

(A) The frequencies between 1695 and 1710 megahertz.

(B) The frequencies between 1755 and 1780 megahertz.

(C) The frequencies between 2155 and 2180 megahertz.

(D) The frequencies between 3550 and 3700 megahertz.

(E) Spectrum that the Commission determines had more than de minimis mobile or fixed wireless broadband operations within the band on the day before March 23, 2018.

(4) Treatment of certain other spectrum

Spectrum identified pursuant to this section may include eligible spectrum, if any, identified after March 23, 2018, pursuant to title X of the Bipartisan Budget Act of 2015 (Public Law 114-74).

(5) Spectrum made available on and after February 11, 2016

Any spectrum that has been made available for licensed or unlicensed use on and after February 11, 2016, and that otherwise satisfies the requirements of this section may be counted towards the requirements of this subsection.

(6) Relocation prioritized over sharing

This section shall be carried out in accordance with section 923(j) of this title.

(7) Considerations

In identifying spectrum for use under this section, the Secretary, working through the NTIA, and Commission shall consider—

- (A) the need to preserve critical existing and planned Federal Government capabilities;
- (B) the impact on existing State, local, and tribal government capabilities;
- (C) the international implications;
- (D) the need for appropriate enforcement mechanisms and authorities; and
- (E) the importance of the deployment of wireless broadband services in rural areas of the United States.

(b) Rules of construction

Nothing in this section shall be construed—

- (1) to impair or otherwise affect the functions of the Director of OMB relating to budgetary, administrative, or legislative proposals;
- (2) to require the disclosure of classified information, law enforcement sensitive information, or other information that must be protected in the interest of national security; or
- (3) to affect any requirement under section 156 of the National Telecommunications and Information Administration Organization Act (47 U.S.C. 921 note), as added by section 1062(a) of the National Defense Authorization Act for Fiscal Year 2000, or any other relevant statutory requirement applicable to the reallocation of Federal spectrum.

§ 1503. Millimeter wave spectrum

(a) FCC proceeding

Not later than 2 years after March 23, 2018, the Commission shall publish a notice of proposed rulemaking to consider service rules to authorize mobile or fixed terrestrial wireless operations, including for advanced mobile service operations, in the radio frequency band between 42000 and 42500 megahertz.

(b) Considerations

In conducting a rulemaking under subsection (a), the Commission shall—

(1) consider how the band described in subsection (a) may be used to provide commercial wireless broadband service, including whether—

- (A) such spectrum may be best used for licensed or unlicensed services, or some combination thereof; and
- (B) to permit additional licensed operations in such band on a shared basis; and

(2) include technical characteristics under which the band described in subsection (a) may be employed for mobile or fixed terrestrial wireless operations, including any appropriate coexistence requirements.

(c) Spectrum made available on and after February 11, 2016

Any spectrum that has been made available for licensed or unlicensed use on or after February 11, 2016, and that otherwise satisfies the requirements of section 1502 of this title may be counted towards the requirements of section 1502(a) of this title.

§ 1504. Broadband infrastructure deployment

(a) Definitions

In this section:

(1) Appropriate State agency

The term “appropriate State agency” means a State governmental agency that is recognized by the executive branch of the State as having the experience necessary to evaluate and carry out projects relating to the proper and effective installation and operation of broadband infrastructure.

(2) Broadband infrastructure

The term “broadband infrastructure” means any buried, underground, or aerial facility, and any wireless or wireline connection, that enables users to send and receive voice, video, data, graphics, or any combination thereof.
