

port personnel and management, governmental and nongovernmental emergency response providers, and the private sector; and (G) followed by remedial action in response to lessons learned; and

(2) assists State and local governments and facilities in designing, implementing, and evaluating exercises that—

(A) conform to the requirements of paragraph (1); and

(B) are consistent with any applicable Area Maritime Transportation Security Plan and State or Urban Area Homeland Security Plan.

**(c) Improvement plan**

The Secretary shall establish a port security exercise improvement plan process to—

(1) identify and analyze each port security exercise for lessons learned and best practices;

(2) disseminate lessons learned and best practices to participants in the Exercise Program;

(3) monitor the implementation of lessons learned and best practices by participants in the Exercise Program; and

(4) conduct remedial action tracking and long-term trend analysis.

(Pub. L. 109–347, title I, § 114, Oct. 13, 2006, 120 Stat. 1896.)

**§ 913. Facility exercise requirements**

The Secretary of the Department in which the Coast Guard is operating shall require each high risk facility to conduct live or full-scale exercises described in section 105.220(c) of title 33, Code of Federal Regulations, not less frequently than once every 2 years, in accordance with the facility security plan required under section 70103(c) of title 46.

(Pub. L. 109–347, title I, § 115, Oct. 13, 2006, 120 Stat. 1897.)

PART B—PORT OPERATIONS

**§ 921. Domestic radiation detection and imaging**

**(a) Scanning containers**

Subject to section 1318 of title 19, not later than December 31, 2007, all containers entering the United States through the 22 ports through which the greatest volume of containers enter the United States by vessel shall be scanned for radiation. To the extent practicable, the Secretary shall deploy next generation radiation detection technology.

**(b) Strategy**

The Secretary shall develop a strategy for the deployment of radiation detection capabilities that includes—

(1) a risk-based prioritization of ports of entry at which radiation detection equipment will be deployed;

(2) a proposed timeline of when radiation detection equipment will be deployed at each port of entry identified under paragraph (1);

(3) the type of equipment to be used at each port of entry identified under paragraph (1), including the joint deployment and utilization of radiation detection equipment and non-intrusive imaging equipment;

(4) standard operating procedures for examining containers with such equipment, including sensor alarming, networking, and communications and response protocols;

(5) operator training plans;

(6) an evaluation of the environmental health and safety impacts of nonintrusive imaging technology and a radiation risk reduction plan, in consultation with the Nuclear Regulatory Commission, the Occupational Safety and Health Administration, and the National Institute for Occupational Safety and Health, that seeks to minimize radiation exposure of workers and the public to levels as low as reasonably achievable;

(7) the policy of the Department for using nonintrusive imaging equipment in tandem with radiation detection equipment; and

(8) a classified annex that—

(A) details plans for covert testing; and

(B) outlines the risk-based prioritization of ports of entry identified under paragraph (1).

**(c) Standards**

The Secretary, acting through the Director for Domestic Nuclear Detection<sup>1</sup> and in collaboration with the National Institute of Standards and Technology, shall publish technical capability standards and recommended standard operating procedures for the use of nonintrusive imaging and radiation detection equipment in the United States. Such standards and procedures—

(1) should take into account relevant standards and procedures utilized by other Federal departments or agencies as well as those developed by international bodies; and

(2) shall not be designed so as to endorse specific companies or create sovereignty conflicts with participating countries.

**(d) Implementation**

Not later than 3 years after October 13, 2006, the Secretary shall fully implement the strategy developed under subsection (b).

**(e) Expansion to other United States ports of entry**

**(1) In general**

As soon as practicable after—

(A) implementation of the program for the examination of containers for radiation at ports of entry described in subsection (a); and

(B) submission of the strategy developed under subsection (b),

but not later than December 31, 2008, the Secretary shall expand the strategy developed under subsection (b), in a manner consistent with the requirements of subsection (b), to provide for the deployment of radiation detection capabilities at all other United States ports of entry not covered by the strategy developed under subsection (b).

**(2) Risk assessment**

In expanding the strategy under paragraph (1), the Secretary shall identify and assess the risks to those other ports of entry in order to

<sup>1</sup> See Change of Name note below.
