Such requirements shall be designed—

"(1) to minimize unnecessary redundancy between counter-drug detection and monitoring systems;

"(2) to grant priority to assets and technologies of the Department of Defense that are already in existence or that would require little additional development to be available for use in the performance of such mission;

"(3) to promote commonality and interoperability between counter-drug detection and monitoring systems in a cost-effective manner; and

"(4) to maximize the potential of using counter-drug detection and monitoring systems for other defense missions whenever practicable.

The plan shall include an estimate by the Secretary of the full cost to implement the plan, including the cost to develop, procure, operate, and maintain equipment used in counter-drug detection and monitoring activities performed under the plan and training and personnel costs associated with such activities.
