

- (II) the person that acknowledges receipt of the manifest;
- (ii) if the manifest is electronically submitted, State authority to access paper printout copies of the manifest from the system; and
- (iii) access to all publicly available information contained in the manifest.

(2) Effective date of regulations

Any regulation promulgated by the Administrator under paragraph (1) and in accordance with section 6923 of this title relating to electronic manifesting of hazardous waste shall take effect in each State as of the effective date specified in the regulation.

(3) Administration

The Administrator shall carry out regulations promulgated under this subsection in each State unless the State program is fully authorized to carry out such regulations in lieu of the Administrator.

(h) Requirement of compliance with respect to certain States

In any case in which the State in which waste is generated, or the State in which waste will be transported to a designated facility, requires that the waste be tracked through a hazardous waste manifest, the designated facility that receives the waste shall, regardless of the State in which the facility is located—

- (1) complete the facility portion of the applicable manifest;
- (2) sign and date the facility certification; and
- (3) submit to the system a final copy of the manifest for data processing purposes.

(i) Authorization for start-up activities

There are authorized to be appropriated \$2,000,000 for each of fiscal years 2013 through 2015 for start-up activities to carry out this section, to be offset by collection of user fees under subsection (c) such that all such appropriated funds are offset by fees as provided in subsection (c).

SUBCHAPTER IV—STATE OR REGIONAL SOLID WASTE PLANS

§ 6941. Objectives of subchapter

The objectives of this subchapter are to assist in developing and encouraging methods for the disposal of solid waste which are environmentally sound and which maximize the utilization

of valuable resources including energy and materials which are recoverable from solid waste and to encourage resource conservation. Such objectives are to be accomplished through Federal technical and financial assistance to States or regional authorities for comprehensive planning pursuant to Federal guidelines designed to foster cooperation among Federal, State, and local governments and private industry. In developing such comprehensive plans, it is the intention of this chapter that in determining the size of the waste-to-energy facility, adequate provision shall be given to the present and reasonably anticipated future needs, including those needs created by thorough implementation of section 6962(h) of this title, of the recycling and resource recovery interest within the area encompassed by the planning process.

(Pub. L. 89-272, title II, § 4001, as added Pub. L. 94-580, § 2, Oct. 21, 1976, 90 Stat. 2813; amended Pub. L. 96-482, § 32(b), Oct. 21, 1980, 94 Stat. 2353; Pub. L. 98-616, title III, § 301(a), title V, § 501(f)(1), Nov. 8, 1984, 98 Stat. 3267, 3276.)

PRIOR PROVISIONS

Provisions similar to those in this section were contained in section 3254 of this title, prior to the general amendment of the Solid Waste Disposal Act by Pub. L. 94-580.

AMENDMENTS

1984—Pub. L. 98-616, § 501(f)(1), inserted “, including those needs created by thorough implementation of section 6962(h) of this title.”.

Pub. L. 98-616, § 301(a), inserted at end “In developing such comprehensive plans, it is the intention of this chapter that in determining the size of the waste-to-energy facility, adequate provision shall be given to the present and reasonably anticipated future needs of the recycling and resource recovery interest within the area encompassed by the planning process.”

1980—Pub. L. 96-482 included as an objective in the disposal of solid waste the utilization of energy and materials recoverable from solid waste.

§ 6941a. Energy and materials conservation and recovery; Congressional findings

The Congress finds that—

(1) significant savings could be realized by conserving materials in order to reduce the volume or quantity of material which ultimately becomes waste;

(2) solid waste contains valuable energy and material resources which can be recovered and used thereby conserving increasingly scarce and expensive fossil fuels and virgin materials;

(3) the recovery of energy and materials from municipal waste, and the conservation of energy and materials contributing to such waste streams, can have the effect of reducing the volume of the municipal waste stream and the burden of disposing of increasing volumes of solid waste;

(4) the technology to conserve resources exists and is commercially feasible to apply;

(5) the technology to recover energy and materials from solid waste is of demonstrated commercial feasibility; and

(6) various communities throughout the nation have different needs and different potentials for conserving resources and for utilizing techniques for the recovery of energy and ma-
