

(2) Data matching program

Each applicable State health subsidy program shall participate in a data matching arrangement for determining eligibility for participation in the program under paragraph (3) that—

(A) provides access to data described in paragraph (3);

(B) applies only to individuals who—

(i) receive assistance from an applicable State health subsidy program; or

(ii) apply for such assistance—

(I) by filing a form described in subsection (b); or

(II) by requesting a determination of eligibility and authorizing disclosure of the information described in paragraph (3) to applicable State health coverage subsidy programs for purposes of determining and establishing eligibility; and

(C) consistent² with standards promulgated by the Secretary, including the privacy and data security safeguards described in section 1942 of the Social Security Act [42 U.S.C. 1396w-2] or that are otherwise applicable to such programs.

(3) Determination of eligibility**(A) In general**

Each applicable State health subsidy program shall, to the maximum extent practicable—

(i) establish, verify, and update eligibility for participation in the program using the data matching arrangement under paragraph (2); and

(ii) determine such eligibility on the basis of reliable, third party data, including information described in sections 1137, 453(i), and 1942(a) of the Social Security Act [42 U.S.C. 1320b-7, 653(i), 1396w-2(a)], obtained through such arrangement.

(B) Exception

This paragraph shall not apply in circumstances with respect to which the Secretary determines that the administrative and other costs of use of the data matching arrangement under paragraph (2) outweigh its expected gains in accuracy, efficiency, and program participation.

(4) Secretarial standards

The Secretary shall, after consultation with persons in possession of the data to be matched and representatives of applicable State health subsidy programs, promulgate standards governing the timing, contents, and procedures for data matching described in this subsection. Such standards shall take into account administrative and other costs and the value of data matching to the establishment, verification, and updating of eligibility for applicable State health subsidy programs.

(d) Administrative authority**(1) Agreements**

Subject to section 18081 of this title and section 6103(l)(21) of title 26 and any other re-

quirement providing safeguards of privacy and data integrity, the Secretary may establish model agreements, and enter into agreements, for the sharing of data under this section.

(2) Authority of exchange to contract out

Nothing in this section shall be construed to—

(A) prohibit contractual arrangements through which a State medicaid agency determines eligibility for all applicable State health subsidy programs, but only if such agency complies with the Secretary's requirements ensuring reduced administrative costs, eligibility errors, and disruptions in coverage; or

(B) change any requirement under title XIX¹ that eligibility for participation in a State's medicaid program must be determined by a public agency.

(e) Applicable State health subsidy program

In this section, the term "applicable State health subsidy program" means—

(1) the program under this title³ for the enrollment in qualified health plans offered through an Exchange, including the premium tax credits under section 36B of title 26 and cost-sharing reductions under section 18071 of this title;

(2) a State medicaid program under title XIX of the Social Security Act [42 U.S.C. 1396 et seq.];

(3) a State children's health insurance program (CHIP) under title XXI of such Act [42 U.S.C. 1397aa et seq.]; and

(4) a State program under section 18051 of this title establishing qualified basic health plans.

SUBCHAPTER V—SHARED RESPONSIBILITY FOR HEALTH CARE

PART A—INDIVIDUAL RESPONSIBILITY

§ 18091. Requirement to maintain minimum essential coverage; findings

Congress makes the following findings:

(1) In general

The individual responsibility requirement provided for in this section (in this section referred to as the “requirement”) is commercial and economic in nature, and substantially affects interstate commerce, as a result of the effects described in paragraph (2).

(2) Effects on the national economy and interstate commerce

The effects described in this paragraph are the following:

(A) The requirement regulates activity that is commercial and economic in nature: economic and financial decisions about how and when health care is paid for, and when health insurance is purchased. In the absence of the requirement, some individuals would make an economic and financial decision to forego health insurance coverage and attempt to self-insure, which increases financial risks to households and medical providers.

(B) Health insurance and health care services are a significant part of the national economy. National health spending is projected to increase from \$2,500,000,000,000, or 17.6 percent of the economy, in 2009 to \$4,700,000,000,000 in 2019. Private health insurance spending is projected to be \$854,000,000,000 in 2009, and pays for medical supplies, drugs, and equipment that are shipped in interstate commerce. Since most health insurance is sold by national or regional health insurance companies, health insurance is sold in interstate commerce and claims payments flow through interstate commerce.

(C) The requirement, together with the other provisions of this Act, will add millions of new consumers to the health insurance market, increasing the supply of, and demand for, health care services, and will increase the number and share of Americans who are insured.

(D) The requirement achieves near-universal coverage by building upon and strength-

ening the private employer-based health insurance system, which covers 176,000,000 Americans nationwide. In Massachusetts, a similar requirement has strengthened private employer-based coverage: despite the economic downturn, the number of workers offered employer-based coverage has actually increased.

(E) The economy loses up to \$207,000,000,000 a year because of the poorer health and shorter lifespan of the uninsured. By significantly reducing the number of the uninsured, the requirement, together with the other provisions of this Act, will significantly reduce this economic cost.

(F) The cost of providing uncompensated care to the uninsured was \$43,000,000,000 in 2008. To pay for this cost, health care providers pass on the cost to private insurers, which pass on the cost to families. This cost-shifting increases family premiums by on average over \$1,000 a year. By significantly reducing the number of the uninsured, the requirement, together with the other provisions of this Act, will lower health insurance premiums.

(G) 62 percent of all personal bankruptcies are caused in part by medical expenses. By significantly increasing health insurance coverage, the requirement, together with the other provisions of this Act, will improve financial security for families.

(H) Under the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1001 et seq.), the Public Health Service Act (42 U.S.C. 201 et seq.), and this Act, the Federal Government has a significant role in regulating health insurance. The requirement is an essential part of this larger regulation of economic activity, and the absence of the requirement would undercut Federal regulation of the health insurance market.

(I) Under sections 2704 and 2705 of the Public Health Service Act [42 U.S.C. 300gg-3, 300gg-4] (as added by section 1201 of this Act), if there were no requirement, many individuals would wait to purchase health insurance until they needed care. By significantly increasing health insurance coverage, the requirement, together with the other provisions of this Act, will minimize this adverse selection and broaden the health insurance risk pool to include healthy individuals, which will lower health insurance premiums. The requirement is essential to creating effective health insurance markets in which improved health insurance products that are guaranteed issue and do not exclude coverage of pre-existing conditions can be sold.

(J) Administrative costs for private health insurance, which were \$90,000,000,000 in 2006, are 26 to 30 percent of premiums in the current individual and small group markets. By significantly increasing health insurance coverage and the size of purchasing pools, which will increase economies of scale, the requirement, together with the other provisions of this Act, will significantly reduce administrative costs and lower health insurance premiums. The requirement is essential
