### § 2807. Capital requirements for aquaculture

#### (a) Capital requirements study

The Secretaries, through the coordinating group, shall conduct within twelve months after September 26, 1980, a study of the capital requirements of the United States aquaculture industry. The study shall—

- (1) document and analyze any capital constraints that affect the development of aquaculture in the United States; and
- (2) evaluate the role that appropriate Federal financial assistance does or could play in filling gaps in the normal credit market with respect to aquaculture.

The study will identify the capital needs of the United States aquaculture industry, with emphasis on the needs that are not being filled either in normal credit channels or through government programs for direct loans, loan guarantees, disaster loans, and insurance. Upon its completion, the Secretaries shall submit the results of the study to Congress.

#### (b) Capital requirements plan

Based on the results of the Capital Requirements Study conducted under subsection (a), and within six months of the completion of the study, the Secretaries shall formulate a plan for acting on the study's findings. The plan shall include: (1) those Federal actions, if any, found to be necessary to meet financial needs unmet through normal credit channels and existing Federal programs; and (2) recommendations, if any, for legislative actions. Upon completion, the plan shall be submitted to Congress.

### § 2808. Regulatory constraints on aquaculture

#### (a) Regulatory constraints study

The Secretaries, through the coordinating group, shall conduct, within twelve months after September 26, 1980, a study of the State and Federal regulatory restrictions to aquaculture development in the United States. The study shall—

- (1) include a literature review and a descriptive list identifying the parameters of the issue;
- (2) identify and list relevant current and pending Federal regulations restricting the development of commercial aquaculture operations;
- (3) identify and list relevant current State regulations restricting the development of commercial aquaculture operations in five States selected randomly in five separate geographic regions of the United States;
- (4) conduct case studies of ten commercial aquaculture operations in the United States representing a wide range of marine and fresh water species to determine the practical effects of regulatory restrictions on aquaculture; and
- (5) develop a flow-chart time line using the information obtained by means of paragraphs

(1) through (4) to identify those regulations and restrictions that could have the most detrimental effect in establishing commercial aquaculture operations in the United States.

Upon completion of the study, the Secretaries shall submit its results to Congress.

#### (b) Regulatory constraints plan

Based on the results of the Regulatory Constraints Study conducted under subsection (a), and within six months of the study's completion, the Secretaries shall formulate a plan for acting on the study's findings. The plan will contain specific steps the Federal Government can take to remove unnecessarily burdensome regulatory barriers to the initiation and operation of commercial aquaculture ventures. Upon its completion, the Secretaries shall submit the plan to Congress.

§ 2901. Congressional findings and declaration of purpose

(a) Findings

The Congress finds and declares the following:

(1) Fish and wildlife are of ecological, educational, esthetic, cultural, recreational, economic, and scientific value to the Nation.

(2) The improved conservation and management of fish and wildlife, particularly nongame fish and wildlife, will assist in restoring and maintaining fish and wildlife and in assur-

ing a productive and more esthetically pleasing environment for all citizens.

(3) Many citizens, particularly those residing in urban areas, have insufficient opportunity to participate in recreational and other programs designed to foster human interaction with fish and wildlife and thereby are unable to have a greater appreciation and awareness of the environment.

(4) Historically, fish and wildlife conservation programs have been focused on the more recreationally and commercially important species within any particular ecosystem. As a consequence such programs have been largely financed by hunting and fishing license revenues or excise taxes on certain hunting and fishing equipment. These traditional financing mechanisms are neither adequate nor fully appropriate to meet the conservation needs of nongame fish and wildlife.

(5) Each State should be encouraged to develop, revise, and implement, in consultation with appropriate Federal, State, and local and regional agencies, a plan for the conservation of fish and wildlife, particularly those species which are indigenous to the State.

(b) Purpose

It is the purpose of this chapter—

(1) to provide financial and technical assistance to the States for the development, revision, and implementation of conservation plans and programs for nongame fish and wildlife; and

(2) to encourage all Federal departments and agencies to utilize their statutory and administrative authority, to the maximum extent practicable and consistent with each agency's statutory responsibilities, to conserve and to promote conservation of nongame fish and wildlife and their habitats, in furtherance of the provisions of this chapter.
