CHAPTER 35—ARTIFICIAL REEFS

Sec.

2101.	Congressional statement of findings and purpose.
2102.	Establishment of standards.
2103.	National artificial reef plan.
2104.	Permits for construction and management of artificial reefs.
2105.	Definitions.
2106.	Savings clauses.

§ 2101. Congressional statement of findings and purpose

(a) The Congress finds that—

(1) although fishery products provide an important source of protein and industrial products for United States consumption, United States fishery production annually falls far short of satisfying United States demand;

(2) overfishing and the degradation of vital fishery resource habitats have caused a reduction in the abundance and diversity of United States fishery resources;

(3) escalated energy costs have had a negative effect on the economics of United States commercial and recreational fisheries;

(4) commercial and recreational fisheries are a prominent factor in United States coastal

economies and the direct and indirect returns to the United States economy from commercial and recreational fishing expenditures are threefold; and

(5) properly designed, constructed, and located artificial reefs in waters covered under this chapter can enhance the habitat and diversity of fishery resources; enhance United States recreational and commercial fishing opportunities; increase the production of fishery products in the United States; increase the energy efficiency of recreational and commercial fisheries; and contribute to the United States and coastal economies.

(b) The purpose of this chapter is to promote and facilitate responsible and effective efforts to establish artificial reefs in waters covered under this chapter.

SHORT TITLE

Pub. L. 98-623, title II, § 201, Nov. 8, 1984, 98 Stat. 3394, provided that: “This title [enacting this chapter and section 1220d of Title 16, Conservation, and amending sections 1220 to 1220c of Title 16] may be cited as the ‘National Fishing Enhancement Act of 1984.’”

§ 2102. Establishment of standards

Based on the best scientific information available, artificial reefs in waters covered under this chapter shall be sited and constructed, and subsequently monitored and managed in a manner which will—

(1) enhance fishery resources to the maximum extent practicable;

(2) facilitate access and utilization by United States recreational and commercial fishermen;

(3) minimize conflicts among competing uses of waters covered under this chapter and the resources in such waters;

(4) minimize environmental risks and risks to personal health and property; and

(5) be consistent with generally accepted principles of international law and shall not create any unreasonable obstruction to navigation.
