§ 44737.¹ Special rule for certain aircraft operations.²

(a) IN GENERAL.—The operator of an aircraft with a special airworthiness certification in the experimental category may—

(1) operate the aircraft for the purpose of conducting a space support vehicle flight (as that term is defined in chapter³ 50902 of title 51); and

(2) conduct such flight under such certificate carrying persons or property for compensation or hire—

(B) without obtaining a certificate issued by the Administrator to conduct air carrier or commercial operations.

(b) LIMITED APPLICABILITY.—Subsection (a) shall apply only to a space support vehicle flight that satisfies each of the following:

(1) (1)⁴ The aircraft conducting the space support vehicle flight—

(A) takes flight and lands at a single site that is operated by an entity licensed for operation under chapter 509 of title 51;

(B) is owned or operated by a launch or reentry vehicle operator licensed under chapter 509 of title 51, or on behalf of a launch or reentry vehicle operator licensed under chapter 509 of title 51;

(D) is used only to simulate space flight conditions in support of—

(i) training for potential space flight participants, government astronauts, or crew (as those terms are defined in chapter 509 of title 51);

(ii) the testing of hardware to be used in space flight; or

(iii) research and development tasks, which require the unique capabilities of the aircraft conducting the flight.

(c) RULES OF CONSTRUCTION.—

(1) SPACE SUPPORT VEHICLES.—Section 44711(a)(1) shall not apply to a person conducting a space support vehicle flight under this

section only to the extent that a term of the experimental certificate under which the person is operating the space support vehicle prohibits the carriage of persons or property for compensation or hire.

(2) AUTHORITY OF ADMINISTRATOR.—Nothing in this section shall be construed to limit the authority of the Administrator of the Federal Aviation Administration to exempt a person from a regulatory prohibition on the carriage of persons or property for compensation or hire subject to terms and conditions other than those described in this section⁵

§ 44801. Definitions

In this chapter, the following definitions apply:

(1) ACTIVELY TETHERED UNMANNED AIRCRAFT SYSTEM.—The term “actively tethered unmanned aircraft system” means an unmanned aircraft system in which the unmanned aircraft component—

(A) weighs 4.4 pounds or less, including payload but not including the tether;

(B) is physically attached to a ground station with a taut, appropriately load-rated tether that provides continuous power to the unmanned aircraft and is unlikely to be separated from the unmanned aircraft; and

(C) is controlled and retrieved by such ground station through physical manipulation of the tether.

(2) APPROPRIATE COMMITTEES OF CONGRESS.—The term “appropriate committees of Con-
