

**(2) Power delivery research initiative**

There are authorized to be appropriated to the Secretary to carry out the Power Delivery Research Initiative under subsection<sup>1</sup> 16215(e) of this title such sums as may be necessary for each of fiscal years 2007 through 2009.

**(c) Micro-cogeneration energy technology**

From amounts authorized under subsection (b), \$20,000,000 for each of fiscal years 2007 and 2008 shall be available to carry out activities under section 16213 of this title.

**(d) High-voltage transmission lines**

From amounts authorized under subsection (b), \$2,000,000 for fiscal year 2007 shall be available to carry out activities under section 16215(g) of this title.

(Pub. L. 109–58, title IX, §921, Aug. 8, 2005, 119 Stat. 864.)

**§ 16212. High power density industry program****(a) In general**

The Secretary shall establish a comprehensive research, development, demonstration, and commercial application to improve the energy efficiency of high power density facilities, including data centers, server farms, and telecommunications facilities.

**(b) Technologies**

The program shall consider technologies that provide significant improvement in thermal controls, metering, load management, peak load reduction, or the efficient cooling of electronics.

(Pub. L. 109–58, title IX, §922, Aug. 8, 2005, 119 Stat. 864.)

**§ 16213. Micro-cogeneration energy technology****(a) In general**

The Secretary shall make competitive, merit-based grants to consortia for the development of micro-cogeneration energy technology.

**(b) Uses**

The consortia shall explore—

- (1) the use of small-scale combined heat and power in residential heating appliances;
- (2) the use of excess power to operate other appliances within the residence; and
- (3) the supply of excess generated power to the power grid.

(Pub. L. 109–58, title IX, §923, Aug. 8, 2005, 119 Stat. 865.)

**§ 16214. Distributed energy technology demonstration programs****(a) Coordinating consortia program**

The Secretary may provide financial assistance to coordinating consortia of interdisciplinary participants for demonstrations designed to accelerate the use of distributed energy technologies (such as fuel cells, microturbines, reciprocating engines, thermally activated technologies, and combined heat and power systems) in high-energy intensive commercial applications.

<sup>1</sup> So in original. Probably should be “section”.

**(b) Small-scale portable power program****(1) In general**

The Secretary shall—

(A) establish a research, development, and demonstration program to develop working models of small scale portable power devices; and

(B) to the fullest extent practicable, identify and utilize the resources of universities that have shown expertise with respect to advanced portable power devices for either civilian or military use.

**(2) Organization**

The universities identified and utilized under paragraph (1)(B) are authorized to establish an organization to promote small scale portable power devices.

**(3) Definition**

For purposes of this subsection, the term “small scale portable power device” means a field-deployable portable mechanical or electromechanical device that can be used for applications such as communications, computation, mobility enhancement, weapons systems, optical devices, cooling, sensors, medical devices, and active biological agent detection systems.

(Pub. L. 109–58, title IX, §924, Aug. 8, 2005, 119 Stat. 865.)

**§ 16215. Electric transmission and distribution programs****(a) Program**

The Secretary shall establish a comprehensive research, development, and demonstration program to ensure the reliability, efficiency, and environmental integrity of electrical transmission and distribution systems, which shall include—

(1) advanced energy delivery technologies, energy storage technologies, materials, and systems, giving priority to new transmission technologies, including composite conductor materials and other technologies that enhance reliability, operational flexibility, or power-carrying capability;

(2) advanced grid reliability and efficiency technology development;

(3) technologies contributing to significant load reductions;

(4) advanced metering, load management, and control technologies;

(5) technologies to enhance existing grid components;

(6) the development and use of high-temperature superconductors to—

(A) enhance the reliability, operational flexibility, or power-carrying capability of electric transmission or distribution systems; or

(B) increase the efficiency of electric energy generation, transmission, distribution, or storage systems;

(7) integration of power systems, including systems to deliver high-quality electric power, electric power reliability, and combined heat and power;

(8) supply of electricity to the power grid by small scale, distributed and residential-based power generators;

(9) the development and use of advanced grid design, operation, and planning tools;

(10) the development of cost-effective technologies that enable two-way information and power flow between distributed energy resources and the electric grid;

(11) the development of technologies and concepts that enable interoperability between distributed energy resources and other behind-the-meter devices and the electric grid;

(12) any other infrastructure technologies, as appropriate; and

(13) technology transfer and education.

**(b) Program plan**

**(1) In general**

Not later than 1 year after August 8, 2005, the Secretary, in consultation with other appropriate Federal agencies, shall prepare and submit to Congress a 5-year program plan to guide activities under this section.

**(2) Consultation**

In preparing the program plan, the Secretary shall consult with—

- (A) utilities;
- (B) energy service providers;
- (C) manufacturers;
- (D) institutions of higher education;
- (E) other appropriate State and local agencies;
- (F) environmental organizations;
- (G) professional and technical societies; and
- (H) any other persons the Secretary considers appropriate.

**(c) Implementation**

The Secretary shall consider implementing the program under this section using a consortium of participants from industry, institutions of higher education, and National Laboratories.

**(d) Report**

Not later than 2 years after the submission of the plan under subsection (b), the Secretary shall submit to Congress a report—

- (1) describing the progress made under this section; and
- (2) identifying any additional resources needed to continue the development and commercial application of transmission and distribution of infrastructure technologies.

**(e) Power delivery research initiative**

**(1) In general**

The Secretary shall establish a research, development, and demonstration initiative specifically focused on power delivery using components incorporating high temperature superconductivity.

**(2) Goals**

The goals of the Initiative shall be—

- (A) to establish world-class facilities to develop high temperature superconductivity power applications in partnership with manufacturers and utilities;
- (B) to provide technical leadership for establishing reliability for high temperature

superconductivity power applications, including suitable modeling and analysis;

(C) to facilitate the commercial transition toward direct current power transmission, storage, and use for high power systems using high temperature superconductivity; and

(D) to facilitate the integration of very low impedance high temperature superconducting wires and cables in existing electric networks to improve system performance, power flow control, and reliability.

**(3) Inclusions**

The Initiative shall include—

(A) feasibility analysis, planning, research, and design to construct demonstrations of superconducting links in high power, direct current, and controllable alternating current transmission systems;

(B) public-private partnerships to demonstrate deployment of high temperature superconducting cable into testbeds simulating a realistic transmission grid and under varying transmission conditions, including actual grid insertions; and

(C) testbeds developed in cooperation with National Laboratories, industries, and institutions of higher education to—

- (i) demonstrate those technologies;
- (ii) prepare the technologies for commercial introduction; and
- (iii) address cost or performance roadblocks to successful commercial use.

**(f) Transmission and distribution grid planning and operations initiative**

**(1) In general**

The Secretary shall establish a research, development, and demonstration initiative specifically focused on tools needed to plan, operate, and expand the transmission and distribution grids in the presence of competitive market mechanisms for energy, load demand, customer response, and ancillary services.

**(2) Goals**

The goals of the Initiative shall be—

(A)(i) to develop and use a geographically distributed center, consisting of institutions of higher education, and National Laboratories, with expertise and facilities to develop the underlying theory and software for power system application; and

(ii) to ensure commercial development in partnership with software vendors and utilities;

(B) to provide technical leadership in engineering and economic analysis for the reliability and efficiency of power systems planning and operations in the presence of competitive markets for electricity;

(C) to model, simulate, and experiment with new market mechanisms and operating practices to understand and optimize those new methods before actual use; and

(D) to provide technical support and technology transfer to electric utilities and other participants in the domestic electric industry and marketplace.

**(g) High-voltage transmission lines**

As part of the program described in subsection (a), the Secretary shall award a grant to a uni-

versity research program to design and test, in consultation with the Tennessee Valley Authority, state-of-the-art optimization techniques for power flow through existing high voltage transmission lines.

(Pub. L. 109–58, title IX, §925, Aug. 8, 2005, 119 Stat. 865; Pub. L. 116–260, div. Z, title VIII, §8004(a), Dec. 27, 2020, 134 Stat. 2583.)

#### AMENDMENTS

2020—Subsec. (a)(10) to (13). Pub. L. 116–260 added pars. (10) and (11) and redesignated former pars. (10) and (11) as (12) and (13), respectively.

#### COORDINATION OF EFFORTS

Pub. L. 116–260, div. Z, title VIII, §8006, Dec. 27, 2020, 134 Stat. 2586, provided that: “In carrying out the amendments made by this title [enacting sections 16236, 17014, 17384a, 17387, and 17388 of this title and amending this section, section 17384 of this title and sections 3501 and 3502 of Title 25, Indians], the Secretary [probably means Secretary of Energy] shall coordinate with relevant entities to the maximum extent practicable, including—

- “(1) electric utilities;
- “(2) private sector entities;
- “(3) representatives of all sectors of the electric power industry;
- “(4) transmission organizations;
- “(5) transmission owners and operators;
- “(6) distribution organizations;
- “(7) distribution asset owners and operators;
- “(8) State, Tribal, local, and territorial governments and regulatory authorities;
- “(9) academic institutions;
- “(10) the National Laboratories;
- “(11) other Federal agencies;
- “(12) nonprofit organizations;
- “(13) the Federal Energy Regulatory Commission;
- “(14) the North American Reliability Corporation;
- “(15) independent system operators; and
- “(16) programs and program offices at the Department.”

#### PART C—RENEWABLE ENERGY

### § 16231. Renewable energy

#### (a) In general

##### (1) Objectives

The Secretary shall conduct programs of renewable energy research, development, demonstration, and commercial application, including activities described in this part. Such programs shall take into consideration the following objectives:

- (A) Increasing the conversion efficiency of all forms of renewable energy through improved technologies.
- (B) Decreasing the cost of renewable energy generation and delivery.
- (C) Promoting the diversity of the energy supply.
- (D) Decreasing the dependence of the United States on foreign energy supplies.
- (E) Improving United States energy security.
- (F) Decreasing the environmental impact of energy-related activities.
- (G) Increasing the export of renewable generation equipment from the United States.

##### (2) Programs

##### (A) Geothermal

The Secretary shall conduct a program of research, development, demonstration, and

commercial application for geothermal energy. The program shall focus on developing improved technologies for reducing the costs of geothermal energy installations, including technologies for—

- (i) improving detection of geothermal resources;
- (ii) decreasing drilling costs;
- (iii) decreasing maintenance costs through improved materials;
- (iv) increasing the potential for other revenue sources, such as mineral production; and
- (v) increasing the understanding of reservoir life cycle and management.

##### (B) Hydropower

The Secretary shall conduct a program of research, development, demonstration, and commercial application for cost competitive technologies that enable the development of new and incremental hydropower capacity, adding to the diversity of the energy supply of the United States, including:

- (i) Fish-friendly large turbines.
- (ii) Advanced technologies to enhance environmental performance and yield greater energy efficiencies.

##### (C) Miscellaneous projects

The Secretary shall conduct research, development, demonstration, and commercial application programs for—

- (i) ocean energy, including wave energy;
- (ii) the combined use of renewable energy technologies with one another and with other energy technologies, including the combined use of wind power and coal gasification technologies;
- (iii) renewable energy technologies for cogeneration of hydrogen and electricity; and
- (iv) kinetic hydro turbines.

##### (b) Authorization of appropriations

There are authorized to be appropriated to the Secretary to carry out renewable energy research, development, demonstration, and commercial application activities, including activities authorized under this part—

- (1) \$632,000,000 for fiscal year 2007;
- (2) \$743,000,000 for fiscal year 2008;
- (3) \$852,000,000 for fiscal year 2009; and
- (4) \$963,000,000 for fiscal year 2010.

##### (c) Bioenergy

From the amounts authorized under subsection (b), there are authorized to be appropriated to carry out section 16232 of this title—

- (1) \$213,000,000 for fiscal year 2007, of which \$100,000,000 shall be for section 16232(d) of this title;
- (2) \$377,000,000 for fiscal year 2008, of which \$125,000,000 shall be for section 16232(d) of this title;
- (3) \$398,000,000 for fiscal year 2009, of which \$150,000,000 shall be for section 16232(d) of this title; and
- (4) \$419,000,000 for fiscal year 2010, of which \$150,000,000 shall be for section 16232(d) of this title.

##### (d) Administration

Of the funds authorized under subsection (c), not less than \$5,000,000 for each fiscal year shall be made available for grants to—
