

§ 533. Ownership restrictions**(a) Cable operator holding license for multichannel distribution or offering satellite service**

It shall be unlawful for a cable operator to hold a license for multichannel multipoint distribution service, or to offer satellite master antenna television service separate and apart from any franchised cable service, in any portion of the franchise area served by that cable operator's cable system. The Commission—

(1) shall waive the requirements of this paragraph for all existing multichannel multipoint distribution services and satellite master antenna television services which are owned by a cable operator on October 5, 1992;

(2) may waive the requirements of this paragraph to the extent the Commission determines is necessary to ensure that all significant portions of a franchise area are able to obtain video programming; and

(3) shall not apply the requirements of this subsection to any cable operator in any franchise area in which a cable operator is subject to effective competition as determined under section 543(l) of this title.

(b) Repealed. Pub. L. 104-104, title III, § 302(b)(1), Feb. 8, 1996, 110 Stat. 124**(c) Promulgation of rules**

The Commission may prescribe rules with respect to the ownership or control of cable systems by persons who own or control other media of mass communications which serve the same community served by a cable system.

(d) Regulation of ownership by States or franchising authorities

Any State or franchising authority may not prohibit the ownership or control of a cable system by any person because of such person's ownership or control of any other media of mass communications or other media interests. Nothing in this section shall be construed to prevent any State or franchising authority from prohibiting the ownership or control of a cable system in a jurisdiction by any person (1) because of such person's ownership or control of any other cable system in such jurisdiction; or (2) in circumstances in which the State or franchising authority determines that the acquisition of such a cable system may eliminate or reduce competition in the delivery of cable service in such jurisdiction.

(e) Holding of ownership interests or exercise of editorial control by States or franchising authorities

(1) Subject to paragraph (2), a State or franchising authority may hold any ownership interest in any cable system.

(2) Any State or franchising authority shall not exercise any editorial control regarding the content of any cable service on a cable system in which such governmental entity holds ownership interest (other than programming on any channel designated for educational or governmental use), unless such control is exercised through an entity separate from the franchising authority.

(f) Enhancement of effective competition

(1) In order to enhance effective competition, the Commission shall, within one year after October 5, 1992, conduct a proceeding—

(A) to prescribe rules and regulations establishing reasonable limits on the number of cable subscribers a person is authorized to reach through cable systems owned by such person, or in which such person has an attributable interest;

(B) to prescribe rules and regulations establishing reasonable limits on the number of channels on a cable system that can be occupied by a video programmer in which a cable operator has an attributable interest; and

(C) to consider the necessity and appropriateness of imposing limitations on the degree to which multichannel video programming distributors may engage in the creation or production of video programming.

(2) In prescribing rules and regulations under paragraph (1), the Commission shall, among other public interest objectives—

(A) ensure that no cable operator or group of cable operators can unfairly impede, either because of the size of any individual operator or because of joint actions by a group of operators of sufficient size, the flow of video programming from the video programmer to the consumer;

(B) ensure that cable operators affiliated with video programmers do not favor such programmers in determining carriage on their cable systems or do not unreasonably restrict the flow of the video programming of such programmers to other video distributors;

(C) take particular account of the market structure, ownership patterns, and other relationships of the cable television industry, including the nature and market power of the local franchise, the joint ownership of cable systems and video programmers, and the various types of non-equity controlling interests;

(D) account for any efficiencies and other benefits that might be gained through increased ownership or control;

(E) make such rules and regulations reflect the dynamic nature of the communications marketplace;

(F) not impose limitations which would bar cable operators from serving previously unserved rural areas; and

(G) not impose limitations which would impair the development of diverse and high quality video programming.

(g) Combination of interests under prior law

This section shall not apply to prohibit any combination of any interests held by any person on July 1, 1984, to the extent of the interests so held as of such date, if the holding of such interests was not inconsistent with any applicable Federal or State law or regulations in effect on that date.

(h) "Media of mass communications" defined

For purposes of this section, the term "media of mass communications" shall have the meaning given such term under section 309(i)(3)(C)(i) of this title.

EFFECTIVE DATE

§ 534. Carriage of local commercial television signals

(a) Carriage obligations

Each cable operator shall carry, on the cable system of that operator, the signals of local commercial television stations and qualified low power stations as provided by this section. Carriage of additional broadcast television signals on such system shall be at the discretion of such operator, subject to section 325(b) of this title.

(b) Signals required

(1) In general

(A) A cable operator of a cable system with 12 or fewer usable activated channels shall carry the signals of at least three local commercial television stations, except that if such a system has 300 or fewer subscribers, it shall not be subject to any requirements under this section so long as such system does not delete from carriage by that system any signal of a broadcast television station.

(B) A cable operator of a cable system with more than 12 usable activated channels shall

carry the signals of local commercial television stations, up to one-third of the aggregate number of usable activated channels of such system.

(2) Selection of signals

Whenever the number of local commercial television stations exceeds the maximum number of signals a cable system is required to carry under paragraph (1), the cable operator shall have discretion in selecting which such stations shall be carried on its cable system, except that—

(A) under no circumstances shall a cable operator carry a qualified low power station in lieu of a local commercial television station; and

(B) if the cable operator elects to carry an affiliate of a broadcast network (as such term is defined by the Commission by regulation), such cable operator shall carry the affiliate of such broadcast network whose city of license reference point, as defined in section 76.53 of title 47, Code of Federal Regulations (in effect on January 1, 1991), or any successor regulation thereto, is closest to the principal headend of the cable system.

(3) Content to be carried

(A) A cable operator shall carry in its entirety, on the cable system of that operator, the primary video, accompanying audio, and line 21 closed caption transmission of each of the local commercial television stations carried on the cable system and, to the extent technically feasible, program-related material carried in the vertical blanking interval or on subcarriers. Retransmission of other material in the vertical blanking interval or other non-program-related material (including teletext and other subscription and advertiser-supported information services) shall be at the discretion of the cable operator. Where appropriate and feasible, operators may delete signal enhancements, such as ghost-canceling, from the broadcast signal and employ such enhancements at the system headend or headends.

(B) The cable operator shall carry the entirety of the program schedule of any television station carried on the cable system unless carriage of specific programming is prohibited, and other programming authorized to be substituted, under section 76.67 or subpart F of part 76 of title 47, Code of Federal Regulations (as in effect on January 1, 1991), or any successor regulations thereto.

(4) Signal quality

(A) Nondegradation; technical specifications

The signals of local commercial television stations that a cable operator carries shall be carried without material degradation. The Commission shall adopt carriage standards to ensure that, to the extent technically feasible, the quality of signal processing and carriage provided by a cable system for the carriage of local commercial television stations will be no less than that provided by the system for carriage of any other type of signal.
