Section 14304(a) requires the Secretary to remeasure a vessel, to the extent necessary, if there is an alleged error regarding its measurement or if the vessel or its use undergoes a change substantially affecting its tonnage. The phrase “to the extent necessary” was included to indicate that a complete remeasurement of the vessel may not be necessary if, for example, an error was made in one portion of the vessel’s measurement and only that portion needs to be remeasured.

Section 14304(b) provides that except as provided in section 14504, a vessel that has been measured does not have to be remeasured to obtain another document or endorsement under chapter 121 of this title.

§ 14305. Optional regulatory measurement

(a) On request of the owner of a vessel measured under this chapter that is of United States registry or nationality, or a vessel operated under the authority of the United States, the Secretary also shall measure the vessel under chapter 145 of this title. Revised section 14305

Source: International Convention on Tonnage Measurement of Ships.

Section 14305 requires that the Secretary measure a vessel under chapter 145 (Regulatory Measurement) of this title (in addition to measuring it under the Convention) at the request of the owner. For vessels that have obtained a regulatory tonnage measurement under this section, the Secretary is required to use the regulatory tonnage measurement to determine the application of those laws listed in section 14305(a) and those not listed by the Secretary by regulation, as provided in section 14302(c). It is the intent of the Committee to list in section 14305(a) certain U.S. tonnage-based laws that would impose increased regulatory burdens on industry if the Convention measurement were used for applicability determinations.

Clause (1) of section 14305(a) includes the following parts of subtitle II of title 46, U.S.C.:

Part A: General provisions (including definitions.)

Part B: Inspection and Regulation of Vessels.

Part C: Load Lines, which is enacted as part of this legislation. Although most load line requirements are based on vessel length, and not tonnage, a few requirements are based on tonnage. (It is only the tonnage based requirements to which this provision applies.)

Part E: Licenses, Certificates, and Merchant Mariners’ Documents.

Part F: Manning of Vessels.

Part G: Merchant Seamen Protection and Relief.
