

able at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

BARACK OBAMA.

PRESIDENTIAL CERTIFICATION AUTHORIZING SECURITY ASSISTANCE TO EAST TIMOR

Determination of President of the United States, No. 2003-19, Mar. 28, 2003, 68 F.R. 16167, provided:

Memorandum for the Secretary of State

Pursuant to the authority vested in me by the Constitution and laws of the United States, including section 637(b)(2) of the Foreign Relations Authorization Act, Fiscal Year 2003 [Pub. L. 107-228, §637(b)(2), set out above], I hereby certify that East Timor has established an independent armed forces; and that the provision to East Timor of military assistance in the form of excess defense articles and international military education and training is in the national security interests of the United States, and will promote both human rights in East Timor and the professionalization of the armed forces of East Timor.

You are hereby authorized and directed to report this certification, accompanying memorandum of justification [not set out in the Code], and report on East Timor security assistance to the Congress, and to arrange for the publication of this memorandum in the Federal Register.

GEORGE W. BUSH.

**§ 2656a. Congressional declaration of findings of major significance of modern scientific and technological advances in foreign policy**

The Congress finds that—

(1) the consequences of modern scientific and technological advances are of such major significance in United States foreign policy that understanding and appropriate knowledge of modern science and technology by officers and employees of the United States Government are essential in the conduct of modern diplomacy;

(2) many problems and opportunities for development in modern diplomacy lie in scientific and technological fields;

(3) in the formulation, implementation, and evaluation of the technological aspects of United States foreign policy, the United States Government should seek out and consult with both public and private industrial, academic, and research institutions concerned with modern technology; and

(4) the effective use of science and technology in international relations for the mutual benefit of all countries requires the development and use of the skills and methods of long-range planning.

(Pub. L. 95-426, title V, §501, Oct. 7, 1978, 92 Stat. 982.)

**§ 2656b. Congressional declaration of policy regarding consequences of science and technology on conduct of foreign policy**

In order to maximize the benefits and to minimize the adverse consequences of science and technology in the conduct of foreign policy, the Congress declares the following to be the policy of the United States:

(1) Technological opportunities, impacts, changes, and threats should be anticipated and assessed, and appropriate measures should be implemented to influence such technological

developments in ways beneficial to the United States and other countries.

(2) The mutually beneficial applications of technology in bilateral and multilateral agreements and activities involving the United States and foreign countries or international organizations should be recognized and supported as an important element of United States foreign policy.

(3) The United States Government should implement appropriate measures to insure that individuals are trained in the use of science and technology as an instrument in international relations and that officers and employees of the United States Government engaged in formal and informal exchanges of scientific and technical information, personnel, and hardware are knowledgeable in international affairs.

(4) In recognition of the environmental and technological factors that change relations among countries and in recognition of the growing interdependence between the domestic and foreign policies and programs of the United States, United States foreign policy should be continually reviewed by the executive and legislative branches of the Government to insure appropriate and timely application of science and technology to the conduct of United States foreign policy.

(5) Federally supported international science and technology agreements should be negotiated to ensure that—

(A) intellectual property rights are properly protected; and

(B) access to research and development opportunities and facilities, and the flow of scientific and technological information, are, to the maximum extent practicable, equitable and reciprocal.

(Pub. L. 95-426, title V, §502, Oct. 7, 1978, 92 Stat. 982; Pub. L. 100-418, title V, §5171(a), Aug. 23, 1988, 102 Stat. 1452.)

**Editorial Notes**

AMENDMENTS

1988—Par. (5). Pub. L. 100-418 added par. (5).

**§ 2656c. Responsibilities of President**

**(a) Identification, evaluation and initiation of scientific and technological developments**

The President, in consultation with the Director of the Office of Science and Technology Policy and other officials whom the President considers appropriate, shall—

(1) notwithstanding any other provision of law, insure that the Secretary of State is informed and consulted before any agency of the United States Government takes any major action, primarily involving science or technology, with respect to any foreign government or international organization;

(2) identify and evaluate elements of major domestic science and technology programs and activities of the United States Government with significant international implications;

(3) identify and evaluate international scientific or technological developments with significant implications for domestic pro-
