CHAPTER 40—INDIAN DAMS SAFETY

Sec.	
3801.	Findings.
3802.	Definitions.
3803.	Dam Safety Maintenance and Repair Program.
3804.	Authorization of appropriations.
3805.	Indian dam safety.

§ 3801. Findings

The Congress finds that—

(1) the Secretary of the Interior has identified 53 dams on Indian lands that present a threat to human life in the event of a failure;

(2) because of inadequate attention in the past to problems stemming from structural deficiencies and regular maintenance requirements for dams operated by the Bureau of Indian Affairs, unsafe Bureau dams continue to pose an imminent threat to people and property;

(3) many Bureau dams have maintenance deficiencies regardless of their current safety condition classification and the deficiencies must be corrected to avoid future threats to human life and property;

(4) safe working dams on Indian lands are necessary to supply irrigation water, to provide flood control, to provide water for munic-

ipal, industrial, domestic, livestock, and recreation uses, and for fish and wildlife habitats; and

(5) it is necessary to institute a regular dam maintenance and repair program, utilizing the expertise in the Bureau, Indian tribes, and other Federal agencies.

§ 3803. Dam Safety Maintenance and Repair Program

(a) Establishment

The Secretary shall establish a dam safety maintenance and repair program within the Bureau to ensure maintenance and monitoring of the condition of each dam identified pursuant to subsection (e) necessary to maintain the dam in a satisfactory condition on a long-term basis.

(b) Transfer of existing functions and personnel

All functions performed before August 23, 1994, pursuant to the Dam Safety Program established by the Secretary of the Interior by order dated February 28, 1980, and all Bureau of Indian Affairs personnel assigned to such program as of August 23, 1994, are hereby transferred to the Dam Safety Maintenance and Repair Program. Any reference in any law, regulation, executive order, reorganization plan, or delegation of authority to the Dam Safety Program is deemed to be a reference to the Dam Safety Maintenance and Repair Program.

(c) Rehabilitation

Under the Dam Safety Maintenance and Repair Program, the Secretary shall perform such rehabilitation work as is necessary to bring the dams identified pursuant to subsection (e) to a satisfactory condition. In addition, each dam located on Indian lands shall be regularly maintained pursuant to the Dam Safety Maintenance and Repair Program established pursuant to subsection (a).

(d) Maintenance action plan

The Secretary shall develop a maintenance action plan, which shall include a prioritization of actions to be taken, for those dams with a risk hazard rating of high or significant as identified pursuant to subsection (e).

(e) Identification of dams

(1) Development of list

The Secretary shall develop a comprehensive list of dams located on Indian lands that describes the dam safety condition classification of each dam, as specified in paragraph (2), the risk hazard classification of each dam, as specified in paragraph (3), and the conditions resulting from maintenance deficiencies.

(2) Dam safety condition classifications

The dam safety condition classification referred to in paragraph (1) is one of the following classifications:

(A) Satisfactory

No existing or potential dam safety deficiencies are recognized. Safe performance is expected under all anticipated conditions.

(B) Fair

No existing dam safety deficiencies are recognized for normal loading conditions. Infrequent hydrologic or seismic events would probably result in a dam safety deficiency.

(C) Conditionally poor

A potential dam safety deficiency is recognized for unusual loading conditions that may realistically occur during the expected life of the structure.

(D) Poor

A potential dam safety deficiency is clearly recognized for normal loading conditions. Immediate actions to resolve the deficiency are recommended; reservoir restrictions may be necessary until resolution of the problem.

(E) Unsatisfactory

A dam safety deficiency exists for normal loading conditions. Immediate remedial action is required for resolution of the problem.

(3) Risk hazard classification

The risk hazard classification referred to in paragraph (1) is one of the following classifications:

(A) High

Six or more lives would be at risk or extensive property damage could occur if the dam failed.

(B) Significant

Between one and six lives would be at risk or significant property damage could occur if the dam failed.
