PART K—STRENGTHENING AMERICA’S FAMILIES
BY PREVENTING VIOLENCE AGAINST WOMEN
AND CHILDREN**§ 12461. Findings**

Congress finds that—

- (1) the former United States Advisory Board on Child Abuse suggests that domestic violence may be the single major precursor to child abuse and neglect fatalities in this country;
- (2) studies suggest that as many as 10,000,000 children witness domestic violence every year;
- (3) studies suggest that among children and teenagers, recent exposure to violence in the home was a significant factor in predicting a child’s violent behavior;
- (4) a study by the Nurse-Family Partnership found that children whose parents did not participate in home visitation programs that provided coaching in parenting skills, advice and support, were almost 5 times more likely to be abused in their first 2 years of life;
- (5) a child’s exposure to domestic violence seems to pose the greatest independent risk for being the victim of any act of partner violence as an adult;
- (6) children exposed to domestic violence are more likely to believe that using violence is an effective means of getting one’s needs met and managing conflict in close relationships;
- (7) children exposed to abusive parenting, harsh or erratic discipline, or domestic violence are at increased risk for juvenile crime; and

(8) in a national survey of more than 6,000 American families, 50 percent of men who frequently assaulted their wives also frequently abused their children.
