PART A—GENERAL PROGRAMS

§ 1665. Definitions

In this part:

(1) Alcohol-related neurodevelopmental disorders; ARND

The term “alcohol-related neurodevelopmental disorders” or “ARND” means, with a history of maternal alcohol consumption during pregnancy, central nervous system abnormalities, which may range from minor intellectual deficits and developmental delays to mental retardation. ARND children may have behavioral problems, learning disabilities, problems with executive functioning, and attention disorders. The neurological defects of ARND may be as severe as FAS, but facial anomalies and other physical characteristics are not present in ARND, thus making diagnosis difficult.

(2) Assessment

The term “assessment” means the systematic collection, analysis, and dissemination of information on health status, health needs, and health problems.

(3) Behavioral health aftercare

The term “behavioral health aftercare” includes those activities and resources used to support recovery following inpatient, residential, intensive substance abuse, or mental health outpatient or outpatient treatment.
