

months after the date of the enactment of this Act [Nov. 24, 2003], submit to Congress a report on—

“(A) the efforts made by the United States to initiate the discussions described in subsection (a);

“(B) the results of those efforts; and

“(C) any plans for further discussions and the purposes of such discussions.

“(2) Paragraph (1) shall not apply if no efforts referred to in paragraph (1)(A) have been made.”

§ 6322. IAEA internal reforms

In order to promote the early adoption of reforms in the implementation of the safeguards responsibilities of the IAEA, the Congress urges the President to negotiate with other nations and groups of nations, including the IAEA Board of Governors and the Nuclear Suppliers Group, to—

(1) improve the access of the IAEA within nuclear facilities that are capable of producing, processing, or fabricating special nuclear material suitable for use in a nuclear explosive device;

(2)(A) facilitate the IAEA’s efforts to meet and to maintain its own goals for detecting the diversion of nuclear materials and equipment, giving particular attention to facilities in which there are bulk quantities of plutonium; and

(B) if it is not technically feasible for the IAEA to meet those detection goals in a particular facility, require the IAEA to declare publicly that it is unable to do so;

(3) enable the IAEA to issue fines for violations of safeguards procedures, to pay rewards for information on possible safeguards violations, and to establish a “hot line” for the reporting of such violations and other illicit uses of weapons-grade nuclear material;

(4) establish safeguards at facilities engaged in the manufacture of equipment or material that is especially designated or prepared for the processing, use, or production of special fissionable material or, in the case of non-nuclear-weapon states, of any nuclear explosive device;

(5) establish safeguards over nuclear research and development activities and facilities;

(6) implement special inspections of undeclared nuclear facilities, as provided for under existing safeguards procedures, and seek authority for the IAEA to conduct challenge inspections on demand at suspected nuclear sites;

(7) expand the scope of safeguards to include tritium, uranium concentrates, and nuclear waste containing special fissionable material, and increase the scope of such safeguards on heavy water;

(8) revise downward the IAEA’s official minimum amounts of nuclear material (“significant quantity”) needed to make a nuclear explosive device and establish these amounts as national rather than facility standards;

(9) expand the use of full-time resident IAEA inspectors at sensitive fuel cycle facilities;

(10) promote the use of near real time material accountancy in the conduct of safeguards at facilities that use, produce, or store significant quantities of special fissionable material;

(11) develop with other IAEA member nations an agreement on procedures to expedite

approvals of visa applications by IAEA inspectors;

(12) provide the IAEA the additional funds, technical assistance, and political support necessary to carry out the goals set forth in this subsection;¹ and

(13) make public the annual safeguards implementation report of the IAEA, establishing a public registry of commodities in international nuclear commerce, including dual-use goods, and creating a public repository of current nuclear trade control laws, agreements, regulations, and enforcement and judicial actions by IAEA member nations.

(Pub. L. 103-236, title VIII, §842, Apr. 30, 1994, 108 Stat. 523.)

§ 6323. Reporting requirement

(a) Report required

The President shall, in the report required by section 3281(a) of this title, describe—

(1) the steps he has taken to implement sections 6321 and 6322 of this title, and

(2) the progress that has been made and the obstacles that have been encountered in seeking to meet the objectives set forth in sections 6321 and 6322 of this title.

(b) Contents of report

Each report under paragraph (1)¹ shall describe—

(1) the bilateral and multilateral initiatives that the President has taken during the period since April 30, 1994, in pursuit of each of the objectives set forth in sections 6321 and 6322 of this title;

(2) any obstacles that have been encountered in the pursuit of those initiatives;

(3) any additional initiatives that have been proposed by other countries or international organizations to strengthen the implementation of IAEA safeguards;

(4) all activities of the Federal Government in support of the objectives set forth in sections 6321 and 6322 of this title;

(5) any recommendations of the President on additional measures to enhance the effectiveness of IAEA safeguards; and

(6) any initiatives that the President plans to take in support of each of the objectives set forth in sections 6321 and 6322 of this title.

(Pub. L. 103-236, title VIII, §843, Apr. 30, 1994, 108 Stat. 524.)

§ 6324. Definitions

As used in this subchapter—

(1) the term “highly enriched uranium” means uranium enriched to 20 percent or more in the isotope U-235;

(2) the term “IAEA” means the International Atomic Energy Agency;

(3) the term “near real time material accountancy” means a method of accounting for the location, quantity, and disposition of special fissionable material at facilities that store or process such material, in which

¹ So in original. Probably should be “section;”.

¹ So in original. Probably should be “subsection (a) of this section”.
