

comment, and public hearings in accordance with this subsection. At least one such public hearing shall be held in the District of Columbia and in any adjacent coastal State to which a facility is proposed to be directly connected by pipeline or electric transmission cable. Any interested person may present relevant material at any such hearing. After the hearings required by this subsection are concluded, if the Administrator determines that there exist one or more specific and material factual issues which may be resolved by a formal evidentiary hearing, at least one adjudicatory hearing shall be held in the District of Columbia in accordance with the provisions of section 554 of title 5. The record developed in any such adjudicatory hearing shall be part of the basis for the Administrator's decision to approve or deny a license. Hearings held pursuant to this subsection shall be consolidated insofar as practicable with hearings held by other agencies. All public hearings on all applications with respect to facilities for any designated application area shall be consolidated and shall be concluded not later than 240 days after notice of the initial application has been published pursuant to subsection (d) of this section. All public hearings on applications with respect to ocean thermal energy conversion plantships shall be concluded not later than 240 days after notice of the application has been published pursuant to subsection (d) of this section.

(h) Administrative fee

The Administrator shall not take final action on any application unless the applicant has paid to the Administrator a reasonable administrative fee, which shall be deposited into miscellaneous receipts of the Treasury. The amount of the fee imposed by the Administrator on any applicant shall reflect the reasonable administrative costs incurred by the National Oceanic and Atmospheric Administration in reviewing and processing the application.

(i) Approval or denial of application; applications for same area; factors determinative of facility selection

(1) The Administrator shall approve or deny any timely filed application with respect to a facility for a designated application area submitted in accordance with the provision of this chapter not later than 90 days after public hearings on proposed licenses for that area are concluded pursuant to subsection (g) of this section. The Administrator shall approve or deny an application for a license for ownership, construction, and operation of an ocean thermal energy conversion plantship submitted pursuant to this chapter no later than 90 days after the public hearings on that application are concluded pursuant to subsection (g) of this section.

(2) In the event more than one application for a license for ownership, construction, and operation of an ocean thermal energy conversion facility is submitted pursuant to this chapter for the same designated application area, the Administrator, unless one or a specific combination of the proposed facilities clearly best serves the national interest, shall make decisions on license applications in the order in which they were submitted to him.

(3) In determining whether any one or a specific combination of the proposed ocean thermal

energy conversion facilities clearly best serves the national interest, the Administrator, in consultation with the Secretary of Energy, shall consider the following factors:

(A) the goal of making the greatest possible use of ocean thermal energy conversion by installing the largest capacity practicable in each application area;

(B) the amount of net energy impact of each of the proposed ocean thermal energy conversion facilities;

(C) the degree to which the proposed ocean thermal energy conversion facilities will affect the environment;

(D) any significant differences between anticipated dates and commencement of operation of the proposed ocean thermal energy conversion facilities; and

(E) any differences in costs of construction and operation of the proposed ocean thermal energy conversion facilities, to the extent that such differentials may significantly affect the ultimate cost of energy or products to the consumer.

(Pub. L. 96-320, title I, §102, Aug. 3, 1980, 94 Stat. 979; Pub. L. 98-623, title VI, §602(f), Nov. 8, 1984, 98 Stat. 3412.)

REFERENCES IN TEXT

This chapter, referred to in subsecs. (a) to (c) and (i)(1), (2), was in the original "this Act", meaning Pub. L. 96-320, Aug. 3, 1980, 94 Stat. 974, known as the Ocean Thermal Energy Conversion Act of 1980, which is classified principally to this chapter. For complete classification of this Act to the Code, see Short Title note set out under section 9101 of this title and Tables.

AMENDMENTS

1984—Subsec. (h). Pub. L. 98-623 substituted "The Administrator shall not take final action on any application unless the applicant has paid to the Administrator a reasonable administrative fee" for "Each person applying for a license pursuant to this chapter shall remit to the Administrator at the time the application is filed a nonrefundable application fee" and "imposed by the Administrator on any applicant shall reflect the reasonable administrative costs incurred by the National Oceanic and Atmospheric Administration" for "shall be established by regulation by the Administrator, and shall reflect the reasonable administrative costs incurred".

TRANSFER OF FUNCTIONS

For transfer of authorities, functions, personnel, and assets of the Coast Guard, including the authorities and functions of the Secretary of Transportation relating thereto, to the Department of Homeland Security, and for treatment of related references, see sections 468(b), 551(d), 552(d), and 557 of Title 6, Domestic Security, and the Department of Homeland Security Reorganization Plan of November 25, 2002, as modified, set out as a note under section 542 of Title 6.

§9113. Protection of submarine electric transmission cables and equipment

(a) Prohibited acts; misdemeanor; penalty and fine

Any person who shall willfully and wrongfully break or injure, or attempt to break or injure, or who shall in any manner procure, counsel, aid, abet, or be accessory to such breaking or injury, or attempt to break or injure, any submarine electric transmission cable or equipment

being constructed or operated under a license issued pursuant to this chapter shall be guilty of a misdemeanor and, on conviction thereof, shall be liable to imprisonment for a term not exceeding 2 years, or to a fine not exceeding \$5,000, or to both fine and imprisonment, at the discretion of the court.

(b) Culpable negligence; misdemeanor; penalty and fine

Any person who by culpable negligence shall break or injure any submarine electric transmission cable or equipment being constructed or operated under a license issued pursuant to this chapter shall be guilty of a misdemeanor and, on conviction thereof, shall be liable to imprisonment for a term not exceeding 3 months, or to a fine not exceeding \$500, or to both fine and imprisonment, at the discretion of the court.

(c) Exceptions

The provisions of subsections (a) and (b) of this section shall not apply to any person who, after having taken all necessary precautions to avoid such breaking or injury, breaks or injures any submarine electric transmission cable or equipment in an effort to save the life or limb of himself or of any other person, or to save his own or any other vessel.

(d) Suits for damages

The penalties provided in subsections (a) and (b) of this section for the breaking or injury of any submarine electric transmission cable or equipment shall not be a bar to a suit for damages on account of such breaking or injury.

(e) Indemnity

Whenever any vessel sacrifices any anchor, fishing net, or other fishing gear to avoid injuring any submarine electric transmission cable or equipment being constructed or operated under a license issued pursuant to this chapter, the licensee shall indemnify the owner of such vessel for the items sacrificed: *Provided*, That the owner of the vessel had taken all reasonable precautionary measures beforehand.

(f) Repair costs

Any licensee who causes any break in or injury to any submarine cable or pipeline of any type shall bear the cost of the repairs.

(Pub. L. 96-320, title I, § 103, Aug. 3, 1980, 94 Stat. 982.)

REFERENCES IN TEXT

This chapter, referred to in subsections (a), (b), and (e), was in the original "this Act", meaning Pub. L. 96-320, Aug. 3, 1980, 94 Stat. 974, known as the Ocean Thermal Energy Conversion Act of 1980, which is classified principally to this chapter. For complete classification of this Act to the Code, see Short Title note set out under section 9101 of this title and Tables.

§ 9114. Antitrust review

(a) Review of applications by Attorney General

Whenever any application for issuance, transfer, or renewal of any license is received, the Administrator shall transmit promptly to the Attorney General a complete copy of such application. Within 90 days of the receipt of the application, the Attorney General shall conduct such

antitrust review of the application as he deems appropriate, and submit to the Administrator any advice or recommendations he deems advisable to avoid any action upon such application by the Administrator which would create a situation inconsistent with the antitrust laws. If the Attorney General fails to file such views within the 90-day period, the Administrator shall proceed as if such views had been received. The Administrator shall not issue, transfer, or renew the license during the 90-day period, except upon written confirmation by the Attorney General that he does not intend to submit any further advice or recommendation on the application during such period.

(b) Issuance of license as constituting no defense for antitrust violations

The issuance of a license under this chapter shall not be admissible in any way as a defense to any civil or criminal action for violation of the antitrust laws of the United States, nor shall it in any way modify or abridge any private right of action under such laws. Nothing in this section shall be construed to bar the Attorney General or the Federal Trade Commission from challenging any anticompetitive situation involved in the ownership, construction, or operation of an ocean thermal energy conversion facility or plantship.

(Pub. L. 96-320, title I, § 104, Aug. 3, 1980, 94 Stat. 983.)

This chapter, referred to in subsec. (b), was in the original "this Act", meaning Pub. L. 96-320, Aug. 3, 1980, 94 Stat. 974, known as the Ocean Thermal Energy Conversion Act of 1980, which is classified principally to this chapter. For complete classification of this Act to the Code, see Short Title note set out under section 9101 of this title and Tables.

§ 9115. Adjacent coastal States

(a) Designation of adjacent coastal State

(1) The Administrator, in issuing notice of application pursuant to section 9112(d) of this title, shall designate as an "adjacent coastal State" any coastal State which (A) would be directly connected by electric transmission cable or pipeline to an ocean thermal energy conversion facility as proposed in an application, or (B) in whose waters any part of such proposed ocean thermal energy conversion facility would be located, or (C) in whose waters an ocean thermal energy conversion plantship would be operated as proposed in an application.

(2) The Administrator shall, upon request of a State, designate such State as an "adjacent coastal State" if he determines (A) that there is a risk of damage to the coastal environment of such State equal to or greater than the risk posed to a State required to be designated as an "adjacent coastal State" by paragraph (1) of this subsection or (B) that the thermal plume of the proposed ocean thermal energy conversion facility or plantship is likely to impinge on so as to degrade the thermal gradient at possible locations for ocean thermal energy conversion facilities which could reasonably be expected to be directly connected by electric transmission cable or pipeline to such State. This paragraph
