

versely affect the thermal features of Yellowstone National Park, the Secretary shall include in the study required under subsection (a) of this section recommendations regarding the acquisition of the geothermal rights necessary to protect such thermal resources and features.”

### § 1027. Land subject to prohibition on leasing

The Secretary shall not issue any lease under this chapter on those lands subject to the prohibition provided under section 226-3 of this title. (Pub. L. 91-581, §29, as added Pub. L. 100-443, §5(d), Sept. 22, 1988, 102 Stat. 1769; amended Pub. L. 109-58, title II, §236(27), Aug. 8, 2005, 119 Stat. 673.)

#### AMENDMENTS

2005—Pub. L. 109-58 inserted section catchline.

### § 1028. Hot dry rock geothermal energy

#### (a) USGS program

The Secretary of the Interior, acting through the United States Geological Survey, and in consultation with the Secretary of Energy, shall establish a cooperative Government-private sector program with respect to hot dry rock geothermal energy resources on public lands (as such term is defined in section 1702(e) of title 43) and lands managed by the Department of Agriculture, other than any such public or other lands that are withdrawn from geothermal leasing. Such program shall include, but shall not be limited to, activities to identify, select, and classify those areas throughout the United States that have a high potential for hot dry rock geothermal energy production and activities to develop and disseminate information regarding the utilization of such areas for hot dry rock energy production. Such information may include information regarding field test processes and techniques for assuring that hot dry rock geothermal energy development projects are developed in an economically feasible manner without adverse environmental consequences. Utilizing the information developed by the Secretary, together with information developed in connection with other related programs carried out by other Federal agencies, the Secretary, acting through the United States Geological Survey, may also enter into contracts and cooperative agreements with any public or private entity to provide assistance to any such entity to enable such entity to carry out additional projects with respect to the utilization of hot dry rock geothermal energy resources which will further the purposes of this section.

#### (b) Authorization of appropriations

There are authorized to be appropriated such sums as may be necessary<sup>1</sup> to carry out this section.

(Pub. L. 102-486, title XXV, §2501, Oct. 24, 1992, 106 Stat. 3101.)

#### CODIFICATION

Section was enacted as part of the Energy Policy Act of 1992, and not as part of the Geothermal Steam Act of 1970 which comprises this chapter.

<sup>1</sup> So in original. Probably should be “necessary”.

## CHAPTER 24—GEOTHERMAL ENERGY RESEARCH, DEVELOPMENT, AND DEMONSTRATION

- Sec.  
1101. Congressional findings.  
1102. Definitions.

### SUBCHAPTER I—GEOTHERMAL ENERGY COORDINATION AND MANAGEMENT PROJECT

1121. Formation of Project.  
1122. Program definition.  
1123. Resource inventory and assessment program.  
1124. Research and development.  
1125. Geothermal demonstration plants and projects.  
1126. Scientific and technical education.

### SUBCHAPTER II—LOAN GUARANTIES

1141. Establishment of loan guaranty program.  
1142. Payment of guaranteed obligation by Secretary of Energy.  
1143. Period of guaranties and interest assistance.  
1144. Geothermal Resources Development Fund.  
1145. Community impact assistance functions of Secretary of Energy.  
1146. Approval or disapproval of loan guarantee applications.  
1147. Application of national environmental policy provisions.

### SUBCHAPTER III—GENERAL PROVISIONS

1161. Protection of environment.  
1162. Final report to President and Congress on terminated projects.  
1163. Transfer of functions.  
1164. Authorization of appropriations.

### § 1101. Congressional findings

The Congress hereby finds that—

(1) the Nation is currently suffering a critical shortage of environmentally acceptable forms of energy;

(2) the inadequate organizational structures and levels of funding for energy research have limited the Nation’s current and future options for meeting energy needs;

(3) electric energy is a clean and convenient form of energy at the location of its use and is the only practicable form of energy in some modern applications, but the demand for electric energy in every region of the United States is taxing all of the alternative energy sources presently available and is projected to increase; some of the sources available for electric power generation are already in short supply, and the development and use of other sources presently involve undesirable environmental impacts;

(4) the Nation’s critical energy problems can be solved only if a national commitment is made to dedicate the necessary financial resources, and enlist the cooperation of the private and public sectors, in developing geothermal resources and other nonconventional sources of energy;

(5) the conventional geothermal resources which are presently being used have limited total potential; but geothermal resources which are different from those presently being used, and which have extremely large energy content, are known to exist;

(6) some geothermal resources contain energy in forms other than heat; examples are methane and extremely high pressures available upon release as kinetic energy;
