) loss or degradation of forests;

(3) degradation of the quality forest stands caused by inadequate forest regeneration practices;

(4) quantification of carbon uptake rates; and

(5) management practices that focus on preventing further forest degradation.

**(c) Early warning system**

In carrying out the program, the Secretary shall develop a comprehensive early warning system for potential catastrophic environmental threats to forests to increase the likelihood that forest managers will be able to—

(1) isolate and treat a threat before the threat gets out of control; and

(2) prevent epidemics, such as the American chestnut blight in the first half of the twentieth century, that could be environmentally and economically devastating to forests.

**(d) Authorization of appropriations**

There is authorized to be appropriated to carry out this section \$5,000,000 for each of fiscal years 2004 through 2008.

(Pub. L. 108-148, title VI, §601, Dec. 3, 2003, 117 Stat. 1914.)

**(b) Designation of treatment areas**

Not later than 60 days after February 7, 2014, the Secretary shall, if requested by the Governor of the State, designate as part of an insect and disease treatment program 1 or more landscape-scale areas, such as subwatersheds (sixth-level hydrologic units, according to the System of Hydrologic Unit Codes of the United States Geological Survey), in at least 1 national forest in each State that is experiencing an insect or disease epidemic.

**(2) Additional areas**

After the end of the 60-day period described in paragraph (1), the Secretary may designate additional landscape-scale areas under this section as needed to address insect or disease threats.

**(c) Requirements**

To be designated a landscape-scale area under subsection (b), the area shall be—

(1) experiencing declining forest health, based on annual forest health surveys conducted by the Secretary;

(2) at risk of experiencing substantially increased tree mortality over the next 15 years due to insect or disease infestation, based on the most recent National Insect and Disease Risk Map published by the Forest Service; or

(3) in an area in which the risk of hazard trees poses an imminent risk to public infrastructure, health, or safety.

**(d) Treatment of areas**

**(1) In general**

The Secretary may carry out priority projects on Federal land in the areas designated under subsection (b) to reduce the risk or extent of, or increase the resilience to, insect or disease infestation in the areas.

**(2) Authority**
