

(Pub. L. 108-148, title I, §107, Dec. 3, 2003, 117 Stat. 1900.)

REFERENCES IN TEXT

The National Environmental Policy Act of 1969, referred to in subsec. (a), is Pub. L. 91-190, Jan. 1, 1970, 83 Stat. 852, as amended, which is classified generally to chapter 55 (§ 4321 et seq.) of Title 42, The Public Health and Welfare. For complete classification of this Act to the Code, see Short Title note set out under section 4321 of Title 42 and Tables.

§ 6518. Authorization of appropriations

There is authorized to be appropriated \$760,000,000 for each fiscal year to carry out—

- (1) activities authorized by this subchapter; and
- (2) other hazardous fuel reduction activities of the Secretary, including making grants to States, local governments, Indian tribes, and other eligible recipients for activities authorized by law.

(Pub. L. 108-148, title I, §108, Dec. 3, 2003, 117 Stat. 1901.)

SUBCHAPTER II—BIOMASS

§ 6531. Biomass commercial utilization grant program**(a) In general**

In addition to any other authority of the Secretary of Agriculture to make grants to a person that owns or operates a facility that uses biomass as a raw material to produce electric energy, sensible heat, transportation fuel, or substitutes for petroleum-based products, the Secretary may make grants to a person that owns or operates a facility that uses biomass for wood-based products or other commercial purposes to offset the costs incurred to purchase biomass.

(b) Authorization of appropriations

There is authorized to be appropriated to carry out this section \$5,000,000 for each of fiscal years 2004 through 2008.

(Pub. L. 108-148, title II, §203, Dec. 3, 2003, 117 Stat. 1902.)

SUBCHAPTER III—WATERSHED FORESTRY ASSISTANCE

§ 6541. Omitted

CODIFICATION

Section, Pub. L. 108-148, title III, §301, Dec. 3, 2003, 117 Stat. 1902, which provided congressional findings and purposes of title III of Pub. L. 108-148 (enacting this subchapter and section 2103b of this title), was omitted in view of the repeal of sections 2103b and 6542 of this title.

§ 6542. Repealed. Pub. L. 113-79, title VIII, § 8005, Feb. 7, 2014, 128 Stat. 913

Section, Pub. L. 108-148, title III, §303, Dec. 3, 2003, 117 Stat. 1905, provided for tribal watershed forestry assistance and the development of water quality and watershed forestry programs.

SUBCHAPTER IV—INSECT INFESTATIONS AND RELATED DISEASES

§ 6551. Findings and purpose**(a) Findings**

Congress finds that—

(1) high levels of tree mortality resulting from insect infestation (including the interaction between insects and diseases) may result in—

- (A) increased fire risk;
- (B) loss of old trees and old growth;
- (C) loss of threatened and endangered species;
- (D) loss of species diversity;
- (E) degraded watershed conditions;
- (F) increased potential for damage from other agents of disturbance, including exotic, invasive species; and
- (G) decreased timber values;

(2)(A) forest-damaging insects destroy hundreds of thousands of acres of trees each year;

(B) in the West, more than 21,000,000 acres are at high risk of forest-damaging insect infestation, and in the South, more than 57,000,000 acres are at risk across all land ownerships; and

(C) severe drought conditions in many areas of the South and West will increase the risk of forest-damaging insect infestations;

(3) the hemlock woolly adelgid is—

(A) destroying streamside forests throughout the mid-Atlantic and Appalachian regions;

(B) threatening water quality and sensitive aquatic species; and

(C) posing a potential threat to valuable commercial timber land in northern New England;

(4)(A) the emerald ash borer is a nonnative, invasive pest that has quickly become a major threat to hardwood forests because an emerald ash borer infestation is almost always fatal to affected trees; and

(B) the emerald ash borer pest threatens to destroy more than 692,000,000 ash trees in forests in Michigan and Ohio alone, and between 5 and 10 percent of urban street trees in the Upper Midwest;

(5)(A) epidemic populations of Southern pine beetles are ravaging forests in Alabama, Arkansas, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia; and

(B) in 2001, Florida and Kentucky experienced 146 percent and 111 percent increases, respectively, in Southern pine beetle populations;

(6) those epidemic outbreaks of Southern pine beetles have forced private landowners to harvest dead and dying trees, in rural areas and increasingly urbanized settings;

(7) according to the Forest Service, recent outbreaks of the red oak borer in Arkansas and Missouri have been unprecedented, with more than 1,000,000 acres infested at population levels never seen before;

(8) much of the damage from the red oak borer has taken place in national forests, and
