

Energy Information Administration, complete—

(A) an assessment of trends in global demand for helium, including the isotope helium-3;

(B) a 10-year forecast of domestic demand for helium across all sectors, including scientific and medical research, commercial, manufacturing, space technologies, cryogenics, and national defense; and

(C) an inventory of medical, scientific, industrial, commercial, and other uses of helium in the United States, including Federal uses, that identifies the nature of the helium use, the amounts required, the technical and commercial viability of helium recapture and recycling in that use, and the availability of material substitutes wherever possible; and

(4) submit to the Committee on Energy and Natural Resources of the Senate and the Committee on Natural Resources of the House of Representatives a report describing the results of the assessments required under this paragraph.

**(b) Authorization of appropriations**

There is authorized to be appropriated to carry out this section \$1,000,000.

(Mar. 3, 1925, ch. 426, §16, as added Pub. L. 113–40, §6(3), Oct. 2, 2013, 127 Stat. 542.)

PRIOR PROVISIONS

A prior section 167n, act Mar. 3, 1925, ch. 426, §16, as added Pub. L. 86–777, §2, Sept. 13, 1960, 74 Stat. 923, directed the Secretary of the Interior to make annual reports to Congress, prior to repeal by Pub. L. 105–362, title IX, §901(q), Nov. 10, 1998, 112 Stat. 3291.

**§ 167o. Low-Btu gas separation and helium conservation**

**(a) Authorization**

The Secretary of Energy shall support programs of research, development, commercial application, and conservation (including the programs described in subsection (b))—

(1) to expand the domestic production of low-Btu gas and helium resources;

(2) to separate and capture helium from natural gas streams; and

(3) to reduce the venting of helium and helium-bearing low-Btu gas during natural gas exploration and production.

**(b) Programs**

**(1) Membrane technology research**

The Secretary of Energy, in consultation with other appropriate agencies, shall support a civilian research program to develop advanced membrane technology that is used in the separation of low-Btu gases, including technologies that remove helium and other constituent gases that lower the Btu content of natural gas.

**(2) Helium separation technology**

The Secretary of Energy shall support a research program to develop technologies for separating, gathering, and processing helium in low concentrations that occur naturally in geological reservoirs or formations, including—

(A) low-Btu gas production streams; and

(B) technologies that minimize the atmospheric venting of helium gas during natural gas production.

**(3) Industrial helium program**

The Secretary of Energy, working through the Advanced Manufacturing Office of the Department of Energy, shall carry out a research program—

(A) to develop low-cost technologies and technology systems for recycling, reprocessing, and reusing helium for all medical, scientific, industrial, commercial, aerospace, and other uses of helium in the United States, including Federal uses; and

(B) to develop industrial gathering technologies to capture helium from other chemical processing, including ammonia processing.

**(c) Authorization of appropriations**

There is authorized to be appropriated to carry out this section \$3,000,000.

(Mar. 3, 1925, ch. 426, §17, as added Pub. L. 113–40, §6(3), Oct. 2, 2013, 127 Stat. 542.)

PRIOR PROVISIONS

A prior section 17 of act Mar. 3, 1925, ch. 426, was redesignated section 20 and is set out as a Separability note under section 167 of this title.

**§ 167p. Helium-3 separation**

**(a) Interagency cooperation**

The Secretary shall cooperate with the Secretary of Energy, or a designee, on any assessment or research relating to the extraction and refining of the isotope helium-3 from crude helium and other potential sources, including—

(1) gas analysis; and

(2) infrastructure studies.

**(b) Feasibility study**

The Secretary, in consultation with the Secretary of Energy, or a designee, may carry out a study to assess the feasibility of—

(1) establishing a facility to separate the isotope helium-3 from crude helium; and

(2) exploring other potential sources of the isotope helium-3.

**(c) Report**

Not later than 1 year after October 2, 2013, the Secretary shall submit to the Committee on Energy and Natural Resources of the Senate and the Committee on Natural Resources of the House of Representatives a report that contains a description of the results of the assessments conducted under this section.

**(d) Authorization of appropriations**

There is authorized to be appropriated to carry out this section \$1,000,000.

(Mar. 3, 1925, ch. 426, §18, as added Pub. L. 113–40, §6(3), Oct. 2, 2013, 127 Stat. 543.)

**§ 167q. Federal agency helium acquisition strategy**

In anticipation of the implementation of Phase D described in section 167d(d) of this title, and not later than 2 years after October 2, 2013,
