CONGRESSIONAL FINDINGS

Pub. L. 100-556, title I, §101, Oct. 28, 1988, 102 Stat. 2779, provided that: “The Congress finds that—

“(1) plastic ring carrier devices have been found in large quantities in the marine environment;

“(2) fish and wildlife have been known to have become entangled in plastic ring carriers;

“(3) nondegradable plastic ring carrier devices can remain intact in the marine environment for decades, posing a threat to fish and wildlife; and

“(4) 16 States have enacted laws requiring that plastic ring carrier devices be made from degradable material in order to reduce litter and to protect fish and wildlife.”

**§ 6914b-1. Regulation of plastic ring carriers**

Not later than 24 months after October 28, 1988 (unless the Administrator of the Environmental Protection Agency determines that it is not feasible or that the byproducts of degradable regulated items present a greater threat to the environment than nondegradable regulated items), the Administrator of the Environmental Protection Agency shall require, by regulation, that any regulated item intended for use in the United States shall be made of naturally degradable material which, when discarded, decomposes within a period established by such regulation. The period within which decomposition must occur after being discarded shall be the shortest period of time consistent with the intended use of the item and the physical integrity required for such use. Such regulation shall allow a reasonable time for affected parties to come into compliance, including the use of existing inventories.
