§ 24902. Goals and requirements

(a) MANAGING COSTS AND REVENUES.—Amtrak shall manage its operating costs, pricing policies, and other factors with the goal of having revenues derived each fiscal year from providing intercity rail passenger transportation over the Northeast Corridor route between the District of Columbia and Boston, Massachusetts, equal at least the operating costs of providing that transportation in that fiscal year.

(b) PRIORITIES IN SELECTING AND SCHEDULING PROJECTS.—When selecting and scheduling specific projects, Amtrak shall apply the following considerations, in the following order of priority:

(1) Safety-related items should be completed before other items because the safety of the passengers and users of the Northeast Corridor is paramount.

(2) Activities that benefit the greatest number of passengers should be completed before activities involving fewer passengers.

(3) Reliability of intercity rail passenger transportation must be emphasized.

(4) Trip-time requirements of this section must be achieved to the extent compatible with the priorities referred to in paragraphs (1)–(3) of this subsection.

(5) Improvements that will pay for the investment by achieving lower operating or maintenance costs should be carried out before other improvements.

(6) Construction operations should be scheduled so that the fewest possible passengers are inconvenienced, transportation is maintained, and the on-time performance of Northeast Corridor commuter rail passenger and rail freight transportation is optimized.

(7) Planning should focus on completing activities that will provide immediate benefits to users of the Northeast Corridor.
