SO ₂ (percent removal)	99 percent
NO _x (emissions)	0.07 lbs/MMBTU
PM* (emissions)	0.015 lbs/MMBTU
Hg (percent removal)	90 percent

For purposes of the performance requirement specified for the removal of SO₂ in the table contained in subparagraph (B), the SO₂ removal design level in the case of a unit designed for the use of feedstock substantially all of which is subbituminous coal shall be 99 percent SO₂ removal or the achievement of an emission level of 0.04 pounds or less of SO₂ per million Btu, determined on a 30-day average.

(2) Design net heat rate

For purposes of this subsection, design net heat rate with respect to an electric generation unit shall—

(A) be measured in Btu per kilowatt hour (higher heating value),

(B) be based on the design annual heat input to the unit and the rated net electrical power, fuels, and chemicals output of the unit (determined without regard to the co-generation of steam by the unit),

(C) be adjusted for the heat content of the design coal to be used by the unit—

(i) if the heat content is less than 13,500 Btu per pound, but greater than 7,000 Btu per pound, according to the following formula: design net heat rate = unit net heat rate x [1-(((13,500-design coal heat content, Btu per pound)/1,000)* 0.013)], and

(ii) if the heat content is less than or equal to 7,000 Btu per pound, according to the following formula: design net heat rate = unit net heat rate x [1-(((13,500-design coal heat content, Btu per pound)/1,000)* 0.018)], and

(D) be corrected for the site reference conditions of—

- (i) elevation above sea level of 500 feet,
- (ii) air pressure of 14.4 pounds per square inch absolute,
- (iii) temperature, dry bulb of 63°F,
- (iv) temperature, wet bulb of 54°F, and

(3) Existing units

In the case of any electric generation unit in existence on the date of the enactment of this section, such unit uses advanced coal-based generation technology if, in lieu of the requirements under paragraph (1)(A)(ii), such unit achieves a minimum efficiency of 35 percent and an overall thermal design efficiency improvement, compared to the efficiency of the unit as operated, of not less than—

- (A) 7 percentage points for coal of more than 9,000 Btu,
- (B) 6 percentage points for coal of 7,000 to 9,000 Btu, or
- (C) 4 percentage points for coal of less than 7,000 Btu.

(g) Applicability

No use of technology (or level of emission reduction solely by reason of the use of the technology), and no achievement of any emission reduction by the demonstration of any technology or performance level, by or at one or more facilities with respect to which a credit is allowed under this section, shall be considered to indicate that the technology or performance level is—

- (1) adequately demonstrated for purposes of section 111 of the Clean Air Act (42 U.S.C. 7411);
- (2) achievable for purposes of section 169 of that Act (42 U.S.C. 7479); or

In implementing this section or section 48B, the Secretary is directed to modify the terms of any competitive certification award and any associated closing agreement where such modification—

(1) is consistent with the objectives of such section,

(2) is requested by the recipient of the competitive certification award, and

(3) involves moving the project site to improve the potential to capture and sequester carbon dioxide emissions, reduce costs of transporting feedstock, and serve a broader customer base,

unless the Secretary determines that the dollar amount of tax credits available to the taxpayer under such section would increase as a result of the modification or such modification would result in such project not being originally certified. In considering any such modification, the Secretary shall consult with other relevant Federal agencies, including the Department of Energy.

(i) Recapture of credit for failure to sequester

The Secretary shall provide for recapturing the benefit of any credit allowable under subsection (a) with respect to any project which fails to attain or maintain the separation and sequestration requirements of subsection (e)(1)(G).
