

Hoover Dam and Glen Canyon Dam until and unless otherwise provided by Congress.

(Pub. L. 90-537, title VI, §605, Sept. 30, 1968, 82 Stat. 901.)

REFERENCES IN TEXT

The Federal Power Act, referred to in text, is act June 10, 1920, ch. 285, 41 Stat. 1063, as amended. Part I of the Federal Power Act is classified generally to subchapter I (§791a et seq.) of chapter 12 of Title 16, Conservation. For complete classification of this Act to the Code, see section 791a of Title 16 and Tables.

§ 1556. Definitions

As used in this chapter, (a) all terms which are defined in the Colorado River Compact shall have the meanings therein defined;

(b) "Main stream" means the main stream of the Colorado River downstream from Lee Ferry within the United States, including the reservoirs thereon;

(c) "User" or "water user" in relation to main stream water in the lower basin means the United States or any person or legal entity entitled under the decree of the Supreme Court of the United States in Arizona against California, and others (376 U.S. 340), to use main stream water when available thereunder;

(d) "Active storage" means that amount of water in reservoir storage, exclusive of bank storage, which can be released through the existing reservoir outlet works;

(e) "Colorado River Basin States" means the States of Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming;

(f) "Western United States" means those States lying wholly or in part west of the Continental Divide; and

(g) "Augment" or "augmentation", when used herein with reference to water, means to increase the supply of the Colorado River or its tributaries by the introduction of water into the Colorado River system, which is in addition to the natural supply of the system.

CHAPTER 32A—COLORADO RIVER BASIN SALINITY CONTROL

SUBCHAPTER I—PROGRAMS DOWNSTREAM FROM IMPERIAL DAM

- Sec. 1571. Water quality improvement.
- 1572. Canal or canal lining.
- 1573. Construction and maintenance of well fields; land acquisition; land replacement; non-reimbursable costs.
- 1574. Modification of projects.
- 1575. Contract authority.
- 1575a. Administration and disposition of lands and constructed facilities; revenues credited to general fund of Treasury.
- 1576. Interagency cooperation.
- 1577. Existing Federal laws not modified.
- 1578. Authorization of appropriations.
- 1579. Fish and wildlife habitat; mitigation of losses.
- 1580. Definitions.

SUBCHAPTER II—MEASURES UPSTREAM FROM IMPERIAL DAM

- 1591. Salinity control policy.

- Sec. 1592. Authorization to construct, operate, and maintain salinity control units and salinity control programs.
- 1593. Planning reports; research and demonstration projects.
- 1594. Colorado River Basin Salinity Control Advisory Council.
- 1595. Salinity control units; authority and functions of Secretary of the Interior.
- 1596. Biennial report to President, Congress, and Advisory Council.
- 1597. Construction of provisions of subchapter.
- 1598. Achieving project objectives.
- 1599. Definitions.

SUBCHAPTER I—PROGRAMS DOWNSTREAM FROM IMPERIAL DAM

§ 1571. Water quality improvement

(a) Authority to proceed with program

The Secretary of the Interior, hereinafter referred to as the "Secretary", is authorized and directed to proceed with a program of works of improvement for the enhancement and protection of the quality of water available in the Colorado River for use in the United States and the Republic of Mexico, and to enable the United States to comply with its obligations under the agreement with Mexico of August 30, 1973 (Minute No. 242 of the International Boundary and Water Commission, United States and Mexico), concluded pursuant to the Treaty of February 3, 1944 (TS 994), in accordance with the provisions of this chapter.

(b) Desalting complexes and plants

(1) The Secretary is authorized to construct, operate, and maintain a desalting complex, including (1) a desalting plant to reduce the salinity of drain water from the Wellton-Mohawk division of the Gila project, Arizona (hereinafter referred to as the division), including a pretreatment plant for settling, softening, and filtration of the drain water to be desalted; (2) the necessary appurtenant works including the intake pumping plant system, product waterline, power transmission facilities, and permanent operating facilities; (3) the necessary extension in the United States and Mexico of the existing bypass drain to carry the reject stream from the desalting plant and other drainage waters to the Santa Clara Slough in Mexico, with the part in Mexico, subject to arrangements made pursuant to subsection (d); (4) replacement of the metal flume in the existing main outlet drain extension with a concrete siphon; (5) reduction of the quantity of irrigation return flows through acquisition of lands to reduce the size of the division, and irrigation efficiency improvements to minimize return flows; (6) acquire on behalf of the United States such lands or interest in lands in the Painted Rock Reservoir as may be necessary to operate the project in accordance with the obligations of Minute No. 242, and (7) all associated facilities including roads, railroad spur, and transmission lines.

(2)(A) The desalting plant shall be designed to treat approximately one hundred and twenty-nine million gallons a day of drain water using advanced technology commercially available. The plant shall effect recovery initially of not less than 70 per centum of the drain water as
