

this title to reflect renumbering of corresponding section of original act.

FINDINGS

Pub. L. 102-587, title III, §3002, Nov. 4, 1992, 106 Stat. 5060, provided that: “The Congress finds the following:

“(1) Current stranding network participants have performed an undeniably valuable and ceaseless job of responding to marine mammal strandings over the last 15 years.

“(2) Insufficient understanding of the connection between marine mammal health and the physical, chemical, and biological parameters of their environment prevents an adequate understanding of the causes of marine mammal unusual mortality events.

“(3) An accurate assessment of marine mammal health, health trends in marine mammal populations in the wild, and causes of marine mammal unusual mortality events cannot be made without adequate reference data on marine mammals and the environment in which they live.

“(4) A systematic assessment of the sources, presence, levels, and effects of potentially harmful contaminants on marine mammals would provide a better understanding of some of the causes of marine mammal unusual mortality events and may serve as an indicator of the general health of our coastal and marine environments.

“(5) Responses to marine mammal unusual mortality events are often uncoordinated, due to the lack of sufficient contingency planning.

“(6) Standardized methods for the reporting of dying, dead, or otherwise incapacitated marine mammals in the wild would greatly assist in the determination of the causes of marine mammal unusual mortality events and enhance general knowledge of marine mammal species.

“(7) A formal system for collection, preparation, and archiving of, and providing access to, marine mammal tissues will enhance efforts to investigate the health of marine mammals and health trends of marine mammal populations, and to develop reference data.

“(8) Information on marine mammals, including results of analyses of marine mammal tissues, should be broadly available to the scientific community, including stranding network participants, through a marine mammal data base.”

§ 1421a. Determination; data collection and dissemination

(a) Determination for release

The Secretary shall, in consultation with the Secretary of the Interior, the Marine Mammal Commission, and individuals with knowledge and experience in marine science, marine mammal science, marine mammal veterinary and husbandry practices, and marine conservation, including stranding network participants, develop objective criteria, after an opportunity for public review and comment, to provide guidance for determining at what point a rehabilitated marine mammal is releasable to the wild.

(b) Collection

The Secretary shall, in consultation with the Secretary of the Interior, collect and update, periodically, existing information on—

(1) procedures and practices for—

(A) rescuing and rehabilitating stranded marine mammals, including criteria used by stranding network participants, on a species-by-species basis, for determining at what point a marine mammal undergoing rescue and rehabilitation is returnable to the wild; and

(B) collecting, preserving, labeling, and transporting marine mammal tissues for physical, chemical, and biological analyses;

(2) appropriate scientific literature on marine mammal health, disease, and rehabilitation;

(3) strandings, which the Secretary shall compile and analyze, by region, to monitor species, numbers, conditions, and causes of illnesses and deaths of stranded marine mammals; and

(4) other life history and reference level data, including marine mammal tissue analyses, that would allow comparison of the causes of illness and deaths in stranded marine mammals with physical, chemical, and biological environmental parameters.

(c) Availability

The Secretary shall make information collected under this section available to stranding network participants and other qualified scientists.

(Pub. L. 92-522, title IV, §402, formerly title III, §302, as added Pub. L. 102-587, title III, §3003(a), Nov. 4, 1992, 106 Stat. 5061; renumbered title IV, §402, Pub. L. 103-238, §24(b), Apr. 30, 1994, 108 Stat. 565.)

IMPLEMENTATION

Pub. L. 102-587, title III, §3003(b), Nov. 4, 1992, 106 Stat. 5066, provided that: “The Secretary of Commerce shall—

“(1) in accordance with section 302(a) and (b) [now 402(a), (b)] of the Marine Mammal Protection Act of 1972 [16 U.S.C. 1421a(a), (b)], as amended by this Act, and not later than 24 months after the date of enactment of this Act [Nov. 4, 1992]—

“(A) develop and implement objective criteria to determine at what point a marine mammal undergoing rehabilitation is returnable to the wild; and

“(B) collect and make available information on marine mammal health and health trends; and

“(2) in accordance with section 304(b) [now 404(b)] of the Marine Mammal Protection Act of 1972 [16 U.S.C. 1421c(b)], as amended by this Act, issue a detailed contingency plan for responding to any unusual mortality event—

“(A) in proposed form by not later than 18 months after the date of enactment of this Act; and

“(B) in final form by not later than 24 months after the date of enactment of this Act.”

§ 1421b. Stranding response agreements

(a) In general

The Secretary may enter into an agreement under section 1382(c) of this title with any person to take marine mammals under section 1379(h)(1) of this title in response to a stranding.

(b) Required provision

An agreement authorized by subsection (a) shall—

(1) specify each person who is authorized to perform activities under the agreement; and

(2) specify any terms and conditions under which a person so specified may delegate that authority to another person.

(c) Review

The Secretary shall periodically review agreements under section 1382(c) of this title that are entered into pursuant to this subchapter, for performance adequacy and effectiveness.
