§ 941h. Great Lakes monitoring, assessment, science, and research

(a) Definitions

In this section:

(1) Director

The term “Director” means the Director of the United States Geological Survey.

(2) Great Lakes Basin

The term “Great Lakes Basin” means the air, land, water, and living organisms in the United States within the drainage basin of the Saint Lawrence River at and upstream from the point at which such river and the Great Lakes become the international boundary between Canada and the United States.

(b) Findings

Congress finds the following:

(1) The Great Lakes support a diverse ecosystem, on which the vibrant and economically valuable Great Lakes fisheries depend.

(2) To continue successful fisheries management and coordination, as has occurred since signing of the Convention on Great Lakes Fisheries between the United States and Canada on September 10, 1954, management of the ecosystem and its fisheries require sound, reliable science, and the use of modern scientific technologies.

(3) Fisheries research is necessary to support multi-jurisdictional fishery management decisions and actions regarding recreational and sport fishing, commercial fisheries, tribal harvest, allocation decisions, and fish stocking activities.

(4) President Richard Nixon submitted, and the Congress approved, Reorganization Plan No. 4 (84 Stat. 2090), conferring science activities and management of marine fisheries to the National Oceanic and Atmospheric Administration.

(5) Reorganization Plan No. 4 expressly excluded fishery research activities within the Great Lakes from the transfer, retaining management and scientific research duties within the already-established jurisdictions under the 1954 Convention on Great Lakes Fisheries, including those of the Great Lakes Fishery Commission and the Department of the Interior.

(c) Monitoring, assessment, science, and research

(1) In general

The Director may conduct monitoring, assessment, science, and research, in support of the binational fisheries within the Great Lakes Basin.
